Srikumar Iyer

Sr. Tech Program Manager at Amazon
Greater Seattle Area

Summary

I am a self-driven individual with an industry experience of 12 years, who likes to find solutions to challenging problems using latest technology, out-of-the-box thinking and streamlined execution. I love to execute in an agile setup and I am passionate about continuous learning and improvement.

My industry experience has helped me grow as a tech program manager to handle responsibilities like client interaction, requirement consolidation, meeting stakeholders for intake and status updates and manage project tracking, status reporting and handling release/ field notifications, etc. effectively. Having played multiple roles in an environment that follows agile model of services and solution delivery, I bring with me qualities of customer empathy, passion for latest technology and versatility to help manage stakeholders' and customer's requirements.

Experience

Amazon
3 years 5 months

Senior Technical Program Manager
October 2017 - Present
Seattle, Washington

Technical Program Manager
October 2015 - September 2017 (2 years)
Greater Seattle Area

My responsibilities as a TPM in the transaction risk management group include interfacing between various streams of the risk management platform, customers and the stakeholders to manage project roadmap, timeline and mitigate risks.

MAQ Software

9 years 2 months

Techincal Program Manager
February 2013 - September 2015 (2 years 8 months)
Redmond, Washington

As a TPM at MAQ Software, I worked on several engagements with microsoft over the course of time including the Global marketing and operations team for the marketing portfolio to manage reporting across the budget, planning, execution and pipeline streams, the USCMO team to help alleviate the experience to create, execute and track marketing planning activities and the Enterprise Services Business Intelligence (ESBI) team to help manage a reporting solution framework and in creating and tracking compliance and deal metrics including approval, review, pipeline and violations/exceptions.

In this capacity, I worked on gathering requirements and document user-stories / business requirement documents, meeting stake holders and setting expectations on delivery, capacity, sprint progress and timeline schedule, coordinate with a dev-test team in India through daily conference and follow agile principles of continuous delivery and daily build/integration. In some instances I also jumped in as an individual contributor as needed to code/ debug and test back-end queries and reports.

Project Manager
February 2012 - February 2013 (1 year 1 month)
Mumbai

As a project manager for MAQ Software Mumbai, I worked for the external partner team and owned the extranet vs. intranet security platform to provide secure access to the report artefacts

Technical Project Manager
November 2009 - February 2012 (2 years 4 months)
Greater Seattle Area

As an onsite tech PM at MAQ software, i worked with various microsoft teams including Bing Shopping, Bing Toolbar, Data and Infrastructure and Global marketing and operations team on various projects.

I also coordinated with the offshore teams in Mumbai and Hyderabad to convey client requirements, manage code and builds and track the progress and daily deliverables

Senior Software Development Engineer
February 2008 - November 2009 (1 year 10 months)

As a SSDE at maqsoftware, i lead a team of 4-5 people on various projects involving C++, SQL server 2008 and Business Intelligence.

I helped the company with recruitment and also conducted a 3 week training for new joinees on C# and SQL Server 2008

Software Development Engineer
August 2006 - February 2008 (1 year 7 months)

As a software development engineer i worked on ASP.NET, C# and C++ based projects in MAQ software, hyderabad.

Education

Mahatma Education Societys Pillais Institute of Information Technology
Bachelor of Engineering (B.E.), Computer Engineering · (2002 - 2006)
