743 responses

What percentage of teachers use ICT tools such as Google Classroom, Zoom meetings, Multimedia, etc. while teaching.

743 responses

The overall quality of teaching-learning process in your institute is very good.

743 responses

Give three observations / suggestions to improve the overall teaching – learning experience in your institution.

Observations:

- The overall learning experience was good. The teachers were quite helpful throughout the process.
- Teacher's made so many efforts to improve our skills or knowledge. Overall learning process is good but in online mode there is some communication problem between students and teachers so this problem can be improved.
- Everything seems nice. There were effective learning methods.

- Teachers are able to identify our academic and personal problems and help us to overcome them.

Suggestions for improvement

- The improvement in the video conference call has to be done like some more animation related things to be introduced since it's online and students don't get to know much about the subject.
- Digital Learning should be there even if colleges are offline.
- Three days should be online and three days should be offline so that traveling burden will be reduced.
- Students should get technical reviews from industrial experts on the projects.
- Industrial visits should be there so that we get live experience of what we are studying.
- Make more use of gadgets like a pen tab to simultaneously solve problems with the student instead of presenting the entire problem in one go.
- Separate periods can be included in the time table itself for interview preparation.
- Mentors need to be more engaging with students and solve their problems .
- Teachers are requested to engage the students more to recognize their skills apart from academics.
- The teaching is very nice . In online learning we were able to see the hard work of teachers to teach us and that was good so now I don't know whether offline will start or not... But in my opinion improvement can be While teaching, adding some quizzes will be exciting. Every teacher should do this.
- Use better graphics and visual media to engage students well. More emphasis on skill based learning and promoting entrepreneurial skills in the students.
- More emphasis should be given on practical learning.
- Upgrading practicals and workshops to ongoing industrial trends.
- Apart from Alegria the intra-college festival would help to showcase talents from college.
- A dedicated techfest would help to encourage students towards technical aspects .
- More focus should be given on where the subjects are practically used in the industry and what opportunities will open up by studying a particular course.
- Resume preparation, company specific training should be given, technical interview preparation should be added, coding interview training should be covered .
