

Mahatma Education Society's

Pillai College of Engineering

(Autonomous)

Affiliated to University of Mumbai

Dr. K. M. Vasudevan Pillai's Campus, Sector 16, New Panvel – 410 206.

AUTONOMOUS

Department of Computer Engineering

Syllabus

of

B.Tech. in Computer Engineering

for

The Admission Batch of AY 2022-23

First Year - Effective from Academic Year **2022-23**

Second Year - Effective from Academic Year **2023-24**

Third Year - Effective from Academic Year **2024-25**

Fourth Year - Effective from Academic Year **2025-26**

as per

Choice Based Credit and Grading System

Pillai College of Engineering

Vision

Pillai College of Engineering (PCE) will admit, educate and train a diverse population of students who are academically prepared to benefit from the Institute's infrastructure and faculty experience, to become responsible professionals or entrepreneurs in a technical arena. It will further attract, develop and retain, dedicated, excellent teachers, scholars and professionals from diverse backgrounds whose work gives them knowledge beyond the classroom and who are committed to making a significant difference in the lives of their students and the community.

Mission

To develop professional engineers with respect for the environment and make them responsible citizens in technological development both from an Indian and global perspective. This objective is fulfilled through quality education, practical training and interaction with industries and social organizations.

Dr. K. M. Vasudevan Pillai's Campus , Sector - 16, New Panvel – 410 206

Department of Computer Engineering

Vision

To evolve as a centre of academic excellence and to adapt itself to the rapid advancements in the Computer Engineering field.

Mission

To produce highly qualified, well rounded and motivated graduates who can meet new technical challenges, contribute effectively as team members and be innovators in computer hardware, software, design and application. To pursue creative research and new technologies in computer engineering and across disciplines in order to serve the needs of industry, government, society and the scientific community. To inculcate strong ethical values and responsibility towards society.

Program Educational Objectives (PEOs):

- I. Our graduates will have knowledge, skills and attitude that will allow them to contribute significantly to the research and the discovery of new knowledge and methods in computing and enable them to communicate effectively and work in a team.
- II. Our graduates will function ethically and responsibly, and will remain informed and involved as full participants in our profession and our society. Our graduates will successfully function in multi-disciplinary teams.
- III. Our graduates will apply the basic principles and practices of engineering in the computing domain to the benefit of society and to pursue lifelong learning and professional developments.
- IV. Our graduates will use theoretical and technical computer science knowledge to specify requirements, develop a design, and implement and verify a solution for computing systems of different levels of complexity.

Program Outcomes:

Engineering Graduates will be able to:

1. Engineering knowledge:
Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis:
Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design/development of solutions:
Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. Conduct investigations of complex problems:
Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage:
Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. The engineer and society:
Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. Environment and sustainability:
Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. Ethics:
Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. Individual and team work:
Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. Communication:
Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Project management and finance:
Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. Life-long learning:

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcomes (PSOs):

1. To analyze, design and develop computer programs using appropriate hardware, software and mathematical models in the areas related to algorithms, system software, multimedia, mobile and web technology, data storage and computing, and networking for efficient and secure systems.
2. To use professional engineering practices, logic and strategies for creating innovative career paths to be an entrepreneur, and an urge to pursue higher studies.
3. To Formulate and solve real life engineering problems for the public health and safety with social and environmental awareness along with ethical responsibility.

The Autonomous status of the institute has given an opportunity to design and frame the curriculum in such a way that it incorporates all the needs and requirements of recent developments in all fields within the scope of the technical education. This curriculum will help graduates to attain excellence in their respective field. The curriculum has a blend of basic and advanced courses along with provision of imparting practical knowledge to students through minor and major projects. The syllabus has been approved and passed by the Board of Studies.

Outcome based education is implemented in the academics and every necessary step is undertaken to attain the requirements. Every course has its objectives and outcomes defined in the syllabus which are met through continuous assessment and end semester examinations. Evaluation is done on the basis of Choice Based Credit and Grading System (CBCGS). Optional courses are offered at department and institute level. Selection of electives from the same specialization makes the student eligible to attain a B. Tech. degree with respective specialization.

Every learner/student will be assessed for each course through (i) an Internal/Continuous assessment during the semester in the form of either Practical Performance, Presentation, Demonstration or written examination and (ii) End Semester Examination (ESE), in the form of either theory or viva voce or practical, as prescribed by the respective Board Studies and mentioned in the assessment scheme of the course content/syllabus. This system involves the Continuous Evaluation of students' progress Semester wise. The number of credits assigned with a course is based on the number of contact hours of instruction per week for the course. The credit allocation is available in the syllabus scheme of each semester.

The performance of a learner in a semester is indicated by a number called Semester Grade Performance Index (SGPI). The SGPI is the weighted average of the grade points obtained in all the courses by the learner during the semester. For example, if a learner passes five courses (Theory/labs./Projects/ Seminar etc.) in a semester with credits C₁, C₂, C₃, C₄ and C₅ and learners grade points in these courses are G₁, G₂, G₃, G₄ and G₅ respectively, then learners SGPI is equal to:

$$SGPI = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4G_4 + C_5G_5}{C_1 + C_2 + C_3 + C_4 + C_5}$$

The learner's up to date assessment of the overall performance from the time s/he entered for the programme is obtained by calculating a number called the Cumulative Grade Performance Index (CGPI), in a manner similar to the calculation of SGPI. The CGPI therefore considers all the courses mentioned in the scheme of instructions and examinations, towards the minimum requirement of the degree learners have enrolled for. The CGPI at the end of this semester is calculated as,

$$CGPI = \frac{C_1G_1 + C_2G_2 + C_3G_3 + \dots + C_i * G_i + \dots + C_nG_n}{C_1 + C_2 + C_3 + \dots + C_i + \dots + C_n}$$

The Department of Computer Engineering offers a B. Tech. programme in Computer Engineering. This is an eight-semester course. The complete course is a 161 credit course which comprises core courses and elective courses. The department level elective courses are distributed over 4 specializations. The specializations are:

1. Data Analytics and Language Processing.
2. Network and Information Security.
3. Computational Intelligence and Automation.
4. Systems and Computing.

The students also have a choice of opting for Institute level specializations. These are

1. Business and Entrepreneurship
2. Bioengineering
3. Engineering Design
4. Art and Humanities
5. Applied Science
6. Life Skills, Repair, Maintenance and Safety

As minimum requirements for the credits to be earned during the B.Tech in Computer Engineering program, a student will have to complete a minimum of three specializations of which two are to be chosen from the department list and one has to be from the Institute level specialization list. In order to complete each specialization, a minimum of three courses under that specialization has to be completed. The credit requirement for the B.Tech. in Computer Engineering course is tabulated in Table 1.

Table 1. Credit Requirement for B.Tech in Computer Engineering

Category	Credits
Humanities and Social Sciences including Management courses	9
Basic Science courses	22
Engineering Science courses including workshop, drawing, basics of electrical/mechanical/computer etc	25
Professional core courses	56
Professional Elective courses relevant to chosen specialization/branch	24
Open subjects – Electives from other technical and /or emerging subjects	6
Project work, seminar and internship in industry or elsewhere	19
Mandatory Courses - Environmental Sciences, Induction training, Indian Constitution, Essence of Indian Traditional Knowledge	Non credit courses
Total Credits	161

Preface by Board of Studies in Computer Engineering

Dear Students and Teachers, we, the members of Board of Studies Computer Engineering, are very happy to present the B.Tech Computer Engineering syllabus effective from the Academic Year 2021-22 . We are sure you will find this syllabus interesting, challenging, and fulfill certain needs and expectations.

Computer Engineering is one of the most sought-after courses amongst engineering students. The syllabus needs revision in terms of preparing the student for the professional scenario relevant and suitable to cater the needs of industry in the present-day context. The syllabus focuses on providing a sound theoretical background as well as good practical exposure to students in the relevant areas. It is intended to provide a modern, industry-oriented education in Computer Engineering. It aims at producing trained professionals who can successfully become acquainted with the demands of the industry worldwide. They obtain skills and experience in up-to-date knowledge to analysis design, implementation, validation, and documentation of computer software and systems.

This syllabus is finalized through a brainstorming session attended by Heads of Department and senior faculty members of Department of Computer Engineering. The syllabus falls in line with the vision and mission of the Computer Engineering Department and various accreditation agencies by keeping an eye on the technological developments, innovations, and industry requirements.

We would like to place on record our gratitude to the faculty, students, industry experts and stakeholders for having helped us in the formulation of this syllabus.

Board of Studies in Computer Engineering

1. Dr. Sharvari S. Govilkar	Coordinator (Chairman)
2. Dr. Prashant P Nitnaware	Member
3. Prof. Varunakshi Bhojane	Member
4. Prof. Payel Thakur	Member
5. Dr. Neeta Deshpande	Member
6. Dr.Jyoti Malhotra	Member
7. Dr.Kavita Sonawane	Member
8. Prof.Pranita Mahajan	Member
9. Mr. Samir Mahindre	Member
10. Prof. Madhura Vyavahare	Member

1. Course Objectives:

The course is aimed

1. To develop the basic Mathematical skills of engineering students that are imperative for effective understanding of complex numbers in engineering subjects.
2. To acquaint students with the hyperbolic, logarithmic functions and Logic.
3. To understand differentiation and expansions of functions. which will serve as basic tools for specialized studies in many fields of engineering and technology.
4. To learn the partial differentiation techniques and its applications used in engineering problems.
5. To learn the applications of Matrices useful in engineering.
6. To provide hands on experience using SCILAB software to handle Mathematical modelling.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Apply the basic concept of complex numbers and use it to solve problems in engineering.
2. Apply the basic concept of Hyperbolic, logarithmic functions and Logic in engineering problems.
3. Apply the concept of expansion of functions, successive differentiation and vector differentiation in optimization problems.
4. Use the basic concepts of partial differentiation in finding the Maxima and Minima required in engineering problems.
5. Use the concept of matrices in solving the system of equations used in many areas of research..
6. Apply the concept of numerical Methods for solving the engineering problems with the help of SCILAB software.

3. Detailed Theory Syllabus:

Module No.	Module	Detailed Content	Hrs.
1	Complex Numbers	Complex Numbers Pre-requisite: Review of Complex Numbers-Algebra of Complex Number, Cartesian, polar and exponential form of complex number. 1.1. De Moivre's Theorem. (Without Proof) 1.2. Expansion of $\sin n\theta$, $\cos n\theta$ in terms of sines and cosines of multiples of θ and Expansion of $\sin n\theta$, $\cos n\theta$ in powers of $\sin\theta$, $\cos\theta$ 1.3. Powers and Roots of complex numbers.	6

2	Hyperbolic , Logarithm functions and Logic	Hyperbolic , Logarithm functions and Logic 2.1 Introduction to Hyperbolic functions, Logarithmic functions, Separation of real and Imaginary parts. 2.2 Propositional logic, logical equivalence, Negation of given statement, predicates & Quantifiers, Normal form, mathematical induction	6
3	Successive Differentiation, Expansion of Function and Vector Differentiation	Successive Differentiation, Expansion of Function and Vector Differentiation Pre-requisite : Derivative of standard functions and Rules of derivative 3.1 Successive differentiation: nth derivative of standard functions. Leibnitz's Theorem (without proof) and problems 3.2 Taylor's Theorem (Statement only) and Taylor's series, Maclaurin's series (Statement only). Expansion of e^x , $\sin(x)$, $\cos(x)$, $\tan(x)$, $\sinh(x)$, $\cosh(x)$, $\tanh(x)$, $\log(1+x)$, $\sin^{-1}(x)$, $\cos^{-1}(x)$, $\tan^{-1}(x)$. 3.3 Vector function of scalar quantities, Vector operator ∇ , gradient, $\text{Grad } \Phi$, Directional derivatives. Divergence and curl and their Physical interpretation	6
4	Partial Differentiation and Applications of Partial Differentiation	Partial Differentiation and Applications of Partial Differentiation 4.1 Partial Differentiation: Function of several variables, Partial derivatives of first and higher order. Differentiation of composite function. 4.2. Euler's Theorem on Homogeneous functions with two independent variables (without proof). Deductions from Euler's Theorem. 4.3 Maxima and Minima of a function of two independent variables, Lagrange's method of undetermined multipliers with one constraint. Jacobian of two independent variables.	6
5	Matrices	Matrices Prerequisite: Inverse of a matrix, addition, multiplication and transpose of a matrix, Elementary row and column transformation 5.1. Symmetric, Skew- Symmetric, Hermitian, Skew Hermitian, Unitary, Orthogonal Matrices and properties of Matrices (Without Proof). 5.2 Rank of a Matrix using Echelon forms, reduction to normal form and PAQ form. 5.3. System of homogeneous and non –homogeneous equations, their consistency and solutions.	6
6	Numerical Methods	Numerical Methods 6.1 Solution of system of linear algebraic equations , (1) Gauss Elimination, (2) Gauss Jacobi Iteration Method (3) Gauss Seidel Iteration Method, 6.2 Solutions of Transcendental equations (1) Bisection method (2) Secant Method (3) Newton Raphson	6

4. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

5. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiments) + 5 Marks (Assignments) + 5 Marks (Attendance)

General Instructions:

1. Batch wise practical's are to be conducted. The number of students per batch should be as per norms.
2. Students must be encouraged to write SCILAB Programs in the laboratory. Each student has to perform at least 4 SCILAB practical's and at least 6 assignments on the entire syllabus.
3. SCILAB Practical's will be based on (i) Gauss Elimination(ii) Gauss Seidel Iteration method (iii) Gauss Jacobi Iteration Method (iv) Bisection method (v) Secant Method (vi) Newton Raphson (vii) Matrices (viii) Maxima and Minima.(At least four).

6. Books and References:

1. Higher Engineering Mathematics, Dr.B.S.Grewal, Khanna Publication
2. Advanced Engineering Mathematics, Erwin Kreyszig, Wiley Eastern Limited, 9th Ed.
3. Advanced Engineering Mathematics, R. K. Jain and S. R. K. Iyengar, Narosa publication,
4. Matrices, Shanti Narayan, S. Chand publication.
5. Applied Numerical Methods with MATLAB for Engineers and Scientists by Steven Chapra, McGraw Hill .

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
FY103	Engineering Physics I	30	30	30	45	25	-	-	100

1. Course Objectives:

The course is aimed to:

1. To impart knowledge of basic concepts in applied physics and founding principles of technology..
2. To provide the knowledge and methodology necessary for solving problems in the field of engineering.
3. To develop scientific temperament for scientific observations, recording, and inference drawing essential for technology studies.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Explain the limits of Classical Physics and apply the fundamentals of quantum mechanics to study the one dimensional motion of microscopic particles.
2. Apply the knowledge of superconductivity to SQUID and Magnetic levitation.
3. Able to understand fundamental concepts of classical optics and applications of interference in science and technology.
4. Understand the fundamentals of Theory of relativity and its use in various technological applications.
5. Comprehend the concepts of electrodynamics and Maxwell's equations and their use in telecommunication systems.
6. Apply the concepts of electromagnetism in focusing systems and CRO.

3. Detailed Theory Syllabus:

Module No.	Module	Detailed Content	Hrs.
1	Quantum Mechanics	Quantum Mechanics: De Broglie hypothesis of matter waves; properties of matter waves; wave packet, phase velocity and group velocity; Wave function; Physical interpretation of wave function; Heisenberg uncertainty principle; nonexistence of electron in nucleus; Schrodinger's time dependent wave equation; time independent wave equation; Free electron, Particle trapped in one dimensional infinite potential well, Quantum Computing.	6
2	Superconductivity	Superconductivity: Critical temperature, critical magnetic field, Meissner's effect, Type I and Type II and high Tc superconductors; BCS Theory (concept of Cooper pair);	3

		Josephson effect, Applications of superconductors- SQUID, MAGLEV	
3	Thin Film Interference	Thin Film Interference : Interference by division of amplitude and by division of wave front; Interference in thin film of constant thickness due to reflected and transmitted light; origin of colours in thin film; Wedge shaped film(angle of wedge and thickness measurement); Newton's rings Applications of interference - Determination of thickness of very thin wire or foil; determination of refractive index of liquid; wavelength of incident light; radius of curvature of lens; testing of surface flatness; Anti-reflecting films and Highly reflecting film.	6
4	Special theory of relativity	Special theory of relativity: Postulates of special theory of relativity, Inertial and non-inertial frames of references. Gallilian transformation equations, Limitations of gallilian transformation equations Lorentz Transformation equations Length contraction and time dilation. Einstein's Mass energy relation. LIGO Project, Discovery of 4 degree Kelvin Cosmic background radiation	4
5	Electrodynamics	Electrodynamics: Scalar and vector fields, Cartesian, Cylindrical and Spherical Coordinate system, gradient, curl and divergence in Cartesian coordinate system, line integral, surface integral, volume integral, divergence theorem, Stoke's theorem, Maxwell's Equations.	4
6	Electron Optics	Electron Optics: Electrostatic focusing, Magnetostatic focusing, Cathode Ray Tube(CRT), Construction and working of CRO. Lissajous figures.	2

4. Suggested Experiments:

1. Determination of radius of curvature of a lens using Newton's ring set up
2. Determination of diameter of wire/hair or thickness of paper using Wedge shape film method and estimation of Young's modulus of the material.
3. Brewster's law (Polarisation of light by reflection through glass slab.)
4. To study the nature of polarisation of laser light using photocell and quarter wave plate (QWP)
5. Use of CRO for measurement of frequency and amplitude.
6. Determination of unknown frequency by Lissajous figures.

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 30 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 15 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiments) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

1. A text book of Engineering Physics-Avadhanulu & Kshirsagar, S. Chand
2. A textbook of Optics - N. Subramanyam and Brijlal, S.Chand
3. Fundamentals of optics by Jenkins and White, McGrawHill
4. Modern Engineering Physics – Vasudeva, S.Chand
5. Concepts of Modern Physics- ArtherBeiser, Tata McGraw Hill
6. A TextBook of Engineering Physics, S. O. Pillai, New Age International Publishers
7. Optics - Ajay Ghatak, Tata McGraw Hill
8. Introduction to Electrodynamics- D. J. Griffiths, Pearson publication
8. Introduction to Electrodynamics- D. J. Griffiths, Pearson publication
9. Physics for Engineers, M.R. Srinivasan, New Age International Publishers.
10. Introduction to Special Relativity- Robert Resnick, John Wiley and sons

		IA 1	IA 2	Average					
FY105	Engineering Chemistry I	30	30	30	45	25	-	-	100

1. Course Objectives:

The course is aimed to:

1. To impart a scientific approach and to familiarize the applications of chemistry in the field of engineering.
2. The student with the knowledge of the basic chemistry, will understand and explain scientifically the various problems related to chemistry in the industry/engineering field.
3. To develop abilities and skills that are relevant to the study and practice of chemistry.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. To understand and analyse the combustion mechanisms of various fuels and be able to characterize the fuels.
2. To select various lubricants for different industrial applications.
3. To become familiarized with corrosion forms and their effects and to recognize and use the method of corrosion protection.
4. To analyse the quality of water and will be able to suggest methods to improve water quality.
5. To assess the environmental impact and understand the methods for their minimisation.

3. Detailed Theory Syllabus:

Module No.	Module	Detailed Content	Hrs.
1	Fuels And Combustion	Prerequisite: What are fuels, Types of fuels, Characteristics of fuels. 1.1. Calorific value of a fuel - HCV and LCV, Theoretical determination of calorific value of fuel by Dulong's formula, Numerical problems. 1.2 Solid fuels : Coal, Analysis of coal - Proximate and Ultimate analysis, Numerical problems Liquid fuels: Composition and Classification, Octane number, Cetane number, Biodiesel Gaseous Fuels: LPG and CNG 1.3. Combustion of fuels – Numerical problems for calculating the amount of air needed for the complete combustion of solid and gaseous fuels	5
2	Lubricants	Prerequisites : Definition of Lubricants and Lubrication, functions of lubricants 2.1 Mechanisms of lubrication – Thick film, Thin film and Extreme pressure	4

		2.2 Classification of lubricants - Solid (MoS_2 , graphite), Semi solid (greases), Liquid (animal/vegetable oils, mineral oils, synthetic oils) 2.3 Properties of lubricants and their significance - Viscosity and Viscosity Index, Flash and Fire Points, Cloud and Pour Points, Acid Number, Saponification Number, Steam Emulsification Number and related numerical problems.	
3	Corrosion	Prerequisite:- corrosion , corrosion product, electrochemical series, corrosive and non corrosive metals. 3.1 Mechanism of corrosion - Chemical and Electrochemical corrosion. 3.2 Types of corrosion : Galvanic corrosion, Differential aeration corrosion, Pitting corrosion, Intergranular corrosion, Waterline corrosion, Stress corrosion. 3.3 Factors Affecting Corrosion Rate : - (i) Nature of metal, (ii) Nature of environment.	4
4	Corrosion Prevention	CORROSION PREVENTION 4.1 Methods of Corrosion Control : Material selection, Design, Cathodic protection, Anodic protection 4.2 Protective Coatings: Metallic coatings anodic coating (galvanizing) and cathodic coating (Tinning), Different Methods of Applying Metallic Coatings (No explanation needed) 4.3 Organic coatings – Paints and Special Paints.	3
5	Water And Its Treatment	Prerequisite : Knowledge of sources of water, Possible impurities in water, Characteristics imparted by impurities in water. 5.1 Hardness in water – types & its units, Determination of hardness by EDTA method, and numerical problems. 5.2. Effects of Hard water in boilers - Priming and Foaming, Scales and Sludges, Boiler corrosion, caustic embrittlement 5.3 Softening of water- Ion exchange process. 5.4 Desalination of brackish water- Reverse Osmosis, Electrodialysis, Ultrafiltration. 5.5 Municipal water treatment – Primary, secondary and tertiary, BIS specification of drinking water	5
6	Environmental Chemistry	Prerequisites: Definition of Environment and Primary concept of environmental pollution. 6.1 Concept and Scope of Environmental Chemistry. 6.2 Environmental Pollution and Control, Water Pollution - BOD and COD, determination and numerical problems, E- pollution and N-pollution 6.3 Concept of 12 principles of Green chemistry, discussion with examples, numerical on atom economy.	3

4. Suggested Experiments:

1. Determination of Hardness in water
2. Determination of Viscosity of oil by Redwood Viscometer
3. Determination of Flash point of a lubricant using Abel's apparatus
4. Determination of Acid Value and Saponification Value of an oil.
5. Determination of Chloride content of water by Mohr's Method
6. Determination of moisture content in coal sample.
7. Study of the effect of different environments (Acid, Base) on corrosion rate.
8. Determination of COD Value of water.
9. Removal of hardness using ion exchange column.
10. Calorific value of liquid fuel

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 30 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 15 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiments) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

1. Engineering Chemistry – P.C.Jain and Monika Jain, Dhanpat Rai Publications
2. A Textbook of Engineering Chemistry, - Shashi Chawla (DhanpatRai publications)
3. A textbook of Engineering Chemistry - S.S. Dara, S. Chand Publishing House
4. Engineering Chemistry – O.G. Palanna , Tata Mc Graw Hill
5. Environmental Chemistry – A.K.De, New Age International

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
FY111	C Programming	40	40	40	60	25	25	-	150

1. Course Objectives:

The course is aimed to:

1. To provide exposure to problem-solving by developing algorithms and designing flowchart.
2. Implement the logic to solve real world problems using the C programming language.
3. To develop solutions using different programming concepts.
4. To be able to write and read data from files.
5. To decompose solutions into smaller units using functions.
6. To create different types of data-structure using structure, arrays and pointers.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Understand the basic terminology used in computer programming.
2. Use different data types, operators and keywords to write programs
3. Able to logically code using control statements and loops.
4. Use the concepts of arrays, strings, functions and Structures to structure complex programs
5. Use of pointers to access different user defined data types like arrays, Strings and Structures
6. Use different data structures and open/create/update basic data files.

3. Detailed Theory Syllabus:

Module No.	Module	Detailed Content	Hrs.
1	Fundamentals of C Programming	History of C programming language and its features 1.1 Algorithm & Flowchart : Three construct of Algorithm and flowchart: Sequence, Decision (Selection) and Repetition 1.2 Character Set, Identifiers and keywords, Data types, Constants, Variables. 1.3 Operators-Arithmetic, Relational and logical, Assignment, Unary, Conditional, Bitwise, Comma, other operators. Expression, statements, Preprocessor, Structure of basic C program.	5
2	Control Flow Statements	2.1 Decision making statements- if statement, if-else statement , if-else-if ladder, nested if-else, switch statement 2.2 Looping – while , do-while, for 2.3 Jump Statements- break, continue, goto, return, exit	10

3	Functions	3.1 Introduction to Functions, declaring and defining function, calling function, passing arguments to a function, recursion and its application. 3.2 Library functions – getchar(), putchar(), gets(), puts(), Math function, Ctype functions 3.3 Storage classes in C-auto, extern, static, register	5
4	Arrays, Strings and Structures	4.1 Array Introduction, Declaration, Initialization, Accessing array element, One and Two-dimensional array. 4.2 Strings Introduction, String using char array, String handling functions 4.3 Structure Introduction, Declaration, Initialization, Nested structure, Array of Structure.	10
5	Pointers	5.1 Pointer :Introduction, Definition, Pointer Variables, Referencing and Dereferencing operator, Pointer Arithmetic, Pointers to Pointers, void Pointer, 5.2 Pointers to Array and Strings, Passing Arrays to Function, Accessing structure using pointers, Array of Pointers, call by value and call by reference. 5.3 Dynamic Memory Allocation using malloc, calloc, realloc, free	6
6	File Handling	6.1 Introduction, types of Files, File Operations- Opening, Modes of opening a file, Closing, Creating, Reading, Processing File.	3

4. Suggested Experiments:

1. Write algorithm and draw flowchart to find roots of quadratic equation
2. Write a program to swap two integers with and without using temporary variables.
3. Write a program to calculate the volume of a cone. Accept radius & height from the user.
4. Write a program to find the greatest among three integers using ternary operator & if-else.
5. An electric power distribution company charges its domestic customer as follows :

Consumption Units	Rate of charge
0 - 200	0.50 per unit
201 - 400	Rs. 100 plus 0.65 per unit excess of 200 units
401 - 600	Rs. 230 plus 0.85 per unit excess of 400 units
601 above	Rs. 390 plus 1.00 per unit excess of 600 units.

Program should read units consumed for a customer and calculate the total bill.

6. Write a program to take input for a character and print the month names starting with that character using switch case. (Ex: I/P = 'A', O/P = April, August).
7. Write a program to find the result of the series: $1 - \frac{22}{3} + \frac{32}{5} - \dots + \frac{n^2}{(2n-1)}$
8. Write a program to print the following pattern : (Take input for the no. of lines 'N').

```

*
* *
* * *
* * * *
```

9. Write a program to print the following pattern : (Take input for the no. of lines 'N').

```

1
12A
123BA
```

10. Write a program to find if the given number is a palindrome number or not.
11. Write a program for the sum of natural numbers using a recursive function.
12. Write a program to illustrate different ways of passing parameters to a function to demonstrate increment/decrement operators.
13. Write a program to cyclically rotate elements of the integer array in the right direction.
14. Write a program to find transpose using the same matrix.
15. Write a program to find the reverse of a string using another string (Define a user defined function to find the length of the string).
16. Write a program using Structure to accept employee name, emp_id, date_of_joining and salary. Display the result in descending order of salary. Store data for N Employees.
17. Write a program to dynamically allocate memory for the user entered size 'N' of an array, accept 'N' integers from the user and find the average of these integers using function and pointer (Pass array to the function using pointer).
18. Write a program to accept a set of characters from the user until the user presses the full stop ('.') and store it in a text file. Read from the file and display the contents of the file.

5. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hour.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

6. Practical Assessment: A Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also, Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiments) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
FY107	Basic Electrical Engineering*	40	40	40	60	25	25	-	150

1. Course Objectives:

The course is aimed to:

1. To provide knowledge on fundamentals of D.C. circuits.
2. To provide knowledge of D.C network theorems and its applications.
3. To impart knowledge on fundamentals of A.C. circuits
4. To impart knowledge on fundamentals of single phase A.C circuits and its applications.
5. To impart knowledge on fundamentals of 3- Φ A.C. circuits and its applications.
6. To impart knowledge on OP-AMP and IC555.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Apply basic concepts to analyse D.C circuits.
2. Apply various D.C network theorems to determine the circuit response/ behaviour.
3. Apply basic concepts to analyse A.C waveforms.
4. Evaluate and analyse single phase A.C circuits.
5. Evaluate and analyse three phase A.C circuits.
6. Implement applications using OPAMP and timer circuit.

3. Detailed Theory Syllabus:

Module No.	Module	Detailed Content	Hrs.
1	DC Circuits	DC Circuits Series and Parallel circuits, Concept of short and open circuits, Star-delta transformation, Ideal and practical voltage and current source, Kirchhoff 's laws, Mesh and Nodal analysis (super node and super mesh included), Source transformation.	6
2	DC Theorems	DC Theorems Linear and Nonlinear Circuit, Active and passive network, Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum power transfer theorem, (Source transformation not allowed for Superposition theorem).	6
3	AC fundamentals	AC fundamentals Generation of alternating voltages, A.C terminology, RMS and Average value, form factor, crest factor, Phasor	3

		representation of alternating quantities , addition and subtraction of alternating quantities using phasors.	
4	Single Phase AC Circuits	Single Phase AC Circuits AC through pure resistor, inductor and capacitor. AC through R-L , R-C and R-L-C series and parallel circuits, phasor diagrams, power and power factor, series and parallel resonance, Q-factor.	9
5	Three Phase AC Circuits	Three Phase AC Circuits Three phase voltage and current generation, star and delta connections (balanced load only), relationship between phase and line currents and voltages in star and delta connections, Phasor diagrams, Basic principle of wattmeter, measurement of power by two wattmeter method.	6
6	Operational Amplifier and Integrated Circuits	Operational Amplifier and Integrated Circuits Basics of semiconductor devices, Ideal characteristics of operational amplifier (OP-AMP), concept of virtual ground, OP-AMP as inverting and non-inverting amplifier, adder and subtractor, integrator and differentiator, OP-AMP as a comparator with different applications. Introduction to IC555 as a timer circuit, internal block diagram of IC555, Astable and Monostable Multivibrator using IC 555.	6

4. Suggested Experiments:

1. Mesh and Nodal analysis. (Module 1)
2. Verification of Superposition Theorem. (Module 2)
3. Verification Thevenin's Theorem. (Module 2)
4. Study of R-L series and R-C series circuit. (Module 3 and Module 4)
5. R-L-C series resonance circuit / parallel resonant circuit. (Module 3 and Module 4)
6. Relationship between phase and line currents and voltages in three phase system (star & delta). (Module 5)
7. Power and phase measurement in three phase system by one wattmeter method. (Module 5)
8. Power and phase measurement in three phase system by two wattmeter method. (Module 5)
9. LTSpice Simulation of OPAMP as an integrator/ differentiator. (Module 6)
10. LTSpice Simulation of 555 Timer as an Astable Multivibrator/ Monostable Multivibrator. (Module 6)

5. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
 1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

A. Books:

1. “Basic Electrical & Electronics Engineering (BEE)”, by Prof. B. R. Patil, Oxford Higher Education
2. “Basic Electrical & Electronics Engineering (BEE) by Prof. Ravish Singh”, McGraw Hill Education

B. References:

1. B.L. Theraja, “Electrical Technology” Vol-I and II, S. Chand Publications, 23 rd ed. 2003.

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
FY117	Basic Workshop Practice-I	-	-	-	-	50	-	-	50

1. Course Objectives:

The course is aimed to:

1. To impart training to help the students develop engineering skill sets
2. To inculcate respect for physical work and hard labour
3. To get exposure to interdisciplinary engineering domain.
4. To get exposure to the spirit of teamwork.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. To develop the necessary skill required to handle / use different fitting tools.
2. To develop skills required for hardware maintenance.
3. Able to install an operating system and system drives.
4. Able to prepare the edges of jobs and do simple arc welding.
5. Demonstrate the turning operation with the help of a simple job.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Contents of Module	Hrs.
1	Fitting	Fitting: Use and setting of fitting tools for chipping, cutting, filing, marking, center punching, drilling, tapping. Term work to include one job involving following operations : filing to size, one simple male- female joint, drilling and tapping	10
2	Hardware and Networking	Hardware and Networking: Dismantling of a Personal Computer (PC), Identification of Components of a PC such as power supply, motherboard, processor, hard disk, memory (RAM, ROM), CMOS battery, CD drive, monitor, keyboard, mouse, printer, scanner, pen drives, disk drives etc. ·Assembling of PC, Installation of Operating System (Any one) and Device drivers, Boot-up sequence. Installation of application software (at least one) · Basic troubleshooting and maintenance · Identification of network components: LAN card, wireless card, switch, hub, router, different types of network cables (straight cables, crossover cables, rollover cables) Basic networking and crimping. NOTE: Hands on experience to be given in a group of not more than four students	8
3	Welding	Welding: Edge preparation for welding jobs. Arc welding for different job like, Lap welding of two plates, butt welding of	6

		plates with simple cover, arc welding to join plates at right angles.	
4	Machine Shop	Machine Shop: At least one turning job is to be demonstrated and a simple job to be made for Term Work in a group of 4 students.	6
5	Plumbing	Plumbing: Use of plumbing tools, spanners, wrenches, threading dies, demonstration of preparation of a domestic line involving fixing of a water tap and use of coupling, elbow, tee, and union etc.	6
6	Adaptive Manufacturing Technology	Adaptive Manufacturing Technology: History of adaptive manufacturing, 3D Printer: - how a 3D printer works, Parts of 3D Printer and their functions, Constructional details of 3D printer.	6

Note:- Trade 1 & 2 are compulsory and select any one trade from trade 3 to 6.

4. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 50 Marks (Total marks) = 30 Marks (Experiment) + 10 Marks (Assignments) + 10 Marks (Attendance)

5. Books and References:

1. Workshop Technology by H K Hajara Choudhary
2. Manufacturing Technology by R C Jain
3. Workshop Technology by R S Khurmi and J S Gupta
4. Workshop Technology by Chapman.

		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
FY102	Engineering Mathematics II	40	40	40	60	25	-	-	125

1. Course Objectives:

The course is aimed to:

1. To develop the basic mathematical skills of differential equations of engineering students
2. To understand the linear differential equation with constant coefficients used in mathematical modelling.
3. To acquaint the students with the Beta, Gamma functions and set theory.
4. To learn different techniques to solve double integrations.
5. To learn the applications of integration in solving the complex engineering problems.
6. To provide knowledge of numerical techniques using SCILAB software to handle Mathematical modelling.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Apply the basic concept of linear differential equations to solve problems in engineering.
2. Apply the basic concept of applications of higher order differential equations in mathematical modelling to solve real life problems.
3. Apply the basic concepts of beta, gamma and set theory to solve engineering problems.
4. Apply the concept of double integration in solving problems of engineering and technology.
5. Apply the concept of double integrations to find length, area and volume.
6. Apply the concept of differentiation and integration numerically for solving the engineering problems with the help of SCILAB software.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Contents of Module	Hrs.
1	Differential Equations of First Order and First Degree	Differential Equations of First Order and First Degree 1.1 Exact differential Equations, Equations reducible to exact form by using integrating factors. 1.2 Linear differential equations, equation reducible to linear form. 1.3 Application of differential equation of first order and first degree in engineering.	6
2	Linear Differential Equations With Constant Coefficients and Variable	Linear Differential Equations With Constant Coefficients and Variable coefficients of higher order:- 2.1. Linear Differential Equation with constant coefficient-complementary function, particular integrals of differential equation of the type $f(D)y = X$ where X is e^{ax} , $\sin(ax + b)$, $\cos(ax + b)$, x^n , $e^{ax} V$, $x V$.	6

	coefficients of higher order	2.2.Cauchy Differential equation, Method of variation of parameters two variables	
3	Beta and Gamma Function, Set theory	Beta and Gamma Function, Set theory 3.1 Beta and Gamma functions and its properties. 3.2 Basics of set theory and set operations, law of set, partition of set, Power set, cartesian product, Inclusion-Exclusion Principle	6
4	Double Integration	Double Integration:- Prerequisite: Tracing of curves 4.1. Double integration- Evaluation of Double Integrals.(Cartesian & Polar),Change of order of Integration and evaluation 4.2. Evaluation of integrals over the given region.(Cartesian & Polar) 4.3. Evaluation of double integrals by changing to polar coordinates.	6
5	Applications of integration	Applications of integration :- 5.1 Rectification of plane curves.(Cartesian and polar) 5.2. Application of double integrals to compute Area 5.3.Triple integration: Evaluation (Cartesian, cylindrical and spherical polar coordinates)	6
6	Numerical Techniques	Numerical Techniques:- 6.1. Numerical solution of ordinary differential equation (a) Euler's method (b) Modified Euler method, (c)Runge-Kutta fourth order method 6.2. Numerical integration- (a) Trapezoidal (b) Simpson's 1/3rd (c) Simpson's 3/8th rule	6

4. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

5. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

General Instructions:

1. Batch wise practical's are to be conducted. The number of students per batch should be as per norms.
2. Students must be encouraged to write SCILAB Programs in the laboratory. Each Student has to perform at least 4 SCILAB practical's and at least 6 assignments on the entire syllabus.
3. SCILAB Practical's will be based on (i) Euler's method (ii) Modified Euler method, (iii)Runge-Kutta fourth order method (iv) Trapezoidal (v) Simpson's 1/3rd (vi) Simpson's 3/8th rule(vii) Differential equations (viii) Integration. (At least four)

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
FY104	Engineering Physics II	30	30	30	45	25	-	-	100

1. Course Objectives :

The course is aimed to:

1. To impart knowledge of basic concepts in applied physics and founding principles of technology.
2. To provide the knowledge and methodology necessary for solving problems in the field of engineering.
3. To develop scientific temperament for scientific observations, recording, and inference drawing essential for technology studies.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Explain the functioning of lasers and their various applications.
2. Able to explain the working principle of optical fibres and their applications especially in the field of communication.
3. To comprehend the basic concepts of semiconductor physics and apply the same to electronic devices.
4. To analyse digital logic processes and implement logical operations using various combinational logic circuits.
5. To analyse design and implement logical operations using various sequential logic circuits.
6. Interpret and explore basic sensing techniques for physical measurements in modern instrumentations.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Contents of Module	Hrs.
1	Lasers	Lasers : spontaneous emission and stimulated emission; metastable state, population inversion, types of pumping, resonant cavity, Einstein's equations; Helium Neon laser; Nd:YAG laser; Semiconductor laser, Applications of laser- Holography (construction and reconstruction of holograms) and industrial applications(cutting, welding etc), Applications in the medical field.	4
2	Optical Fibres	Optical Fibres: Working Principle and structure , Numerical Aperture for step index fibre; critical angle; angle of acceptance; V number; number of modes of propagation; types of optical fibres; (Applications :) Fibre optic communication system; sensors (Pressure, temperature, smoke, water level), applications in the medical field.	4

3	Semiconductor Physics	SEMICONDUCTOR PHYSICS Splitting of energy levels for band formation; Classification of semiconductors(direct & indirect band gap, elemental and compound); Conductivity, mobility, current density (drift & diffusion) in semiconductors(n type and p type); Fermi Dirac distribution function; Fermi energy level in intrinsic & extrinsic semiconductors; effect of impurity concentration and temperature on fermi level; Fermi Level diagram for p-n junction(unbiased, forward bias, reverse bias); Breakdown mechanism (zener avalanche), Hall Effect, Applications of semiconductors: Rectifier diode, LED, Zener diode, Photo diode, Photovoltaic cell, BJT, FET, SCR., MOSFET	7
4	Logic gates and combinational Logic circuits	Logic gates and combinational Logic circuits: Review of Binary, Octal and Hexadecimal Number systems and their interconversion, Difference between analog and digital signal, Logic levels, Digital logic gates,, Universal gates, Realization using NAND and NOR gates, Half adder and Full adder circuit, MUX - DEMUX, ENCODERS and DECODERS.	3
5	Sequential Logic Circuits	Sequential Logic Circuits: Flip Flops: R-S and J-K Flip Flops, Conversion of flip-flops to shift registers. Counters: Up/Down and BCD counter.	4
6	Physics of Sensors	Physics of Sensors: Temperature Sensor- Resistance Temperature Detectors(RTDs) (PT-100), LM 35 Temperature sensor, Soil Moisture sensor, Gas sensor MQ135,Pressure Transducers- Capacitive pressure transducer, Inductive pressure transducer. Piezoelectric transducers: Concept of piezoelectricity, use of piezoelectric transducer as ultrasonic generator and application of ultrasonic transducer for distance measurement, liquid and air velocity measurement. Ultrasonic Hc04	3

4. Suggested Experiments:

1. Determination of number of lines on the grating surface using LASER Source.
2. Determination of Numerical Aperture of an optical fibre.
3. Determination of wavelength using Diffraction grating. (Laser source)
4. Determination of angular divergence of laser beam.
5. Study of Hall Effect.
6. Determination of energy band gap of semiconductor.
7. Study of I-V characteristics of LED.
8. Determination of 'h' using Photocell.
9. Study of I-V characteristics of semiconductor photodiode and determination of its spectral response.
10. Study of I-V characteristics of a photovoltaic solar cell and finding the efficiency.
11. Design AND, OR, NOT, EXOR, EXNOR gates using Universal gates: NAND and NOR
12. Implement Half adder, Full adder, Half subtractor and Full subtractor circuits.
13. Verify the truth table of different types of flip flops.
14. Design asynchronous/synchronous MOD N counter using IC7490.
15. Zener Diode as a voltage regulator.

5. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 30 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 15 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

1. A text book of Engineering Physics-Avadhanulu & Kshirsagar, S. Chand
2. A textbook of Optics - N. Subramanyam and Brijlal, S.Chand
3. Fundamentals of optics by Jenkins and White, McGrawHill
4. Modern Engineering Physics – Vasudeva, S.Chand
5. Concepts of Modern Physics- ArtherBeiser, Tata McGraw Hill

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
FY106	Engineering Chemistry II	30	30	30	45	25	-	-	100

1. Course Objectives:

The course is aimed to:

1. With the knowledge of the basic chemistry, the student will be able to understand and explain scientifically the various chemistry related problems in the industry/engineering field.
2. The student will be able to understand the new developments and breakthroughs efficiently in engineering and technology.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. To recognize the electrochemical processes and apply the concepts in electrochemistry.
2. To develop knowledge on electrochemical energy storage systems considering the operation and design of various battery technologies.
3. To identify various polymeric materials and their applications in engineering.
4. To acquire theoretical background of types of nanomaterials and their applications.
5. To describe the theoretical background of spectroscopic techniques such as NMR, IR, UV spectroscopy.
6. To identify DNA as a genetic material in the molecular basis of information transfer

3. Detailed Theory Syllabus:

Module No	Module	Detailed Contents of Module	Hrs.
1	Engineering Electrochemistry	Prerequisite: Redox reaction, cell reaction, electrode and its type, salt bridge 1.1. Electrode potential, electrode reaction, derivation of Nernst equation for single electrode potential, numerical problems.. 1.2 Electrochemical cell -Weston standard Cadmium cell 1.3 Reference electrodes -Introduction, Construction, working of SHE, Calomel electrode.	3
2	Battery Technology	Prerequisite : Electrochemical Reactions, Cell potential, Electrochemical series 2.1 Introduction, classification – primary, secondary and reserve batteries. Characteristics – Capacity, Electricity storage density, energy efficiency, cycle life and shelf life. 2.2 Construction, working and applications of Ni – Cd rechargeable batteries 2.3 Lithium batteries - Introduction, construction, working and applications of Li-MnO ₂	5

		2.4 Fuel Cells: Introduction, classification of fuel cells, limitations & advantages of fuel cells, Construction of Hydrogen oxygen alkaline fuel cells. 2.5 Electrochemical Sensors	
3	Polymeric Materials	Prerequisite : Polymer, Monomer, Polymerization, Degree of polymerisation, Classification of Polymers, Mechanism of polymerisation. 3.1 Molecular weight of polymers: number average and weight average, numerical problems. , Polydispersity Index, 3.2 Polymer crystallinity - glass transition temperature and its significance 3.3 Thermoplastic & Thermosetting polymers-Characteristics 3.4 Preparation , properties and uses of PMMA, Urea-Formaldehyde, Phenol - formaldehyde 3.5 Conducting polymers – Types, Mechanism of conduction in polymers, Examples, and applications. 3.6 Polymer films in sensor applications.	5
4	Nanochemistry	Prerequisite: Concept of nano scale, definition of nanoparticles 4.1. Importance of nano size, Properties of nanomaterials – Size, optical properties, magnetic properties, electrical properties. 4.2 Nanoscale materials- fullerenes, nanotubes, nano wires, nanorods 4.3 Synthesis of Nano materials - Chemical vapor deposition (CVD) method and Laser Ablation Method 4.4 Application of Nanomaterials – for communication, data storage	5
5	Spectroscopic Techniques	Pre-requisites : Electromagnetic radiation, characteristics of electromagnetic radiation, electromagnetic spectrum. 5.1. Spectroscopy - Principle, Interaction of radiation with matter, Selection rules. 5.2 Types of spectroscopy,: IR, UV, NMR, Emission Spectroscopy, (Flame Photometry), 5.3 Fluorescence and Phosphorescence, Jablonski diagram 5.4 NMR and Magnetic Resonance Imaging	4
6	Biomolecules	Molecules of life – Cellulose, Amino acids , proteins, Nucleotides and DNA, DNA as genetic material, Concept of genetic code, Universality and degeneracy of genetic code. Molecular basis of Information transfer.	3

4. Suggested Experiments:

Software Requirements if any:.

1. Determination of Cell potential of Zn- Cu system
2. Molecular weight determination of polymers by Oswald Viscometer
3. Preparation of Urea Formaldehyde / phenol formaldehyde
4. Preparation of biodegradable polymer using corn starch or potato starch.
5. Preparation of Magnetic Nanoparticles.
6. Synthesis of Biodiesel
7. Determination of electrical conductivity of unknown solution.
8. Preparation of Hand Sanitizer using ethyl alcohol

9. Determination of Caffeine in Tea
10. Determination of pH using glass electrode.

5. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 30 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one hour.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
1. Question paper will consist of 3 questions, each carrying 15 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

- A. Term Work:** Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.
- B. Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

1. Engineering Chemistry – P.C.Jain and Monika Jain, Dhanpat Rai Publications
2. A Textbook of Engineering Chemistry, - Shashi Chawla (DhanpatRai publications)
3. A textbook of Engineering Chemistry - S.S. Dara, S. Chand Publishing House
4. Engineering Chemistry – O.G. Palanna , Tata Mc Graw Hill
5. Molecular Genetics – Stent G.S and Calendar, R.W.H Freeman and Company
6. Fundamentals of Molecular Spectroscopy – C.N . Banwell, Tata Mc Graw Hill
7. Instrumental methods of chemical analysis – B.K.Sharma, Goel Publishing House
8. “Nanomaterials: Synthesis, Properties and Applications”, A. S. Edelstein and R. C. Cammarata- Institute of Physics Pub., 2001

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total

		IA 1	IA 2	Average					
FY108	Engineering Mechanics and Graphics*	40	40	40	60	25	-	50	175

1. Course Objectives :

The course is aimed to:

1. To develop the capacity to predict the effects of force and motion and to acquaint the concept of static and dynamic equilibrium.
2. Ability to visualize physical configurations in terms of actual systems and its constraints, and able to formulate the mathematical function of the system.
3. To study, analyse and formulate the motion of moving particles/bodies.
4. To impart and inculcate proper understanding of the theory of projection.
5. To impart the knowledge of reading a drawing
6. To improve the visualization skill.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. To verify the law of moments and draw a Free Body Diagram and label the reactions on it.
2. To Determine the centroid and MI of plane lamina.
3. To apply equilibrium equations in statics.
4. To Apply the basic principles of projections in Projection of Lines
5. To Apply the basic principles of projections in reading and converting 3D view to 2D drawing.
6. To Visualize an object from the given two views.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Contents of Module	Hrs.
1	Coplanar and Non-Coplanar Force System and Resultant	Coplanar and Non-Coplanar Force System and Resultant: System of Coplanar Forces: Classification of force systems, Principle of transmissibility, composition and resolution of forces. Resultant: Resultant of coplanar and non-coplanar force systems (Concurrent forces, parallel forces and non-concurrent Non-parallel system of forces). Moment of force about a point, Couples, Varignon's Theorem. Force couple system. Distributed Forces in plane.	6
2	Equilibrium of System of Coplanar Forces and Beams	Equilibrium of System of Coplanar Forces and Beams: Conditions of equilibrium for concurrent forces, parallel forces and non-concurrent non- parallel general forces and Couples. Equilibrium of rigid bodies free body diagrams. Types of beams, simple and compound beams, type of	6

		supports and reaction. Determination of reactions at supports for various types of loads on beams. (Excluding problems on internal hinges)	
3	Kinematics of Particle	Kinematics of Particle: Motion of particle with variable acceleration. General curvilinear motion. Tangential & Normal component of acceleration, Application of concepts of projectile motion and related numerical.	6
4	Projection of Points and Lines	Projection of Points and Lines: Lines inclined to both the Reference Planes (Excluding Traces of lines) and simple application-based problems on Projection of lines.	6
5	Orthographic and Sectional Orthographic Projections	Orthographic and Sectional Orthographic Projections: Fundamentals of orthographic projections. Different views of a simple machine part as per the first angle projection method recommended by I.S. Full or Half Sectional views of the Simple Machine parts.	6
6	Isometric Views	Isometric Views: Principles of Isometric projection – Isometric Scale, Isometric Views, Conversion of Orthographic Views to Isometric Views (Excluding Sphere).	6

4. Suggested Experiments:

Hardware Requirements: Pentium / Windows

Software Requirements: Autocad

Minimum three experiments from the following list (1-4) of which minimum one should from dynamics.

1. Verification of Polygon law of coplanar forces
2. Verification of Principle of Moments (Bell crank lever.)
3. Determination of support reactions of a Simply Supported Beam.
4. Kinematics of particles. (Uniform motion of a particle, Projectile motion, motion under gravity)
5. One sheet on Orthographic projection. (minimum 2 problem)
6. One sheet on Sectional Orthographic projection. (minimum 2 problem)
7. One sheet on Isometric drawing. (minimum 2 problems)

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

FY113	Java Programming	40	40	40	60	25	25	-	125

1. Course Objectives :

The course is aimed to:

1. To learn the basic concepts of object-oriented programming
2. To understand the importance of Classes & objects along with constructors
3. To study and understand Arrays, Strings and vectors
4. To study various concepts of JAVA programming like multithreading, exception Handling, packages, etc.
5. To explain components of GUI based programming.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. To apply fundamental programming constructs
2. To illustrate the concept of packages, classes and objects.
3. To elaborate the concept of strings, arrays and vectors
4. To implement the concept of inheritance and interfaces
5. To implement the concept of exception handling and multithreading
6. To develop GUI based application

3. Detailed Theory Syllabus:

Prerequisite: Basics of Computer Programming

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction to Object Oriented Programming	Overview of procedure and object oriented Programming, Introduction to the principles of object oriented programming: Classes, Objects, Abstraction, Encapsulation, Inheritance, Polymorphism, Message passing Features of Java Language , JDK, JRE , keywords, Data types, Variables, Operators, Expressions, Types of variables and methods. Control Statements: If Statement, If-else, Nested if, switch Statement, break, continue. Iteration Statements: for loop, while loop, and do- while loop	08

2	Class, Object, Packages and Input/output	Classes & Objects: Reference Variables, Passing parameters to Methods and Returning parameters from the methods, Static members, Non-Static members, Method overloading, Recursive method Constructors: Types of Constructors, chaining of constructor, finalize() Method, Constructors Overloading. Packages in java, types, user defined packages Defining packages, creating packages and Importing and accessing packages Input and output functions in Java, Command Line Arguments, Scanner class	08
3	Array, String and Vector	Array, Strings, String Buffer class, Wrapper classes, Vectors	03
4	Inheritance, Abstract Class and Interfaces	Inheritance: Inheritance Basics, Types of Inheritance in Java, member access, using Super- to call superclass Constructor, to access member of super class(variables and methods), creating multilevel hierarchy, Constructors in inheritance, method overriding, Abstract classes and methods, using final, Dynamic Method Dispatch Interfaces: Defining, implementing and extending interfaces, variables in interfaces, Default Method in Interface, Static Method in interface, Abstract Classes vs Interfaces.	08
5	Exception handling and Multithreading	Exception Handling: Exception Handling Fundamentals, Exception Types, Exception class Hierarchy, Using try and catch, Multiple catch Clauses, Nested try Statements, throw, throws, finally, Java's Built-in Exceptions, Creating Your Own Exception Subclasses Multithreaded Programming: The Java Thread Model and Thread Life Cycle, Thread Priorities, creating a Thread, Implementing Runnable, Extending Thread, Creating Multiple Threads, Synchronization: Using Synchronized Methods, The synchronized Statement	05
6	GUI programming in JAVA	Designing Graphical User Interfaces in Java: Components and Containers, Basics of Components, Using Containers, Layout Managers, AWT Components Event-Driven Programming in Java: Event-Handling Process, Event-Handling Mechanism, Event Listeners Introducing Swing: AWT vs Swings, Components and Containers, Swing Packages, A Simple Swing Application, Painting in Swing, Designing Swing GUI Application using Buttons, JLabels, Checkboxes, Radio Buttons, JScrollPane, JList, JComboBox, etc. Introduction to JDBC: Introduction to JDBC, JDBC-ODBC connectivity, JDBC architecture.	08

4. Suggested Experiments:

Hardware & Software Requirements:

Hardware Requirements	Software Requirements	Other Requirements
PC With Following Configuration: 1. Intel PIV Processor 2. 2 GB RAM 3. 500 GB Hard disk 4. Network interface card	1. Windows or Linux Desktop OS 2. JDK 1.8 or higher 3. Notepad ++ 4. JAVA IDEs like Netbeans or Eclipse	1. Internet Connection for installing additional packages if required

1. Programs on Basic programming constructs like branching and looping
2. Programs on Basic programming constructs like branching and looping
3. Programs on class and objects
4. Program on method and constructor overloading.
5. Program on Packages
6. Program on 2D array, strings functions
7. Program on StringBuffer and Vectors
8. Program on types of inheritance
9. Program on Multiple Inheritance
10. Program on abstract class and abstract methods
11. Program using super and final keyword
12. Program on Exception handling
13. Program on user defined exception
14. Program on Multithreading
15. Program to create GUI application
16. Mini Project based on the content of the syllabus (Group of 3-4 students)

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 30 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 15 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

A. Books:

1. Herbert Schildt, "Java-The Complete Reference", Tenth Edition, Oracle Press, Tata McGraw Hill Education.

2. E. Balguruswamy, “Programming with Java A primer”, Fifth edition, Tata McGraw Hill Publication
3. Anita Seth, B.L.Juneja, “Java One Step Ahead”, Oxford university press.

B. References:

1. D.T. Editorial Services, “Java 8 Programming Black Book”, Dreamtech Press.
2. Learn to Master Java by Star EDU Solutions
3. Yashvant Kanetkar, “Let Us Java” ,4th Edition ,BPB Publication

AY 2022-23

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
FY114	Professional communication and Ethics I	Contact Hours	2	2	-	4
		Credits	2	1	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
FY114	Professional communication and Ethics I	20	20	20	30	25	-	-	75

1. Course Objectives:

The course is aimed to:

1. To understand, compare and demonstrate the importance and relevance of communication with specific emphasis on listening skill.
2. To promote practice in speaking skill and encourage learners to compose on the spot speeches for the purpose of developing and generating ideas.
3. To train learners in reading strategies that will enhance their global understanding of the text and help them to comprehend academic and business correspondence.
4. To illustrate effective writing skills in business, academic and technical areas.
5. To inculcate confident personality traits with grooming and social etiquette.
6. To train learners in producing words on the basis of contextual cues and reflect on errors in sentences.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Listen, comprehend and identify potential barriers in spoken discourse with ease and accuracy.
2. Develop confidence and fluency in speaking at social, academic and business situations as well as make effective professional presentations.
3. Implement reading strategies for systematic, logical understanding, that will enhance the skill of comprehension, summarisation and evaluation of texts.
4. Understand and demonstrate effective writing skills in drafting academic, business and technical documents.
5. Communicate effectively in academic as well as business settings, displaying refined grooming and social skills.
6. Anticipate the meaning of unfamiliar words with the help of contextual cues and construct grammatically correct sentences.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Contents of Module	Hrs.
1	The Importance and Strategies of Effective Listening	The Importance and Strategies of Effective Listening Prerequisite: Able to listen, read, speak, write and comprehend the target language Introduction to communication 1.1 Importance and relevance of communication 1.2 Listening skill	4

		- Ability to discriminate stress and intonation - Comprehend meaning of audio text-graded on the basis of vocabulary, sentence construction and theme. -potential barriers	
2	Developing Speaking Skills	Developing Speaking Skills 2.1 Intensive Speaking- on the spot topics 2.2 Responsive speaking-answering a question 2.3 Interactive speaking-conversations 2.4 Extensive speaking-speech, oral presentations-specific emphasis on plagiarism check and generating the report	4
3	Strategies and Techniques to build Reading Skill	Strategies and Techniques to build Reading Skill 3.1 Global understanding of the text- inference, anticipation and deduction 3.2 Detailed understanding of text-scanning for specific information (special emphasis on reading comprehension exercises and summarisation)	2
4	Developing Professional Writing Skills	Developing Professional Writing Skills 4.1 Effective introduction with emphasis on general statement, opposing statement and thesis statement 4.2 Critical response to a text with special reference to purpose, evaluation of the content, theme and style of a text 4.3 Organization of ideas, sentence construction and word choice, grammar and usage 4.4 Explanation and support of ideas (special reference to writing paragraphs and business letters- Sales and complain letters}	4
5	Etiquette and Grooming for Personality Development	Etiquette and Grooming for Personality Development 5.1 Social Etiquette 5.2 Corporate etiquette 5.3 Confidence building and Personality development	1
6	Vocabulary and Grammar	Vocabulary and Grammar 6.1 Contextual vocabulary Development- Word Maps 6.2 Identifying errors in a sentence.	1

4. Suggested Experiments:

- Written record of listening activities-Listening practice tasks of 3 types (through audio recordings of (1) Monologues (2) Dialogues (3) Formal/Expert Talk or Lecture)
- Transcription of the public speech along with a plagiarism report-Practice public speech
- Summarization through graphic organisers (1. Text to graphic organizer 2. Graphic organizer to text)
- a. Case studies on critical thinking b. business letters in complete block format
- Documentation of case studies/Role play based on Module 5
- a. Contextual Vocabulary Development b. Aptitude Test

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 20 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

- Question paper will consist of 5 questions, each carrying 10 marks.

2. Total 3 questions need to be solved.
3. Q.1 will be compulsory, based on the entire syllabus.
4. Remaining questions will be randomly selected from all the modules.
5. Weightage of marks should be proportional to number of hours assigned to each module.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
FY118	Basic Workshop Practice-II	-	-	-	-	50	-	-	50

1. Course Objectives:

The course is aimed to:

1. To impart training to help the students develop engineering skill sets.
2. To inculcate respect for physical work and hard labor.
3. To get exposure to interdisciplinary engineering domain.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

2. Develop the necessary skill required to handle/use different carpentry tools.
3. Identify and understand the safe practices to adopt in electrical environment.
4. Demonstrate the wiring practices for the connection of simple electrical load/ equipment.
4. Design, fabricate and assemble pcb.
5. Develop the necessary skill required to handle/use different masons tools.
6. Develop the necessary skill required to use different sheet metal and brazing tools.
7. Able to demonstrate the operation, forging with the help of a simple job.

3. Detailed Theory Syllabus:

Note:

Trade 1 and 2 are compulsory. Select any ONE trade topics out of the topic trade 3 to 5. Demonstrations and hands on experience to be provided during the periods allotted for the same. Report on the demonstration including suitable sketches is also to be included in the term work

CO-1 is related to Trade-1

CO-2 to CO-4 is related to Trade-2 CO-5 is related to Trade-3

CO-6 is related to Trade-4 CO-7 is related to Trade-5

CO evaluation is to be done according to the opted Trades in addition to Compulsory Trades.

Module No	Module	Detailed Contents of Module	Hrs.
1	Trade-1 Carpentry	Carpentry (Compulsory) Use and setting of hand tools like hacksaws, jack planes, chisels and gauges for construction of various joints, wood tuning and modern wood turning methods. Term work to include one carpentry job involving a joint and report on demonstration of a job involving wood turning	10
2	Trade-2 Basic Electrical work shop	Basic Electrical work shop:(Compulsory): Single phase and three phase wiring. Familiarization. of protection switchgears and their ratings (fuse, MCB, ELCB).	8

		Wiring standards, Electrical safety in the work place safe work practices. Protective equipment, measures and tools. Layout drawing, layout transfer to PCB, etching and drilling and soldering technique	
3	Trade-3 Masonry	Masonry: Use of masons tools like trowels, hammer, spirit level, square, plumb line and pins etc. demonstration of mortar making, single and one and half brick masonry , English and Flemish bonds, block masonry, pointing and plastering.	6
4	Trade-4 Sheet metal working and Brazing	Sheet metal working and Brazing: Use of sheet metal, working hand tools, cutting , bending , spot welding.	6
5	Trade-5 Forging (Smithy)	Forging (Smithy): At least one forging job to be demonstrated and a simple job to be made for Term Work in a group of 4 students	6

4. Practical Assessment: The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 50 Marks (Total marks) = 30 Marks (Experiment) + 10 Marks (Assignments) + 10 Marks (Attendance)

**BACHELOR OF TECHNOLOGY
IN
COMPUTER ENGINEERING**

(Semester III)

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 201	Engineering Mathematics III	Contact Hours	3	-	1	4
		Credits	3	-	1	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 201	Engineering Mathematics III	40	40	40	60	25	-	-	125

1. Course Objectives:

The course is aimed to:

1. Learn the Laplace Transform, Inverse Laplace Transform of various functions, its applications
2. Understand the concept of Fourier Series, its complex form and enhance the problem-solving skills.
3. Understand Matrix algebra for engineering problems
4. Understand the concept of complex variables, C-R equations with applications.
5. Understand the concept of Relation and function
6. Understand the concept of coding theory

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Apply the concept of Laplace transform and its application to solve the real integrals, understand the concept of inverse Laplace transform of various functions and its applications in engineering problems.
2. Expand the periodic function by using the Fourier series for real-life problems and complex engineering problems.
3. Apply the concepts of eigenvalues and eigenvectors in engineering problems.
4. Apply complex variable theory, application of harmonic conjugate to get orthogonal trajectories and analytic functions.
5. Apply the concept of relation and function
6. Use groups and codes in Encoding-Decoding

3. Detailed Theory Syllabus:

Prerequisite: Engineering Mathematics I, Engineering Mathematics-II

Sr. No.	Module	Detailed Contents of Module	Hrs.
1	Laplace Transform	Definition of Laplace transform and Laplace transform of standard functions, Properties of Laplace Transform: Linearity, First Shifting Theorem, change of scale Property, multiplication by t, Division by t, (Properties without proof). Inverse of Laplace Transform by partial fraction and convolution theorem.	7
2	Fourier Series , Fourier Transform	Fourier series of periodic functions with period 2π , Fourier series for even and odd functions, Half range sine and cosine Fourier series, Orthogonal and Ortho-normal functions, Fourier Transform.	6

3	Linear Algebra, Matrix Theory	Eigenvalues and eigenvectors, Diagonalization of matrices; Cayley-Hamilton Theorem, Functions of square matrix, Singular Value Decomposition	7
4	Complex Variables and conformal mappings	Function $f(z)$ of complex variable, Analytic function: Necessary and sufficient conditions for $f(z)$ to be analytic, Cauchy-Riemann equations in Cartesian coordinates, Milne-Thomson method: Determine analytic function $f(z)$ when real part (u), imaginary part (v) is given, Conformal mapping, Linear and Bilinear mappings, cross ratio	6
5	Relations and Functions	Partition of A Set, Relation, Diagram of A Relation, Matrix of A Relation, Digraph of A Relation, Types of Relation, Equivalence Relation, Relation of the Path, Operations on Relations, Closures, Warshall's Algorithm,	7
6	Algebraic Structures, coding theory	Properties of Binary Operations,, Group, Ring, Group Code, Decoding and Error Correction, Maximum Likelihood Technique, parity-check matrix.	6

4. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hours.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

5. Tutorial Assessment: The final certification and acceptance of TW ensures the satisfactory performance of tutorials and minimum passing in the TW.

- A. Term Work:** Batch wise tutorials have to be conducted. Students must be encouraged to write at least 6 class tutorials on the entire syllabus. Also Term Work Journal must include at least 2 assignments based on topics mentioned in the syllabus.
- B. Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Class Tutorials on entire syllabus) + 5 Marks (Assignments on entire syllabus) + 5 Marks (Attendance)

6. Books and References:

		IA 1	IA 2	Average					
CE 202	Data Structures	40	40	40	60	25	25	--	150

1. Course Objectives:

The course is aimed to:

1. To understand the need and significance of Data structures as a computer Professional.
2. To teach concept and implementation of linear and nonlinear data structures.
3. To analyse various data structures and select the appropriate one to solve a specific real-world problem.
4. To introduce various techniques for representation of the data in the real world.
5. To teach various searching techniques.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Students will be able to implement linear and Non-Linear data structures.
2. Students will be able to handle various operations like searching, insertion, deletion and traversals on various data structures.
3. Students will be able to explain various data structures, related terminologies and its types.
4. Students will be able to choose appropriate data structure and apply it to solve problems in various domains.
5. Students will be able to analyse and Implement appropriate searching techniques for a given problem.
6. Students will be able to demonstrate the ability to analyse, design, apply and use data structures to solve engineering problems and evaluate their solutions.

3. Detailed Theory Syllabus:

Prerequisite: Knowledge of C programming language

Sr. No.	Module	Detailed Contents of Module	Hrs
1	Introduction to Data Structures	Introduction to Data Structures, Concept of ADT, Types of Data Structures - Linear and Nonlinear, Operations on Data Structures.	3
2	Linear Data Structures - Stack, Queue	Introduction to Stack : LIFO structure, ADT of Stack , Operations on Stack : Create, POP, PUSH, delete stack, Array Implementation of Stack: Create, POP, PUSH, PEEK, Display, delete stack, Applications of Stack: Well form-ness of Parenthesis, Infix to Postfix Conversion and Postfix Evaluation, Recursion. Introduction to Queue : FIFO structure, ADT of Queue, Operations on Queue : Create, ENQUEUE, DEQUEUE, delete Queue, Array Implementation of Queue : Create, ENQUEUE, DEQUEUE, PEEK, Display, delete Queue, Types of Queue - Circular Queue, Priority Queue, Applications of Queue.	10

3	Linear Data Structures - Linked List	Introduction, Representation of Linked List, Linked List v/s Array, Types of Linked List - Singly Linked List, Circular Linked List, Doubly Linked List, Operations on Singly Linked List and Doubly Linked List: Create List, Insert Node (empty list, beginning, Middle, end), Delete node (First, general case), Search List, Retrieve Node, Print List, Stack and Queue using Singly Linked List, Singly Linked List Application - Polynomial Representation and Addition.	10
4	Non Linear Data Structures - Trees	Introduction, Tree Terminologies, Binary Tree, Binary Tree Representation, Types of Binary Tree, Binary Tree Traversals, Binary Search Trees, Operations on Binary Search Tree, AVL tree : inserting, Searching, traversing and rotation: RR, LL, RL, LR in AVL tree, Expression Trees : Construction, Infix, Prefix, Postfix Traversals, heaps : Structure, – Reheap Up, Reheap Down, Build heap, Insert, Delete	9
5	Non Linear Data Structures - Graphs	Introduction, Graph Terminologies, Representation of Graph : Adjacency Matrix, Adjacency List, Operations : Add vertex, Delete vertex, Add Edge, Delete Edge, Find vertex, Graph Traversals - Depth First Search (DFS) and Breadth First Search (BFS)	4
6	Searching Techniques and Hashing	Linear Search, Binary Search, random search, Hashing - Concept, Hash Functions, Address calculation techniques, Common hashing functions, Collision resolution Techniques: Separate Chaining, Open Addressing (Linear probing, Quadratic, Double hashing).	4

4. Suggested Experiments:

1. Implement Stack ADT using array.
2. Convert an Infix expression to Postfix expression using stack ADT.
3. Evaluate Postfix Expression using Stack ADT.
4. Implement Linear Queue ADT using array.
5. Implement Circular Queue ADT using array.
6. Implement Singly Linked List ADT.
7. Implement Circular Linked List ADT.
8. Implement Stack / Linear Queue ADT using Linked List.
9. Implement Binary Search Tree ADT using Linked List.
10. Implement Graph Traversal techniques : a) Depth First Search b) Breadth First Search

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: A Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

- A. Term Work:** Term Work shall consist of 10 practical based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

		IA 1	IA 2	Averag e					
CE 203	Computer Graphics and Virtual Reality	40	40	40	60	25	----	25	150

1. Course Objectives:

The course is aimed to:

1. To introduce the use of the components of a graphics system and become familiar with building the approach of graphics system components and algorithms related to them.
2. To learn the basic principles of 3-dimensional computer graphics.
3. Provide an understanding of how to scan convert the basic geometrical primitives, how to transform the shapes to fit them as per the picture definition.
4. Provide an understanding of mapping from a world coordinates to device coordinates, clipping, and projections.
5. To be able to discuss the application of computer graphics concepts in the development of computer games, information visualization, and business applications.
6. To comprehend and analyse the fundamentals of augmented reality, Virtual reality, underlying technologies, principles, and applications.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. To list the basic concepts used in computer graphics.
2. To implement various algorithms to scan, convert the basic geometrical primitives, transformations, Area filling, clipping.
3. To describe the importance of viewing and projections.
4. To define the fundamentals of augmented virtual reality and its related technologies.
5. To understand a typical graphics pipeline
6. To design an application with the principles of virtual reality and augmented reality

3. Detailed Theory Syllabus:

Prerequisite: Knowledge of Mathematics

Sr. No.	Module	Detailed Contents of Module	Hrs
1	Introduction to Computer graphics and Output primitives	Introduction: Display Devices, Bitmap and Vector based graphics, Overview of Coordinate System. Introduction to OpenGL: Scan Conversion of: point, line using Digital differential analyzer & Bresenham's algorithm, circle using midpoint approach, Curve Generation: Bezier and B-Spline curves. Introduction to fractals: generation procedure, classification, dimension and Koch Curve.	7
2	Area Filling, Transformations (2D and 3D)	Area filling: Inside/Outside Test, Scan line Polygon Fill Algorithm, Boundary Fill and Flood Fill algorithm. Basic Geometrical 2D Transformations: Translation, Rotation, Scaling,	7

		Reflection, Shear, their homogeneous Matrix representation and Composite transformation. Three Dimensional transformations: Translation, Scaling, Rotations, Composite.	
3	Viewing (2D and 3D) and Clipping, Projection	Viewing: Introduction, Viewing Pipeline, Window to viewport transformation. Clipping: Point clipping, Line clipping: Cohen Sutherland Algorithm, Liang Barsky algorithms, Polygon clipping: Sutherland Hodgeman polygon clipping and Weiler Atherton. Text Clipping. Projections: Parallel (Oblique and orthographic), perspective (one, two and three Point) with matrix representation.	7
4	Introduction to Virtual Reality	Virtual Reality: Basic Concepts, Overview and perspective on virtual reality, Human sensation and perception. Classical Components of VR System, Types of VR Systems, Navigation and Manipulation Interfaces, Gesture Interfaces, Input Devices, Graphical Display. Graphical Rendering Pipeline, Haptic Rendering Pipeline, Applications of Virtual Reality.	6
5	VR Modeling and Programming	Geometric Modeling: Virtual Object Shape, Object Visual Appearance. Kinematics Modeling: Object Position, Transformation Invariants, Object Hierarchies, Physical Modeling: Collision Detection, Surface Deformation, Force Computation. Behavior Modeling. Programming through VRML: VRML Browsers, Java 3D, OpenCV for augmented reality.	6
6	Augmented and Mixed Reality	Technology and features of augmented reality, Difference between AR and VR, Mixed reality. Challenges with AR, Augmented reality methods, visualization techniques for augmented reality	4

4. Suggested Experiments:

1. Implement DDA Line Drawing algorithm
2. Implement midpoint Circle algorithm.
3. Implement Area Filling Algorithm: Boundary Fill, Flood Fill.
4. Implement Curve: Bezier for n control points
5. Character Generation: Bit Map method or Stroke Method
6. Implement 2D Transformations: Translation, Scaling, Rotation
7. Implement Line Clipping Algorithm: Cohen Sutherland
8. Implement polygon clipping algorithm : Sutherland Hodgeman
9. Perform projection of a 3D object on Projection Plane
10. Perform Animation (Use multiple objects)
11. Create interactive application(games)
12. Design VR system for real time requirement (e.g. car driving simulator for driving learners)

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)

4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW. Mini Project to be performed using C /C++/OpenGL/Blender/ any other tool (2/3 students per group), possible Ideas: Game development with audio, Graphics editor: Like Paint brush, Text editor etc.

A. Term Work: Term Work shall consist of 10 practical based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: Total 25 Marks (Experiments: 10-marks, Attendance Theory & Practical: 05-marks, Assignments: 05-marks, Mini Project: 5-marks)

7. Books and References:

A. Books:

1. Donald Hearn and M. Pauline Baker, "Computer Graphics", Pearson Education.
2. R. K Maurya, "Computer Graphics with Virtual Reality", Wiley India.

B. References:

1. Grigore Burdea, Philippe Coiffet, "Virtual Reality Technology", Wiley.
2. Steven Harrington, "Computer Graphics", McGraw Hill.
3. Rogers, "Procedural Elements of Computer Graphics", Tata McGraw Hill.
4. Vince, "Virtual Reality Systems", Pearson Education.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 204	Digital Logic and Computer Architecture	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 204	Digital Logic and Computer Architecture	40	40	40	60	25	—	25	150

1. Course Objectives:

The course is aimed to:

1. To study basic computer structure and compare computer architecture models
2. To discuss operation of the arithmetic logic unit for the algorithms & implementation of integer arithmetic.
3. To have an understanding of processor organization.
4. To study the characteristics of memory systems including internal and cache memories.
5. To study the different ways of communicating with I/O devices and standard I/O interfaces.
6. To study the different parallel processing concepts and pipelines.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Understand the basic computer architectures
2. Demonstrate ALU arithmetic algorithms for different operations.
3. Understand different Processor Organization concepts
4. Understand memory hierarchy and organization with different types of memories
5. Identify various types of buses, interrupts and I/O operations in a computer system
6. Describe Parallel processing and Pipeline concepts

3. Detailed Theory Syllabus:

Sr. No.	Module	Detailed Contents of Module	Hrs
1	Overview of Computer Architecture and Organization	Introduction of Computer Organization and Architecture, Basic organization of computer and block level description of the functional units, Evolution of x86 Computers, Von Neumann model, Harvard Model, Embedded system .Performance Issues: Designing for performance, Amdahl's Law.	6
2	Computer Arithmetic Algorithms	Number representation: 1's and 2's complement representation. Binary Arithmetic: Addition, Subtraction, Multiplication, Division using 2's complement, BCD and Hex Arithmetic Operation. Addition, Subtraction Multiplication using Booth's algorithm, Division using Restoring and non-restoring division algorithms. IEEE 754 floating point number representation.	9

3	Processor Organization	CPU Architecture, Register Organization, Instruction formats, Basic instruction cycle. Addressing modes. Control Unit: hardwired control unit and its design methods, Soft wired (Micro-programmed) control unit design.	7
4	Memory Organization	Introduction to Memory, Memory Hierarchy, Characteristics of memory systems, Internal Memory: Types of RAM and ROM Cache Memory: Design Principles, Memory mappings, Replacement Algorithms, Cache Coherence. Interleaved and Associative Memory.	8
5	Input/ Output	Input/output systems, I/O module, Types of data transfer techniques: Programmed I/O, Interrupt driven I/O and DMA. Introduction to buses: Bus structure, Bus Contention, Bus Arbitration and its types	4
6	Advanced Processors	Parallel Architecture: Classification of Parallel Systems, Flynn's Taxonomy, Instruction Pipelining- Pipelining Strategy, Pipeline Performance, Pipeline Hazards, Dealing with Branches, Introduction to Multiprocessor Systems, Multi-Core Computers	4

4. Suggested Experiments:

1. Verify the truth table of various logic gates using ICs / virtual lab
2. Realize the gates using universal gates
3. Code conversion
4. Realize half adder and full adder
5. Binary addition, subtraction, Booth's Algorithm, Restoring and Non restoring Division, IEEE representation
6. Computer Components- Memory, Ports, Motherboard and add-on cards
7. Assembling and Dismantling and PC
8. ALU Design, CPU Design
9. Memory design, Cache Memory design
10. Case study on buses like ISA, PCI, USB etc
11. Case Study on multi-core Processors

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of 10 practical based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

A. Books:

1. R. P. Jain, "Modern Digital Electronic", McGraw-Hill Publication, 4th Edition.
2. William Stalling, "Computer Organization and Architecture: Designing and Performance", Pearson Publication 10TH Edition.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 205	Database Management Systems	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 205	Database Management Svstem	40	40	40	60	25	--	25	150

1. Course Objectives:

The course is aimed to:

1. Identify the need of a database management system.
2. Develop entity relationship data model and its mapping to relational model.
3. To give a foundation on Relational Model of data and usage of relational Algebra.
4. To introduce the concepts of SQL queries.
5. Demonstrate Design Approach of Database through Normalization.
6. Understand the concept of transaction, concurrency control and recovery techniques.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Recognize the need of database management systems.
2. Design ER and EER diagram for real life applications
3. Construct relational models and write relational algebra queries.
4. Retrieve information from the database by formulating SQL queries, procedure cursor using PL/SQL.
5. Apply the concept of normalization to relational database design.
6. Describe the concept of transaction management.

3. Detailed Theory Syllabus:

Prerequisite : Basic knowledge of file system, any programming language

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction to Database Concepts	Introduction, Characteristics of databases, File system v/s Database system, Data abstraction and data Independence, Schemas and Instance, Users of Database System, Three level schema Architecture, Database Administrator.	4
2	Entity-Relationship Data Model	Introduction to Data Models, Entity The Entity-Relationship (ER) Model, Entity, Entity Set, Strong and weak entity, Types of Attributes, Keys, Relationship constraints: Cardinality and Participation, Extended Entity-Relationship (EER) Model: Generalization, Specialization and Aggregation.	7
3	Relational Model and relational Algebra	Introduction to the Relational Model, Mapping the ER and EER Model to the Relational Model, Relational schema Design, Introduction to Relational Algebra, Relational algebra-operators, Relational Algebra Queries.	7

4	Structured Query Language (SQL)	Overview of SQL, Data Definition Language Commands, Integrity constraints: key constraints, Domain Constraints, Referential integrity, check constraints, Data Manipulation commands, Data Control commands, Set and string operations, aggregate function-group by, having, Views in SQL, joins, Nested and complex queries, Triggers(ECA Model), Security and Authorization in SQL. Introduction to PL/SQL, Procedure, Cursor.	12
5	Relational-Database Design	Decomposition, Functional Dependency Concept of normalization, First Normal Form, 2NF, 3NF, BCNF.	5
6	Introduction to Transactions Management	Transaction concept, Transaction states, ACID properties, Transaction Control Commands, Concurrent Executions, Serializability-Conflict and View.	4

4. Suggested Experiments:

Software Requirements if any: DBMS like Postgresql, Oracle.

1. Identify the case study and detailed statement of the problem. Design an Entity-Relationship (ER) / Extended Entity-Relationship (EER) Model.
2. Mapping ER/EER to Relational schema model.
3. Create a database using Data Definition Language (DDL) and apply integrity constraints for the specified System.
4. Apply DML Commands for the specified system.
5. Perform Simple queries, string manipulation operations and aggregate functions.
6. Implement various Join operations.
7. Perform Nested and Complex queries.
8. Perform DCL and TCL commands.
9. Implementation of procedure cursor.
10. Implementation of Views and Triggers.
11. Implementation and demonstration of Transaction

5. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hour.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
 1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on the maximum contents of the syllabus.
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3).
 4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

- A. Term Work:** Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.
- B. Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance).

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 206	Human Values and Social Ethics	Contact Hours	2	-	-	2
		Credits	2	-	-	2

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 206	Human Values and Social Ethics	-	-	-	-	50	-	-	50

1. Course Objectives :

The course is aimed to:

1. To enable learners to understand the core values that shape the ethical behaviour of a professional.
2. To develop an awareness of the different ethical dilemmas at the workplace and society.
3. To inculcate the ethical code of conduct in writing technical articles and technology development.
4. To internalize ethical principles and code of conduct of a good human being at home, society and at work place.

2. Course Outcomes :

On successful completion of course learner/student will be able to:

1. Learners will be able to recognize the relation between ethics and values pertinent for an engineering professional.
2. Learners will be able to exercise the responsibility for establishing fair and just processes for participation and group decision making
3. Learners will be able to demonstrate an awareness of self-held beliefs and values and how they are altered in interactions with others.
4. Learners will be able to acquire the writing skills necessary to analyse data from research and attribute the source with proper citation.
5. Learners will be competent to incorporate values and ethical principles in social and professional situations.
6. Learners will be able to evaluate technology development and its application on the basis of moral issues and individual rights.

3. Detailed Theory Syllabus:

Prerequisite: Should have respect for justice and be able to reflect on one's personal beliefs and values.

Sr. No.	Module	Detailed Contents of Module	Hrs
1	Ethics and Values	Meaning & Concept of Ethics Difference between Ethics and Values Ethical code of conduct	3
2	Professional Ethics	Professional Ethics vs Personal ethics Components of professional ethics Professional values and its importance	5

3	Ethics and Society	Relevance of values and ethics in social work Ethical dilemmas Values and ethical principles of social work - Service - Dignity and worth of a person - Importance of Human relationships - Integrity - Competence - Social Justice	5
4	Ethics in Technical writing	Documenting sources Presentation of Information Ethics & Plagiarism	5
5	Ethics and Technology Development	Risk management and Individual rights Moral issues in development and application of technology Privacy/ confidentiality of information Managing Technology to ensure fair practices	6

4. Assessment:

Term Work : 50 marks (Continuous Evaluation)

Activities based on the ethics could be created based on the content of the syllabus (Debates, Presentations, Group Discussions)

The evaluation can be based on the activities

Quiz on various professional ethics can be conducted.

5. Books and References:

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 207	Python Programming Lab	-	-	-	-	50	25	--	75

1. Lab Objectives:

The lab is aimed to:

1. Basics of python including data types, operator, conditional statements, looping statements input and output functions in Python
2. List, tuple, set, dictionary, string, array
3. Functions, Concepts of modules, packages
4. Object Oriented Programming concepts in python
5. Concept of exception handling and File handling operations
6. Graphical User Interface and SQLite Database

2. Lab Outcomes:

On successful completion of lab learner/student will be able to:

1. To understand the structure, syntax of the Python language
2. To interpret varied data types in python
3. To implement functions, modules and packages
4. To illustrate the concepts of object-oriented programming as used in Python
5. To raise and handle exceptions through exception handling mechanisms and to implement File handling programs
6. To gain proficiency in creating GUI applications and implement database connectivity in python

3. Detailed Theory Syllabus:

Prerequisite: Programming Language (C/Java), Python IDE installation and environment setup.

Sr. No.	Module	Detailed Contents of Module	Hrs
1	Basics of Python	Introduction, Features, Python building blocks – Identifiers, Keywords, Indention, Variables and Comments, Basic data types (Numeric, Boolean, Compound) Operators: Arithmetic, comparison, relational, assignment, logical, bitwise, membership, identity operators, operator precedence, Control flow statements: Conditional statements (if, if...else, nested if), Looping in Python (while loop, for loop, nested loops), Loop manipulation using continue, pass, break, Input/output Functions,.	06
2	Data types	Lists: a) Defining lists, accessing values in list, deleting values in list, updating lists b) Basic list operations c) Built-in list functions.	10

		Tuples: a) Accessing values in Tuples, deleting values in Tuples, and updating Tuples b) Basic Tuple operations c) Built-in Tuple functions. Dictionaries: a) Accessing values in Dictionary, deleting values in Dictionary, and updating Dictionary b) Basic Dictionary operations c) Built-in Dictionary functions Sets: a) Accessing values in Set, deleting values in Set, updating Sets b) Basic Set operations, c) Built-in Set functions Strings: a) String initialization, Indexing, Slicing, Concatenation, Membership & Immutability b) Built-in String functions Arrays: a) Working with Single dimensional Arrays: Creating, importing, Indexing, Slicing, copying and processing array arrays. b) Working with Multi-dimensional Arrays using Numpy: Mathematical operations, Matrix operations, aggregate and other Built-in functions	
3	Functions, modules and packages	Functions: a) Built-in functions in python b) Defining function, calling function, returning values, types of parameters c) Nested and Recursive functions d) Anonymous Functions (Lambda, Map, Reduce, Filter) e) List Comprehension Modules: Writing modules, importing objects from modules, Python built-in modules (e.g. Numeric and Mathematical module, Functional Programming module, Regular Expression module), Namespace and Scoping. Decorators, Iterators and Generators. Packages: creating user defined packages and importing packages.	08
4	Object Oriented Programming	Overview of Object-oriented programming, Creating Classes and Objects, Self-Variable, Constructors, Inner class, Static method, Namespaces. Inheritance: Types of Inheritance (Single, Multiple, Multi-level, Hierarchical), Super() method, Constructors in inheritance, operator overloading, Method overloading, Method overriding, Abstract class, Abstract method, Interfaces in Python.	03
5	Exception handling and File Handling	Exception handling: Compile time errors, Runtime errors, exceptions, types of exception, try, block, except block, final block, raise statement, Assert statement, User-Defined Exceptions. Debugging: Programming Challenges, Classes of Tests, Bugs, Debugging, Debugging Examples– Assertions and Exceptions File Handling: Opening file in different modes, closing a file, Writing to a file, accessing file contents using standard library functions, Reading from a file – read(), readline(), readlines(), Renaming and Deleting a file, File Exceptions, Directories.	05
6	GUI & database programming	Graphical user interface (GUI): Overview of different GUI tools in python (Tkinter, PyQt, Kivy etc.), Working with containers, Canvas, Frame, Widgets (Button, Label, Text, Scrollbar, Check button, Radio button, Entry, Spinbox, Message etc.) Connecting GUI with databases to perform CRUD operations. (on supported databases like SQLite, MySQL, Oracle, PostgreSQL etc.).	06

4. Suggested Experiments:

Hardware & Software Requirements:

Minimum Hardware Requirements	Software Requirements	Other Requirements
PC With following Configuration 1. Intel Dual core Processor or higher 2. Minimum 2 GB RAM 3. Minimum 40 GB Hard disk 4. Network interface card	1. Windows or Linux Desktop OS 2. Python 3.6 or higher 3. Notepad ++ 1. 4.Python IDEs like IDLE	1. Internet Connection for installing additional packages

- 1 Write python programs to understand
 - a. Basic data types, Operators, expressions and Input Output Statements
 - a. Control flow statements: Conditional statements (if, if...else, nested if)
 - b. Looping in Python (while loop, for loop, nested loops)
 - c. Decorators, Iterators and Generators.
- 2 Write python programs to understand
 - a. Different List and Tuple operations using Built-in functions
 - a. Built-in Set and String functions
 - b. Basic Array operations on 1-D and Multidimensional arrays using Numpy
 - c. Implementing User defined and Anonymous Functions
- 3 Write python programs to understand
 - a. Classes, Objects, Constructors, Inner class and Static method
 - a. Different types of Inheritance
 - b. Polymorphism using Operator overloading, Method overloading, Method overriding, Abstract class, Abstract method and Interfaces in Python.
- 4 Write python programs to understand
 - a. Creating User-defined modules/packages and import them in a program
 - a. Creating user defined multithreaded application with thread synchronization and deadlocks
 - b. Creating an menu driven applications which should cover all the built-in exceptions in python
- 5 Write python programs to understand
 - a. Different File Handling operations in Python
 - a. Designing Graphical user interface (GUI) using built-in tools in python (Tkinter, PyQt, Kivy etc.).
 - b. GUI database connectivity to perform CRUD operations in python (Use any one database like SQLite, MySQL, Oracle, PostgreSQL etc.)

5. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of at least 15 practical based on the above list. Also Term work Journal must include at least 2 Programming assignments. The Programming assignments

should be based on real world applications which cover concepts from more than one module of syllabus. Mini Project based on the content of the syllabus (Group of 3-4 students)

B. Term Work Marks: 50 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 20 Marks (Mini Project) + 5 Marks (MCQ as a part of lab assignments) + 5 Marks (Attendance)

6. Books and References:

A. Books:

**BACHELOR OF TECHNOLOGY
IN
COMPUTER ENGINEERING**

(Semester IV)

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 208	Engineering Mathematics IV	Contact Hours	03	--	01	04
		Credits	03	--	01	04

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 208	Engineering Mathematics IV	40	40	40	60	25	--	--	125

1. Course Objectives:

The course is introduced to

1. Understand the basic techniques of statistics like correlation, regression, and curve fitting for data analysis, Machine learning, and AI.
2. Acquainted with the concepts of probability, random variables with their distributions and expectations.
3. Understand the concepts of vector spaces used in the field of machine learning and, engineering problems, To learn the Non-Linear Programming Problems techniques.
4. Introduce students to Lattice theory, recurrence relations.
5. Learn sampling theory and Number theory.
6. Introduce students to graphs, and trees.

2. Course Outcomes:

The learner will be able to

1. Apply the concept of Correlation and Regression to the engineering problems in data science, machine learning, and AI.
2. Illustrate understanding of the concepts of probability and expectation for getting the spread of the data and distribution of probabilities.
3. Apply the concept of vector spaces and orthogonalization process in Engineering Problems. Solve Non-Linear Programming Problems to engineering problems of optimization.
4. Express recursive functions of other subjects like Data Structures as recurrence relations.
5. Use the concept of sampling theory and Number theory to engineering problems.
6. Understand the use of functions, graphs and trees in programming applications.

3. Detailed Theory Syllabus:

Prerequisite: Engineering Mathematics I, Engineering Mathematics-II, Engineering Mathematics-III

Sr. No.	Module	Detailed Content	Hours
1	Correlation and Regression	Scattered diagrams, Karl Pearson's coefficient of correlation, covariance, Spearman's Rank correlation(non-repeated and repeated ranks) Regression coefficient & Lines of Regression, Fitting of the straight line and parabolic curve.	6
2	Probability, Probability Distributions,	Discrete and Continuous random variables, Probability mass and density function, Probability distribution for random variables, Expectation, Variance, Binomial distribution ,Poisson distribution, Normal distribution.	6

3	Linear Algebra :Vector Spaces and NonLinear programming (NLPP)	Vectors in n-dimensional vector space, norm, dot product, The Cauchy Schwarz inequality, Unit vector ; Linear combinations, Orthogonal projection, Orthonormal basis, Gram-Schmidt process for vectors ; Vector spaces over real field,. NLPP with one equality constraint (two variables) using the method of Lagrange's multipliers, NLPP with one inequality constraint (two variables) using Kuhn-Tucker conditions.	7
4	Lattice Theory & Recurrence relation,	Poset, Hasse Diagram, Lattices, Special Types of Lattices, Solving Recurrence relation, Linear Homogeneous Recurrence relation with constant coefficients,	6
5	Sampling Theory, Number Theory,	Small Sample test, Large Sample test, chi-square test, Euler's, Fermat's Little Theorem, Congruences, Computing Inverse in Congruences, Chinese Remainder Theorem, Euclid's algorithm,	8
6	Graphs and Trees:	Types of Graphs, And Isomorphism Of Graphs, Subgraphs, Types of Graphs, Complement of Graphs, Connected Graphs, Eulerian And Hamiltonian Graphs, Trees, Minimum Spanning Tree, Kruskal's Algorithm.	6

4. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hours.

A. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on the maximum contents of the syllabus.
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3).
4. Total three questions need to be solved.

5. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of tutorial work and minimum passing in the TW.

A. Term Work: Term Work shall consist of tutorials based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance).

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 209	Design and Analysis of Algorithms	40	40	40	60	25	25	--	150

1. Course Objectives:

The course is aimed to:

1. To conceptualize learners with mathematical models for analysis of algorithm
2. Describe, apply and analyze the complexity of divide and conquer strategy
3. Describe, apply and analyze the complexity of dynamic programming strategy
4. Describe, apply and analyze the complexity of greedy strategy
5. Explain and apply backtracking, branch and bound and to deal with computationally hard problems.
6. Describe the classes P, NP, and NP-Complete

2. Course Outcomes:

Learner should be able to:

1. Analyze space and time complexity of various algorithms
2. Understand and Apply divide and conquer strategy.
3. Describe, apply and Analyze design strategy and complexity for optimization problems.
4. Describe, apply and Analyze design and complexity of Backtracking.
5. Describe, apply and Analyze design strategy and complexity of Branch and Bound.
6. Understand concepts of various complexity classes.

3. Detailed Theory Syllabus:

Prerequisite : C Programming, Python Programming

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction to analysis of algorithm	Problems and Instances, RAM model of computation and costing methods(uniform costing), time and space complexity, <u>Analysis of algorithm</u> :- Asymptotic notations, Best, average and worst case analysis (example:- <u>Incremental sorting algorithm</u> :- Insertion Sort on an array input)	4
2	Divide and Conquer Approach	General Method, <u>Analysis of D&C algorithm</u> :-General equation, solution using Recursion tree, Master Theorem, <u>Applications</u> - Large number multiplication, Sorting problem:- Merge sort, Quick sort, Order statistic	8

		problem:- Finding k^{th} smallest element of an array	
3	Dynamic Programming Approach	General method, <u>Applications</u> -Matrix chain multiplication, Optimal binary search trees, 0/1 knapsack problem, All pairs shortest path problem, Traveling salesperson problem, Single source shortest path problem	9
4	Greedy Method Approach	General method, <u>Applications</u> -Job sequencing with deadlines, knapsack problem, Minimum cost spanning trees, Single source shortest path problem.	8
5	Backtracking and Branch-and-bound	<u>Backtracking</u> : General method, <u>Applications</u> -n-queen problem, sum of subsets problem, graph coloring <u>Branch and Bound</u> : General method, <u>Applications</u> - Travelling salesperson problem, 0/1 knapsack problem- LC Branch and Bound solution, FIFO Branch and Bound solution.	6
6	Introduction to Computational Complexity Theory	Decision problems, Languages and Encoding schemes, Complexity class P, Non-deterministic computation and class NP, Relationship between P and NP, Concept of polynomial reduction and NP-completeness, class NP-Hard	4

4. Suggested Experiments:

Software Requirements if any: C, Python wherever required

1. All 3 Programs
 - a) Implement Insertion sort, Merge sort, Quicksort on array input
 - b) Write a program, analyze it and find time complexity with various cases.
2. Both Programs
 - a) Implement D&C approach to Large number multiplication, Finding k^{th} smallest element of a given array input
 - b) Write a program, analyze it and find time complexity with various cases.
3. Any two Programs
 - a) Implement DP approach to Matrix chain multiplication/Optimal binary search trees/0/1 knapsack problem/All pairs shortest path problem.
 - b) Write a program, analyze it and find time complexity with various cases.
4. Any two Programs
 - a) Implement a greedy approach to Fractional knapsack problem/ Minimum cost spanning trees/ Single source shortest path problem.
 - b) Write a program, analyze it and find time complexity with various cases.
5. Any two Programs
 - a) Implement backtracking approach to n-queen problem/ sum of subsets problem/ graph coloring.
 - b) write a program, analyze it and find time complexity with various cases.
6. Write a case study on TSP.

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hours.

A. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on the maximum contents of the syllabus.
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3).
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 210	Operating Systems	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 210	Operating Systems	40	40	40	60	25	--	25	150

1. Course Objectives:

The course is aimed to:

1. To introduce basic concepts and functions of operating systems.
2. To introduce the concept of a process, thread and its management.
3. To introduce the basic concepts of Inter-process communication (IPC) and to understand concepts of process synchronization and deadlock.
4. To understand the concepts and implementation of memory management policies and virtual memory.
5. To understand functions of Operating Systems for file management and device management.
6. To study the need and fundamentals of special-purpose operating systems with the advent of new emerging technologies.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Understand the role of Operating System in terms of process, memory, file and I/O management.
2. Apply and analyse the concept of a process, process scheduling and threads.
3. Understand and apply the concepts of synchronization and deadlocks.
4. Apply and analyse the concepts of memory management techniques. Evaluate the performance of memory allocation and replacement techniques.
5. Apply and analyse different techniques of file and I/O management.
6. Compare the functions of various special purpose Operating Systems.

3. Detailed Theory Syllabus:

Prerequisite : Basic knowledge of Data structures and Computer architecture, Any programming language

Module No	Module	Detailed Contents of Module	Hrs.
1	Operating system Overview	Introduction, Objectives, Functions and Types of Operating System, Operating System Services and Interface, Operating system structures: Layered, Monolithic and Microkernel. Linux Kernel, Shell and System Calls.	03
2	Process and Process Scheduling	Concept of a Process, Process States, Process Description, Process Control Block, Operation on Process Uniprocessor Scheduling-Types: Pre-emptive and Non-pre-emptive, scheduling algorithms (FCFS, SJF, SRTN, Priority, RR) Threads: Definition and Types, Concept of Multithreading, Introduction to Linux Scheduling.	08

3	Process Synchronization and Deadlocks	Principles of Concurrency, Inter-Process Communication, Process Synchronization, Mutual Exclusion: Peterson Solution, Hardware Support (TSL), Operating System Support (Semaphores), Classic problem of Synchronization, Principles of Deadlock: Conditions and Resource, Allocation Graphs, Deadlock Handling Mechanism, Dining Philosophers Problem.	09
4	Memory Management	Basic Concept of Memory Management; Swapping; Contiguous Memory Allocation Techniques; Paging; TLB, Segmentation; Basic Concepts of Virtual memory; Demand Paging, Copy-on Write; Page Replacement Algorithms; Thrashing	10
5	File Management and Input /Output	Overview, File Organization and Access, File Allocation Method, File Directories, Free Space management, Linux Virtual File System. Operating System Design Issues, I/O Buffering, Disk Scheduling algorithm: FCFS, SSTF, SCAN, CSCAN, LOOK, C-LOOK, Linux I/O.	6
6	Special purpose Operating Systems	Fundamental of NOS, DOS, Comparison between Functions of various Special-purpose Operating Systems.	3

4. Suggested Experiments:

Software Requirements if any: C, IDE/Compiler (Geany). Bash shell, Bourne shell, Operating System

1. Explore usage of basic and advanced Linux Commands For eg: (mkdir, chdir, cat, ls, chown, chmod, chgrp, ps etc).
2. Explore the file and process management system calls.
3. Write shell scripts to do the following:
 - a) Display OS version, release number, kernel version, current shell, home directory, operating system type, current path setting, current working directory.
 - b) Display top 10 processes in descending order. Display processes with highest memory usage. Display current logged in user and log name.
4. Create a child process in Linux using the fork system call. From the child process obtain the process ID of both child and parent by using getpid and getppid system calls.
5. Write a program to demonstrate the concept of non-pre-emptive and preemptive scheduling algorithms.
6. Write a C program to implement the solution of the Producer consumer problem through Semaphore.
7. Write a program to demonstrate the concept of deadlock avoidance through Banker's Algorithm
8. Write a program to demonstrate the concept of dynamic partitioning placement algorithms i.e. Best Fit, First Fit, Worst-Fit etc.
9. Write a program in C demonstrating the concept of page replacement policies for handling page faults eg: FIFO, LRU etc.
10. Write a C program to simulate File allocation strategies typically sequential, indexed and linked files.
11. Write a C program to simulate file organization of multi-level directory structure.
12. Write a program in C to do disk scheduling - FCFS, SCAN, C-SCAN.

5. Theory Assessment:

- A. **Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hours.
- B. **End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

- A. **Term Work:** Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.
- B. **Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance).

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 211	Computer Network	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 211	Computer Network	40	40	40	60	25	----	25	150

1. Course Objectives:

1. To introduce students to the OSI and TCP/IP network reference models and enable them to understand functionality of each layer.
2. To develop an understanding of data link layer services, framing techniques, error detection/correction mechanisms, and flow control protocols.
3. To equip students with the skills to apply IPv4 and IPv6 addressing techniques including subnetting, supernetting, and address classification to design efficient subnetworks.
4. To analyze and compare different routing algorithms and protocols.
5. Analyze routing and transport layer mechanisms for data delivery and reliability.
6. Evaluate the role and functioning of application layer protocols in real-world communication.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Explore the functionalities of each layer of the network reference models and compare the Models.
2. Explain data link layer concepts, design issues and protocols.
3. Design subnetworks using the concept of IP addressing.
4. Analyze the strength and weaknesses of routing protocols.
5. Explain the data transportation and session management issues and related protocols used for end to end delivery of data.
6. Represent the data using different data presentation techniques and relate real time applications with the application layer protocols.

3. Detailed Theory Syllabus:

Prerequisite: Digital Logic and Computer Organization and Architecture

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction	Introduction to Computer Networks and Applications, Basic Networking Devices: Repeater, Hub, Switch, Router, NIC, Modem, Network Topologies, Type of networks (LAN, WAN, MAN) Network Reference models - Layers of OSI and TCP/IP	6

		Design Issues of Layers. Guided and Unguided media .Switching – Circuit-switched Networks – Packet Switching, Message switching.	
2	Data Link Layer	DLL Design Issues: Framing, Error Detection and Correction: Parity, CRC, Checksum, Hamming Code Data Link protocols: Flow control: Stop and Wait, Sliding Window (Go Back N, Selective Repeat), Piggybacking, HDLC. Medium Access Protocols: Channel Allocation, Random Access, Controlled Access, Channelization. Self Study: Ethernet Features, types and Standard Ethernet with frame format	8
3	Internet Protocols and Addressing	Introduction to Internet Protocols, IPV4 datagram format, IPv4 address, classful address,subnetting,subnetting, classless addressing, DHCP, NAT, IPV6 datagram format, Transition from IPV4 to IPV6	7
4	Routing in Network Layer	Routing algorithms -The Link-State (LS) Routing Algorithm,The Distance-Vector (DV) Routing Algorithm,Hierarchical Routing Routing in the internet -RIP,OSPF,BGP Broadcast and multicast routing -DVMRP, PIMRP	6
5	Transport Layer	User Datagram Protocol (UDP) – Transmission Control Protocol (TCP) – Congestion Control – Queuing, Discipline Introduction to Quality of Services (QOS).	6
6	Application Layer Protocols	Application Layer: HTTP, DNS, E-Mail, FTP, SSH, Telnet - SNMP.	6

4. Suggested Experiments:

Software Requirements if any: NS2

- Fundamentals of Computer Network: Use basic networking commands in Linux (ping, tracert, nslookup, netstat, ARP, RARP, ip, ifconfig, dig, route)
 - Set up multiple IP addresses on a single LAN.
 - Using netstat and route commands of Linux, do the following:
 - View current routing table
 - Add and delete routes
 - Change default gateway
- Study packet capturing and header formats of all layers protocols using Wireshark
- Error detection and correction protocols: CRC/ Hamming code implementation.
- Simulation of Network Topology: Installation of packet Tracer and implement simple network Topologies and internet addressing configuration using Packet Tracer
- Graphical simulation of a network with static and Dynamic Routing Protocols (Distance Vector-RIP) and traffic consideration using Packet Tracer.
- Graphical simulation of a network with static and Dynamic Routing Protocols (Link State Routing-OSPF/EIGRP) and traffic consideration using Packet Tracer.
- Graphical simulation of a network with static and Path vector routingProtocols (Border Gateway Protocol-BGP) and traffic consideration using Packet Tracer.
- Socket Programming: Socket programming using TCP or UDP using C/java/python
- Application layer protocols implementation using Packet Tracer.:
 - Perform File Transfer and Access using FTP
 - Perform Remote login using Telnet server
 - Perform DHCP using DHCP server
 - Perform DNS using DNS server

10. Basics of Network simulation with different Protocols:

Installation and configuration of NS2.

- a. Introduction to Tcl Hello Programming
- b. Number of nodes and physical layer configuration
- c. Simulation of traffic using TCP and UDP
- d. Simulation of traffic using Distance vector protocol
- e. Simulation of traffic using Link State protocol

11. Data Link Control Protocols Simulation: Stop and wait protocol/ sliding window (selective repeat / Go back N)

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hours.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3.)
4. Total three questions need to be solved.

6. Practical/ Oral Assessment: A Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of at least 10 experiments based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the theory as well as lab syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 10 Marks (Experiment) + 10 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

A. Books:

5. NS2.34 Manual
6. Practical Packet Analysis: Using Wireshark to Solve Real-World Network Problems by Chris Sanders

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 212	Microprocessors and Interfacing	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 212	Microprocessors and Interfacing	40	40	40	60	25	---	-	125

1. Course Objectives:

The course is aimed to:

1. Equip students with the fundamental knowledge and basic technical competence in the field of Microprocessors.
2. Emphasize on instruction set and logic to build assembly language programs.
3. Understand the concept of interrupts.
4. Prepare students for higher processor architectures and embedded systems .
5. Emphasize the use of Assembly language programs.
6. Prepare students for advanced subjects like embedded systems and IOT.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Describe architecture of x86 processors.
2. Interpret the instructions of 8086 and write assembly and Mixed language programs.
3. Explain the concept of interrupts.
4. Identify the specifications of peripheral chips.
5. Design 8086 based system using memory and peripheral chips.
6. Understand the architecture of advanced processors.

3. Detailed Theory Syllabus:

Prerequisite: Digital Logic and Computer Organization and Architecture

Module No	Module	Detailed Contents of Module	Hrs
1	The Intel Microprocessors 8086/8088 Architecture	8086/8088 CPU Architecture, Functional Pin Diagram, Memory Segmentation, Banking in 8086, Demultiplexing of Address/Data bus, Functioning of 8086 in Minimum mode and Maximum mode, Timing diagrams for Read and Write operations in minimum and maximum mode, Study of 8284 Clock Generator, Study of 8288 Bus Controller.	8

2	Instruction Set and Programming	Addressing Modes, Instruction set – Data Transfer Instructions, String Instructions, Logical Instructions, Arithmetic Instructions, Transfer of Control, Instructions, Processor Control Instructions.	6
3	8086 Interrupts with multiprocessor system	Types of interrupts, Interrupt Service Routine, Interrupt Vector Table, Servicing of Interrupts by 8086 microprocessor. Programmable Interrupt Controller 8259 – Block Diagram, Interfacing the 8259 in single and cascaded mode, Operating modes.	6
4	Interfacing 8086 with peripherals	Memory Interfacing - RAM and ROM, Decoding Techniques – Partial and Absolute, 8255-PPI – Block diagram, Functional PIN Diagram, CWR, operating modes, interfacing with 8086. 8253 PIT- Block diagram, Functional PIN Diagram, operating modes, interfacing with 8086. 8257 DMAC – Block diagram, Functional PIN Diagram, Register organization, DMA operations and transfer modes	6
5	Intel 80386DX Processor	Architecture of 80386 microprocessor, 80386 registers – General purpose Registers, and Control registers Real mode, Protected mode, virtual 8086 mode, 80386 memory management in Protected Mode – Descriptors and selectors, the memory paging mechanism	7
6	Pentium Family	Pentium Architecture, Integer & Floating Point Pipeline Stages, Cache Organization, and i3, i5, i7 processor, features, characteristics.	6

4. Suggested Experiments:

1. Study of 8086 Microprocessor with block diagram and pin diagram
2. Use of programming tools (Debug/TASM/MASM/8086 kit) to perform basic arithmetic operations on 8 bit/16 bit data
3. Assembly programming for 8-bit addition, subtraction, multiplication and division
4. Assembly programming for 16-bit addition, subtraction, multiplication and division (menu based)
5. Assembly program based on string instructions (overlapping/ non-overlapping block transfer)
6. Assembly program to display the contents of the flag register.
7. Assembly program to find factorials of a number.
8. Assembly program to find fibonacci of a number.
9. Assembly program to find the GCD/ LCM of two numbers
10. Assembly program to sort numbers in ascending/ descending order.
11. Assembly program to find whether the number is even or odd.
12. Assembly program to find minimum/maximum no from a given array.
13. Program and interfacing using 8255/8253
14. Program and interfacing of ADC/DAC/Stepper motor

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hours.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.

2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3.)
4. Total three questions need to be solved.

6. Practical/ Oral Assessment: A Practical/Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

A. Books:

1. 8086/8088 family: Design Programming and Interfacing: John Uffenbeck , PHI.

		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 213	Web Programming	-	-	-	-	50	25	-	75

1. Course Objectives :

The course is aimed to:

1. To get familiar with the basics of Internet Programming.
2. To acquire knowledge and skills for creation of a website considering both client and server side programming.
3. To gain the ability to develop responsive Web Applications.
4. To explore different Web extensions and Web Services Standards.
5. To learn characteristics of RIA
6. To be familiarized with Python Web Framework-Flask.

2. Course Outcomes :

On successful completion of course learner/student will be able to:

1. Implement interactive web page(s) using HTML,CSS and JavaScript.
2. Design a responsive web site using HTML5 and CSS3.
3. Demonstrate Rich Internet Application.
4. Build Dynamic web site using server side PHP Programming and Database connectivity
5. Describe and differentiate different Web Extensions and Web Services.
6. Demonstrate web application using Python web Framework-Flask.

3. Detailed Theory Syllabus:

Prerequisite : Basic of Programming and Web

Module No	Module	Detailed Contents of Module	Hrs.
1	HTML, CSS and JavaScript	Basic of HTML: Web System architecture-1,2,3 and n tier architecture, URL, domain name system, overview of HTTP and FTP, Cross browser compatibility issues, W3C Validators. Formatting and Fonts, Anchors, images, lists, tables, frames and forms. Introduction to CSS: Evolution of CSS, Syntax of CSS, Exploring CSS Selectors, Inserting CSS in an HTML Document, Defining Inheritance in CSS. Introduction to JavaScript: JavaScript language constructs, Objects in JavaScript- Built in, Browser objects and DOM objects, event handling, form validation and cookies.	10

2	Web Design with HTML5 and CSS3	Native Audio and Video, Geo-location, Canvas, CSS3 and Responsive Web Design: Media Queries, Selectors, Typography and color Modes, CSS3 Transitions, Transformations and Animations.	5
3	Rich Internet Application (RIA)	Introduction to XML, Introduction to AJAX :AJAX design basics, AJAX vs Traditional Approach, Rich User Interface using Ajax. Working with JavaScript Object Notation(JSON): Create data in JSON format, JSON Parser .	4
4	Server Side Programming: PHP	Introduction to PHP- Data types, control structures, built in functions, Building web applications using PHP- tracking users, PHP and Mysql database connectivity with example. Introduction to PHP Framework,	5
5	Python Web Framework: Flask	Introduction to Flask, Creating Flask application, "Hello World" Application.	2

4. Suggested Experiments:

Software Requirements if any: Windows or Linux Desktop OS, HTML5 compatible web browsers(Chrome, Opera, Firefox, Safari etc), HTML, CSS editors like Dreamweaver, Notepad++ etc. Netbeans or Eclipse IDE, XAMPP.

1. A Write five HTML programs showing use of: Links, images, table, lists, forms
2. Create a HTML document and style it using three ways of applying CSS.
3. Create a HTML document applying following CSS styles: color, background, border, margins, padding, text alignment, font.
4. Write a program for form validation using JavaScript
5. Create a HTML document to display audio and video files.
6. Create a HTML showing use of canvas.
7. Create a HTML showing use of media queries.
8. Write a program using geolocation api.
9. Write a program showing use of AJAX.
10. Write five PHP programs showing use of: server side form validation, session tracking, MySQL connection.
11. Any two programs creating basic flask applications.

5. Practical Assessment: A Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

- **Term Work:** The Term work shall consist of at least 10 experiments based on the above list. The term work Journal must include at least 2 Programming assignments. The Programming assignments should be based on real world applications which cover concepts from more than one module of syllabus. Mini Project based on the content of the syllabus (Group of 3-4 students)
- **Term Work Marks** - Total 50-Marks: Experiments: 15 Marks, Attendance: 05 Marks, Assignments: 05 Marks, Mini Project: 25 Marks

6. Books and References:

- **Books:**
 1. HTML 5 Black Book: Kogent Learning solutions.
 2. "Learning PHP 5", David Sklar, O'Reilly Publication.
 3. Rich Internet Application AJAX and Beyond WROX press.
 4. Responsive Web Design with HTML5 and CSS3, Ben Frain, PACKT Publication.
- **References:**
 1. "Web Technologies: Black Book", Dreamtech publication.
 2. HTML5 Cook-book, By Christopher Schmitt, Kyle Simpson, O'Reilly Media.

CE 301	Theory of Computation	40	40	40	60	-	-	-	100

1. Course Objectives :

The course is aimed to:

1. Acquire conceptual understanding of fundamentals of grammars and languages.
2. Build concepts of theoretical design of deterministic and non-deterministic finite automata
3. To learn how to design PDA.
4. Develop understanding of different types of Turing machines and applications.
5. To understand the relation between Regular Languages, Contexts free Languages, PDA and TM.
6. Understand the concept of Undecidability.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Identify the central concepts in theory of computation and differentiate between deterministic and nondeterministic automata, also obtain equivalence of NFA and DFA.
2. Infer the equivalence of languages described by finite automata and regular expressions.
3. Devise regular, context free grammars while recognizing the strings and tokens.
4. Design pushdown automata to recognize the language.
5. Develop an understanding of computation through the Turing Machine.
6. Acquire fundamental understanding of decidability and undecidability.

3. Detailed Theory Syllabus:

Prerequisite : Discrete Mathematics

Module No	Module	Detailed Contents of Module	Hrs.
1	Basic Concepts and Finite Automata	Alphabets, Strings, Languages, Closure properties. Finite Automata (FA) and Finite State machine (FSM), Deterministic Finite Automata (DFA) and Nondeterministic Finite Automata (NFA): Definitions, transition diagrams and Language recognizers NFA to DFA Conversion Equivalence between NFA with and without ϵ -transitions Minimization of DFA, FSM with output: Moore and Mealy machines, Equivalence Applications and limitations of FA.	12
2	Regular Expressions and Languages	Regular Expression (RE), Regular Language (RL), Equivalence of RE and FA: Arden's Theorem, State Elimination, RE Applications, Closure properties of RLs, Pumping lemma for RLs.	6

3	Grammars	Grammars and Chomsky hierarchy, Regular Grammar (RG), Equivalence of Left and Right linear grammar, Equivalence of RG and FA Context Free Grammars (CFG): Definition, Sentential forms, Leftmost and Rightmost derivations, Parse tree, Ambiguity. Simplification and Applications. Normal Forms: Chomsky Normal Forms (CNF) and Greibach Normal Forms (GNF). CFLs -Pumping lemma, Closure properties.	8
4	Pushdown Automata(PDA)	Definition, Transitions, Language of PDA, Language acceptance by final state and empty stack PDA as generator, decider and acceptor of CFG. Deterministic PDA, Non-Deterministic PDA, Application of PDA.	5
5	Turing Machine (TM)	Definition, Transitions, Design of TM as generator, decider and acceptor. Variants of TM: Multitape, Universal TM. Applications, Power and Limitations of TMs.	5
6	Undecidability	Decidability and Undecidability, Recursive and Recursively Enumerable Languages. Halting Problem, Rice's Theorem, Post Correspondence Problem.	3

4. Theory Assessment:

- A. **Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hour.
- B. **End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
 1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on the maximum contents of the syllabus.
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3).
 4. Total three questions need to be solved.

5. Books and References:

A. Books:

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 302	Machine Learning	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 302	Machine Learning	40	40	40	60	25	----	25	150

1. Course Objectives:

The course is aimed to:

1. Understand basics of Machine Learning.
2. Understand and Apply concepts of supervised and unsupervised learning to real world applications.
3. Evaluate various supervised and unsupervised learning models.
4. Aware of deep learning and reinforcement learning models.
5. Understand various performance measures.
6. Understand and apply optimization techniques.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Distinguish between classification and regression problems.
2. Identify and apply supervised learning models on real world problems.
3. Identify and apply unsupervised learning models on real world problems
4. Implement and analyze simple machine learning models
5. Optimize the data using dimensionality reduction techniques
6. Implement classifier for image data

3. Detailed Theory Syllabus:

Prerequisite: Probability, Statistics

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction to Basics of Machine Learning and ML Tools	Machine Learning, Types of Machine Learning, Issues in Machine Learning, Application of Machine Learning, Steps in developing a Machine Learning Application. Machine Learning Languages - Python, R	4
2	Supervised Learning : Boosting/Bagging and Regression	Introduction to Supervised Machine Learning, Classification and Regression Overfitting and Underfitting, Bagging , Boosting, Linear Regression, Least-Squares, Ridge, Lasso, and Polynomial Regression, Logistic Regression	5
3	Classification Models	K-Nearest Neighbors: Classification, Binary Decision Tree, Binary regression tree, Support vector Machine, Multi class classification, Kernelized Support Vector Machines, Naive Bayes Classifier, Random Forest, Neural Network	10

4	Performance Measures	Performance Measures : Model evaluation and selection, Confusion Matrices & Basic Evaluation Metrics, Precision-recall and ROC curves, Multi-Class Evaluation, Regression Evaluation, Model Selection: Optimizing Classifiers for Different Evaluation Metrics, Cross validation	9
5	Unsupervised Learning: Clustering, Dimensionality Reduction	Introduction to Unsupervised Machine Learning, Clustering- K-Means, Agglomerative Clustering, Dimensionality Reduction and Manifold Learning, PCA	8
6	Reinforcement Learning and Introduction to Deep Learning	Introduction to Reinforcement Learning, Introduction to Markov Decision Processes, Goal of Reinforcement Learning, Bellman equations, Introduction to Neural Network, Types of NN, CNN, Hyper parameter optimization, RNN, LSTM	3

4. Suggested Experiments:

Hardware Requirements: High performance Systems

Software Requirements: Python, Tensorflow, Keras

1. Learn various Libraries in Python used for Machine Learning using Breast Cancer Data
2. Implement Any four
 1. Implement Logistic regression with sample dataset and evaluate it using various performance measures
 2. Implement KNN with sample dataset and evaluate it using various performance measure
 3. Implement Decision tree with sample dataset and evaluate it using various performance measure
 4. Implement multiclass classifier SVM with sample dataset and evaluate it using various performance measure
 5. Implement Naive Bayes Classifier with sample dataset and evaluate it using various performance measure
3. Implement any Two:
 1. Implement PCA to find the first two principal components of the breast cancer dataset
 2. Implement Multidimensional scaling (MDS) on the breast cancer dataset
 3. Implement K-Means clustering using sample dataset
 4. Implement agglomerative clustering using sample dataset
4. Implement image classification using CNN

5. Mini Project:

Guidelines for Mini Project in Machine Learning

1. The mini project work is to be conducted by a group of four students
2. The group should meet with the concerned subject faculty during Laboratory hours and the progress of work discussed must be documented.
3. Students should do surveys and identify latest topics in machine learning, which shall be converted into problem statements for mini projects in consultation with the subject faculty / internal committee of faculties.
4. Students should do the following steps in a mini project -Importing the required libraries, Loading the Data, Data pre-processing, Summarization, Visualization, Training and Evaluation of different models, Predictions and evaluation of the result.
5. The solution to be validated with proper justification and report to be created in standard format given by concerned faculty.

Guidelines for Assessment of Mini Project:

1. Mini Project shall be assessed through a presentation and demonstration of working model by the student project group/individual to a panel of Internal Examiners consisting of head of department, senior faculties of department.
2. Students shall be motivated to publish a paper based on the work in Conferences/students competitions.

Mini Project shall be assessed based on following points

1. Quality of problem and Clarity
2. Innovativeness in solutions
3. Cost effectiveness and Societal impact
4. Full functioning of working model as per stated requirements
5. Effective use of skill sets
6. Effective use of standard engineering norms
7. Contribution of an individual's as member or leader
8. Clarity in written and oral communication

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hours.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3.)
4. Total three questions need to be solved.

6. Practical/Oral Assessment: A Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 10 Marks (Mini Project) + 5Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

A. Books:

1. Machine Learning. Tom Mitchell. First Edition, McGraw- Hill, 1997.
2. Introduction to Machine Learning Edition 2, by Ethem Alpaydin

B. References:

1. Machine Learning For Absolute Beginners: A Plain English Introduction (Second Edition), Oliver Theobald
2. Machine Learning: An Algorithmic Perspective, Second Edition, Stephen Marsland

4. Machine Learning (in Python and R) For Dummies, John Paul Mueller

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 303	Software Engineering and Project Management	Contact Hours	3	02	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Ter m Wor k	Practi cal	Oral	Tot al
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Averag e					
CE 303	Software Engineering and Project Management	40	40	40	60	125	-	--	125

1. Course Objectives: The course is aimed to

1. To understand the nature of software development and software life cycle process models, agile software development, SCRUM and other agile practices.
2. To Explain methods of capturing, specifying, visualizing and analyzing software requirements.
3. To understand concepts and principles of software design and user-centric approach and principles of effective user interfaces.
4. To know the basics of testing and understanding the concept of software quality assurance and software configuration management process.
5. To understand the need of project management and project management life cycle.
6. To understand project scheduling concepts and risk management associated with various types of projects

2. Course Outcomes: On successful completion of course learner/student will be able to:

1. Define various software application domains and remember different process models used in software development.
2. Explain needs for software specifications also they can classify different types of software requirements and their gathering techniques.
3. Convert the requirements model into the design model and demonstrate use of software and user-interface design principles.
4. Distinguish among SCM and SQA and can classify different testing strategies and tactics and compare them.
5. Justify the role of SDLC in Software Project Development and they can evaluate the importance of Software Engineering in PLC.
6. Generate project schedule and can construct, design and develop network diagrams for different types of Projects. They can also organize different activities of the project as per Risk impact factor.

3. Detailed Theory Syllabus:

Prerequisite:

1. Concepts of Object Oriented Programming & Methodology
2. Knowledge of developing applications with front end & back end connectivity.
3. Nature of Software, Software Definition, Software Characteristics, Software Application Domains

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction to Software	Software Engineering Fundamentals: Nature of Software, Software Engineering Principles, The Software Process, Software Myths.	6

	Engineering, Software Process Models	Process Models :A Generic Process Model, Prescriptive Process Models: The Waterfall, Incremental Process(RAD), Evolutionary Process, Concurrent. Agile software development: Agile methods, Extreme programming Practices, SCRUM. Introduction to agile tools: JIRA, Kanban.	
2	Software Requirements Engineering and Cost Estimation	Requirement, Types of Requirements, Requirement gathering, Requirement Engineering Task, Identifying Stakeholders, Multiple viewpoints, SRS (Software Requirement Specification) Project Estimation, LOC based, FP based and Use case based estimation.	6
3	Design Engineering	Analysis and Design Engineering Introduction of Analysis elements, Scenario based, Flow based, behavior and class based Design Concepts and Principles, Architecture Design, Component Level Design, System Level Design, User Interface Design.	8
4	Software Quality & Configuration Management	McCall's Quality Factor, Software Configuration Management, SCM Process. Need for Testing, Testing Tactics, Testing strategies. Introduction to Software Testing, Principles of Testing, Testing Life Cycle, Phases of Testing, Types of Testing, Verification & Validation, Maintenance & Reengineering.	6
5	Project Management:	Project Management Concepts: The Management Spectrum, People, Product, Process, Project, The W5HH Principle, Project Life cycle and ITPM, Project Feasibility, RFP, PMBOK Knowledge areas, Business Case, Project Planning, Project Charter and Project Scope.	7
6	Risk Management and Project Scheduling	WBS, Developing the Project Schedule, Network Diagrams (AON, AOA), CPM and PERT, Gantt Chart, Project Risk Management : Risk Analysis & Management: Reactive versus Proactive Risk Strategies, Software Risks, Risk Identification, Risk Projection, Risk Refinement, Risk Identification, Risk Projection and RMMM	6

4. Software Engineering and Project Management Lab (Credit-01)

Objectives

1. Learn basic concepts of UML.
2. Master the vocabulary, rules, and idioms of the UML and learn how to model it effectively.
3. Understand how to apply the UML to solve a number of common modeling problems.
4. Model the systems, from concept to executable artifact, using object-oriented techniques.
5. Apply the knowledge of Software engineering and project management.
6. Understand the software development process using tools.

Outcomes

1. Sketch a Modeling with UML.
2. Deploy Structural Modeling.
3. Deploy Behavioral Modeling
4. Deploy Architectural Modeling.
5. Examine estimation about schedule and cost for project development.
6. Select project development tool.

Software Requirements: IBM Rational Rose Modeler, Dia, StarUML (Any One) Orange Scrum, Xampp, GitHub

Hardware Requirements: PC i3 or above.

Suggested List of Experiments

1. Students should take one case study as a mini project work which is to be conducted by a group of three students.
2. Orangescrum DEMO
3. To study SRS
4. To study Use case diagram
5. To study class diagrams and Object diagrams.
6. To study Sequence and Collaboration diagrams.
7. To study Activity and statechart diagrams
8. To conduct FP point estimation for the project.
9. To Conduct COCOMO estimation for the project
10. To generate project scheduling for the project
11. Risk management
12. Software testing

5. Theory Assessment:

1. **Internal Assessment:** Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.
2. **End Sem Theory Examination:**
 - Question paper will consist of 5 questions, each carrying 20 marks.
 - Total 3 questions need to be solved.
 - Q.1 will be compulsory, based on the entire syllabus.
 - Remaining questions will be randomly selected from all the modules.
 - Weightage of marks should be proportional to the number of hours assigned to each module.
3. **Termwork Assessment:** Term Work shall consist of at least 10 to 12 practical's based on the above list. Also Term work Journal must include at least 2 assignments. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance).
4. **Oral/Viva Assessment:** An oral exam will be held based on the above syllabus.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 304	Personal Financial Management	Contact Hours	2	-	-	2
		Credits	2	-	-	2

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 304	Personal Financial Management	20	20	20	40	-	-	--	60

1. Course Objectives : The course is aimed

1. To introduce the basic concepts of finance and their practical application .
2. To demonstrate the process of drafting a financial budget.
3. To explain investment avenues and planning of personal finance.
4. To develop portfolio strategies for individual and institutional investor
5. To discuss various components of insurance and tax management.
6. To introduce financial frauds , measures to avoid frauds and resources of frauds .

2. Course Outcomes: On successful completion of course learner/student will be able:

1. To know the basic concepts of finance and interpret current business positions by reading books of accounts .
2. To analyze investment avenues and plan personal finance to develop portfolio strategies for individuals .
3. To Develop skills to interpret current market position.
4. To Create analytical approach for financial decisions.
5. To learn and understand Tax and Insurance management.
6. To identify financial frauds and understand the level of financial aspects .

3. Prerequisite : NA

4. Detailed Theory Syllabus:

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction to Personal Financial Planning	Financial Planning Process: Goal, Vision and mission , Components of Personal Financial Plan, Advantages and developing personal financial plan	3
2	Financial Budget	Meaning and Process of Drafting Financial Budget,Components of Financial Budget,Drafting Financial Budget	3
3	Investment Management	Meaning of Investment,Concept of Risk and Return and Time Value of Money,Investment Avenues,Portfolio Creation and Management	6
4	Insurance and Spending Management	Components of Insurance: Life Insurance, Health Insurance ,Property Insurance ,Spending Management	3

5	Tax Management	Introduction to Tax Regime and Tax Returns, Introduction to Income Tax and its impact on Incomes, Tax on property: Revenue and Capital Incomes, Tax Management, Tax Saving, Tax Avoidance	3
6	Financial Frauds	Meaning and Types of Fraud, Investment Frauds, Online Payment Frauds, Identity Theft, Mass Marketing Fraud, Measures to avoid frauds, Recourse from frauds, Cases of Frauds	6

5. Theory Assessment:

Internal Assessment: 20 marks

Consisting of Two compulsory internal assessments 20 Marks each. The final marks will be the average score of both the assessments.

End Semester Examination: 40 Marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the curriculum.

6. Books and References:

1. Financial Management: I M Pandey, Vikas Publishing House.
2. Financial Management: M.Y. Khan, P.K. Jain, Tata McGraw Hill.
3. Financial Management: Prassana Chandra, Prentice Hall.
4. Investment Analysis & Portfolio Management- Prasanna Chandra, Tata McGrawHill
5. Wealth Management- Dun & Bradstreet, Tata McGrawHill
6. Wealth Management- S.K .Bagachi, Jaico publishing house

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 305	Professional Communication Skills II	Contact Hours	-	02+02#	-	4
		Credits	-		-	2

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 305	Professional Communication Skills II	-	-	-	-	50	-	--	50

Course Objectives: The course is aimed

1. To enable learners to formulate professional documents in a structured manner that meets the corporate requirements.
2. To provide an appropriate environment, opportunity and scope to the learners to acquire skills such as collaboration, leadership qualities, assertiveness etc. necessary for group discussion and team building.
3. To promote the importance of having an impressive personality that will enhance self-esteem, build self-confidence and sensitize the learners in appropriate behavior.
4. To prepare the learners for campus placement, employability and competitive examination required for lifelong learning.
5. To inculcate the ethical code of conduct and corporate etiquettes.
6. To develop effective presentation, research and organizational and creative skills necessary for global and industrial set up.

Course Outcomes: At the end of the course Learner will be able to

1. Acquire the writing skills necessary for professional documents to meet the corporate requirement.
2. Demonstrate the skills required for self-improvement and effective communication.
3. Develop self-confidence and behave professionally.
4. Perform successfully in competitive exams like GRE, CET and TOEFL
5. Determine the importance of ethics and etiquettes in social and professional situations.
6. Illustrate effective presentation, research organizational and creative skills necessary for lifelong learning.

Prerequisite: Basic language skills

Module No	Module	Detailed Contents of Module	Hrs.
1	Structure, Style and Language of Report Writing	1.1 Introducing the purpose , aim, objective and format of report 1.2 Literature review-ability to gather and analyze information from different sources and summarize. Specific emphasis on plagiarism, use of quotation marks appropriately. 1.3 Research Methodology 1.4 Presenting data-figures, diagrams and labeling 1.5 How and why to write discussion 1.6 Citing and referencing- IEEE format 1.7 Writing an abstract	6
2	Writing Technical Proposals	2.1 Format 2.2 Executive summary 2.3 Defining the problem and presenting the solution 2.4 Summarizing a technical Proposal	4
3	Oral Skills for Employability	3.1 Group Discussion- with special reference to leadership qualities, assertiveness, analyzing the topic, developing different perspectives, introducing and concluding the discussion. 3.2 Interview-with special reference to introducing oneself and answering questions with confidence. 3.3 Presentation Skills-with special reference to preparing slides, dress code, non-verbal communication including paralinguistic features, introduction and conclusion.	4
4	Personality Development and Social Etiquettes	4.1. Personality Development: Improving self-awareness-analyzing our own experiences, looking at ourselves through the eyes of others, Knowing and Building your own identity, Discovering and Developing your talents, Teamwork/collaboration 4.2. Social Etiquettes : Formal Dining Etiquettes, Cubicle Etiquettes, Responsibility in Using Social Media, Showing Empathy and Respect, Learning Accountability and Accepting Criticism, Demonstrating Flexibility and Cooperation, Selecting Effective Communication Channels	5
5	Ethics and Ethical codes of conduct	5.1 Writing Resume and statement of purpose 5.2 Business and corporate activities(special emphasis on business meetings) 5.3 Personal ethics, conflicting values, choosing a moral response, the process of making ethical decisions.	3
6	Content writing	6.1 Research Skills 6.2 Organizational skills 6.3 Creative Writing- Blog posts, Web pages etc.	4

List of assignments:

Sr. No.	Details of Assignments	Details of Activities	Hours
1	Written assignment on Literature Review 20 page report on technical topic	Sample IEEE papers to be shared with students and train them to identify contributions of each author. These contributions can then be written in the format required in journals.	5
2	Written assignment on summarizing a technical proposal :4 page technical proposal	Example of summarizing techniques to be demonstrated.	4
3	Oral Skills for Employability	Role play and mock interviews Mock group discussion Mock presentation	2 4 4
4	Written Assignment on Documentation of Business Meeting	Mock meetings	2
5	Written Assignment on Resume writing/Statement of Purpose.	NA	2
6	Written Assignment on Blog Posts	NA	2

Assessment:**Term Work:**

- 1 Term work shall consist of a minimum of 6 assignments.
- 2 The distribution of marks for term work shall be as follows:
 1. Assignments-10 marks
 2. Group Discussion-10 marks
 3. Interviews-5marks
 4. Report- 5 marks
 5. Technical Proposal- 5 marks
 6. Attendance -5 marks
 7. Presentation- 10 marks

The final certification and acceptance of term work ensures the satisfactory performance of Laboratory work and minimum passing in the term work.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 306	Advanced Database Management System	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 306	Advanced Database Management System	40	40	40	60	25	25	--	150

1. Course Objectives:

The course is aimed to:

1. To provide an overview of indexing and hashing techniques.
2. To impart knowledge related to query processing and query optimizer phases of a database management system
3. To introduce advanced concepts of transaction management and recovery techniques.
4. To introduce concepts of advanced data models.
5. To provide an overview of Distributed Database Design & Techniques.
6. To introduce the concepts of Database security and authorization.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Build indexing mechanisms for efficient retrieval of information from databases.
2. Measure query costs and design alternate efficient paths for query execution.
3. Learn the concept of a transaction , properties of transaction, concurrency control and recovery in database
4. Analyze advanced data models like spatial, mobile and Temporal data models.
5. Understand the Design, query processing, concurrency, recovery in Distributed Database.
6. Understand the concepts of Database Security & Access control

3. Detailed Theory Syllabus:

Module No	Module	Detailed Contents of Module	Hrs.
1	Indexing and Hashing Techniques	Indexing and Hashing: Operation on Files Hashing Techniques; Static and dynamic Types of Single-Level Ordered Indexes; Multilevel Indexes; Dynamic Multilevel Indexes Using B-Trees and B+-Trees; Indexes on Multiple Keys	7
2	Query Processing and Optimization	Query Processing : Overview, Measures of Query cost, Selection operation, Sorting, Join Operations, and other Operations, Evaluation of Expression, Query Optimization : Translations of SQL Queries into relational algebra Heuristic approach & cost based optimization	7
3	Transactions Management and	Transaction concept, Transaction states, ACID properties, Concurrent Executions, Serializability, Recoverability, Concurrency Control: Lock-based, Time-stamp based	8

	Concurrency	Deadlock handling, Recovery System: Failure Classification, Storage structure, Log based recovery, Checkpoints, Shadow Paging, ARIES Algorithm	
4	Advanced data models	Temporal data models :- Aspects of valid time , Bi-temporal time and bi-temporal time with examples of each. Spatial model :- Types of spatial data models - Raster, Vector and Image, Mobile databases, Multimedia databases	6
5	Distributed Databases	Types of Distributed Database Systems; Distributed Database Architectures; Data Fragmentation, Replication and Allocation Techniques for Distributed Database Design, Distributed Query Processing (Semi join), distributed Transaction Management in Distributed Databases, Distributed Concurrency Control (locking) , Recovery in Distributed Databases {2PC/3PC) and deadlock management.	6
6	Access Control and Data Security	Introduction to Database Security Issues; authorization , Discretionary Access Control Based on Granting and Revoking Privileges, Mandatory Access Control and Role-Based Access Control for Multilevel Security, SQL Injection, Introduction to Statistical Database Security, Introduction to Flow Control.	5

4. Suggested Experiments:

- Case study on Hashing and Indexing Techniques.
 - Solve the given problem statement to find the complexity for searching a record from disk storage using without index and with index based on sparse and dense index method.
 - Find the cost of a given problem statement and create Index to reduce the query cost in any DBMS platform.
 - Implementation of any one operation in binary search method using python.
- To Find the cost of a given problem statement for different operations with various algorithms in Query Processor and Optimization.
- Find the corresponding schedule for given data and how to manage the transactions if the system crash using Concurrency Control and Recovery Problems
- Design of a distributed database design - Fragmentation
- Case study on Mobile database data model with real world applications on new trends.
- Implementation of SQL Injection for authentication and authorization on databases.

5. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hours.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
- Question paper will consist of 3 questions, each carrying 20 marks.
 - Question number 1 will be compulsory and based on maximum contents of the syllabus
 - Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 - Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of tutorial work and minimum passing in the TW.

Term Work: Term Work shall consist of tutorials based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance).

CE 307	Cryptography and Network Security	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 307	Cryptography and Network Security	40	40	40	60	25	25	-	150

1. Course Objectives:

The course is aimed to:

1. To introduce the concepts of modular arithmetic and number theory and their application in Classical Encryption techniques.
2. To explore the working principles and utilities of various cryptographic algorithms including Secret Key Cryptography and Public Key Cryptography.
3. To explore various hashing and Message Digest Algorithms to achieve Confidentiality and Integrity.
4. To explore the design issues and working principles of various authentication protocols, PKI standards and different digital signature algorithms to achieve authentication.
5. To explore various secure communication standards including Kerberos, IPsec, and SSL/TLS and email.
6. To develop the ability to use existing cryptographic utilities to build programs for secure communication.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Understand system security goals and concepts, classical encryption techniques and acquire fundamental knowledge on the concepts of modular arithmetic and number theory.
2. Understand, compare and apply different encryption and decryption techniques to solve problems related to confidentiality and authentication
3. Apply the knowledge of cryptographic checksums and evaluate the performance of different message digest algorithms for verifying the integrity of varying message sizes.
4. Apply different digital signature algorithms to achieve authentication and design secure applications
5. Understand network security basics, analyze different attacks on networks and evaluate the performance of firewalls and security protocols like SSL, IPSec, and PGP.
6. Analyze and apply system security concepts to recognize malicious code.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Content	Hrs.
1	Introduction and Number Theory	Security Goals, Services, Security Mechanisms and attacks, The OSI security architecture, Network Security Model, Classical Encryption Techniques, Symmetric cipher model, mono-alphabetic and poly-alphabetic substitution techniques: Vigenere cipher, playfair cipher, Hill cipher, transposition	9

		techniques: keyed and keyless transposition ciphers, steganography. Modular Arithmetic and Number Theory:- Euclid's algorithm, Prime numbers, Fermat's & Euler's theorem - Testing for primality, The Chinese remainder theorem and its application, Discrete logarithms.	
2	Symmetric and Asymmetric key Cryptography and key Management	Block cipher principles, block cipher modes of operation, DES, Double DES, Triple DES, Advanced Encryption Standard (AES), Stream Ciphers: RC5 algorithm Public key cryptography: Principles of public key cryptosystems-The RSA algorithm, The knapsack algorithm, ElGamal Algorithm. Key management techniques: using symmetric and asymmetric algorithms. Diffie Hellman Key exchange algorithm.	8
3	Hashes, Message Digests and Digital Certificates	Cryptographic hash functions, Hash function requirements, Hash function uses, MD5, SHA-1, MAC, HMAC, CMAC Digital Certificate: X.509 format, PKI	4
4	Authentication Protocols & Digital signature schemes	Authentication Requirement and Functions, Types of Authentication, User Authentication and Entity Authentication, One-way and mutual authentication schemes, Needham Schroeder Authentication protocol, Kerberos Authentication protocol. Importance of Digital Signature, Digital Signature Schemes – RSA, ElGamal signature schemes	6
5	Network Security and Applications	Network Security Basics, TCP/IP Vulnerabilities (Layer-wise): Application layer: HTTP, DHCP Transport layer: TCP syn flood, Port Scanning, Network layer: IP Spoofing, Packet sniffing, Data link layer: ARP Spoofing, ARP cache poisoning DOS: Classic DOS attacks: Ping flood, ICMP flood, UDP flood, Distributed DOS, Defenses against DOS attacks, Internet Security Protocols: SSL, IPSEC, Secure Email: PGP, Firewall, Honey Pots, IDS	8
6	System Security	Software Vulnerabilities: Buffer Overflow, Format string, SQL injection, Malwares: Viruses, Worms, Trojans, Logic Bomb, Bots, Rootkits	4

4. Suggested Experiments:

1. Implement a product cipher using Substitution/ Transposition methods.
2. Implement RSA cryptosystem.
3. Implement Diffie Hellman Key exchange algorithm.
4. For varying message sizes, calculate the message digests of a text using MD-5.
5. Implement a digital signature scheme using ElGamal Algorithm.
6. Study the use of network reconnaissance tools like whois, dig, traceroute, nslookup to gather the information about networks.
7. Study the packet sniffer tool wireshark,:-
 - a. Observe the performance in promiscuous as well as non-promiscuous mode.
 - b. Show how the packets can be traced based on different filters.
8. Download and install nmap. Use it with different options to scan open ports, perform OS fingerprinting, etc.
9. Detects ARP spoofing using nmap and/or open source tools ARPWATCH and wireshark.
10. Explore the GPG tool of linux to implement email security.

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hours.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of tutorial work and minimum passing in the TW.

A. Term Work: Term Work shall consist of tutorials based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance).

7. Books and References:

A. Books:

1. William Stallings, Cryptography and Network Security, Principles and Practice, 6th Edition, Pearson Education, March 2013

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 308	IoT Systems and Applications	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 308	IoT Systems and Applications	40	40	40	60	25	25	--	150

1. Course Objectives:

The course is aimed to:

1. To understand the basic concepts of IoT.
2. To learn the architecture and levels in IoT
3. To identify the different technologies for implementing IoT
4. To study different types of sensors and its applications
5. To learn different applications in IoT.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Describe the basic concepts of IoT
2. Design architecture for an IoT application
3. Apply IoT technologies and communication to design an application
4. Identify the requirements for the real world problems.
5. Develop solutions for different real time IoT applications
6. Design and implement different IoT applications in IoT

3. Detailed Theory Syllabus:

Prerequisite: Computer Networking, Microprocessors and Interfacing

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction to IoT	Basics of Internet of Things, Smart Objects, Smart Environments, Machine to Machine Communications, Industrial Internet of Things, Who Works on the Internet of Things?, Internet of Things Framework	3
2	Architecture of IoT	Convergence of IT and OT, IoT Challenges, M2M IoT Standardized Architecture, The IoT World Forum (IoTWF) Standardized Architecture, The Core IoT Functional Stack, IoT Data Management and Compute Stack – Design considerations and Data related problems, Fog Computing, Edge Computing, The Hierarchy of Edge, Fog and Cloud	7
3	Technologies in IoT	WSN: ZigBee, BLE, WiFi, LTE, IEEE 802.15.4, Cloud Computing, Big Data Analytics. Middleware Technologies Service Discovery, Data Exchange, Computation, Application Layer Technologies, Identity-Related Services, Information Aggregation Services, Collaborative Aware Services, Ubiquitous Services, Business Layer Technologies, Semantics IoT Platforms and Operating Systems	10

4	Things in IoT	Sensors/Transducers – Definition, Principles, Classifications, Types, Characteristics and Specifications Actuators – Definition, Principles, Classifications, Types, Characteristics and Specifications Smart Object – Definition, Characteristics and Trends Sensor Networks – Architecture of Wireless Sensor Network, Network Topologies	6
5	IoT Design and Prototype	IoT Hardware - Arduino, Raspberry Pi, ESP32, Cloudbit/Littlebits, Particle Photon, Beaglebone Black, IoT Software - languages for programming IoT hardware, A comparison of IoT boards and platforms in terms of computing, development environments and communication standards and connectivity, Software platform	5
6	IoT Applications	Introduction, Internet of Things -Based Precision Agriculture, IoT Application in Agriculture Irrigation, IoT Application in Agriculture Fertilization, IoT Application in Crop Disease and Pest Management. The Internet of Things and People in HealthCare- The Smart Health Care Ecosystem, The Patient at the Center, HealthCare Providers, Devices and Sensors, Applications and Interfaces	5

4. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

5. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of tutorial work and minimum passing in the TW.

- A. Term Work:** Term Work shall consist of tutorials based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.
- B. Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance).

		IA 1	IA 2	Average					
CE 309	Advanced Operating Systems	40	40	40	60	25	25	--	150

1. Course Objectives:

The course is aimed to:

1. To learn the architectural differences and issues related to the Advanced Operating System.
2. To learn the Parallel system.
3. To get a comprehensive knowledge of the distributed systems.
4. To get a comprehensive knowledge of Real time operating systems.
5. To get a thorough knowledge of database operating systems
6. To get a thorough knowledge of various operating systems.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Apply the principles and concepts in analyzing and designing Advance Operating Systems.
2. Demonstrate the Mutual exclusion, Deadlock detection and agreement protocols of Distributed operating systems.
3. Analyze the performance and reliability of different Advanced Operating Systems.
4. Demonstrate the various Scheduling Algorithms.
5. To be able to understand the database Operating system.
6. To be able to understand the various Operating Systems.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction to Operating Systems,	Introduction to Operating Systems, Design Principles & Concepts, Operating System History and Evolution, Processes, Processes scheduling, Memory Management, Virtual Memory	5
2	Parallel Systems	Shared memory machines, Synchronization Communication, Lightweight RPC, Scheduling, Shared memory multiprocessor OS	6
3	Distributed Operating System	Issues in Distributed Operating System, Architecture, Communication Primitives, Lamport's Logical clocks, Causal Ordering of Messages, Distributed Mutual Exclusion Algorithms, Centralized and Distributed Deadlock Detection Algorithms, Agreement Protocols. Distributed File Systems Design Issues Distributed Shared Memory, Algorithms for Implementing Distributed Shared memory, Issues in Load Distributing, Scheduling Algorithms, Synchronous and Asynchronous Check pointing and Recovery Fault Tolerance – Two-Phase Commit Protocol – Nonblocking Commit Protocol – Security and Protection.	8

4	Real Time and Mobile Operating System	Basic Model of Real Time Systems - Characteristics- Applications of Real Time Systems – Real Time Task Scheduling - Handling Resource Sharing - Mobile Operating Systems –Micro Kernel Design, Resource Access, Processes and Threads : Scheduling, IPC, RPC, CPU Scheduling, scheduling criteria, scheduling algorithms Threads: Multi-threading models, threading issues, thread libraries, synchronization Mutex: creating, deleting, prioritizing mutex, mutex internals- Memory Management - File system.	8
5	Database Operating systems	Concurrency control : Database systems, Concurrency control model of database systems, Problem of Concurrency Control, serializability theory, Distributed Database Systems Concurrency Control Algorithms : Basic synchronization Algorithms, Lock based, Timestamp based and Optimistic Algorithms, Concurrency Control Algorithms : Data Replication	6
6	Case Study	DOS: Mach, .RTOS : UNIX as RTOS , Windows as RTOS, Linux OS, Mobile OS.	5

4. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

5. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of tutorial work and minimum passing in the TW.

A. Term Work: Term Work shall consist of tutorials based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance).

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 310	Data Warehouse and Data Mining	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 310	Data Warehouse and Data Mining	40	40	40	60	25	25	-	150

1. Course Objectives:

The course is aimed to:

1. To identify the scope and essentiality of Data Warehousing and Mining.
2. To analyze data, choose relevant models and algorithms for respective applications.
3. To study spatial and web data mining.
4. To develop research interest towards advances in data mining.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Understand Data Warehouse fundamentals, Data Mining Principles
2. Design data warehouse with dimensional modelling and apply OLAP operations.
3. Identify appropriate data mining algorithms to solve real world problems
4. Compare and evaluate different data mining techniques like classification, prediction, clustering Credits and association rule mining
5. Describe complex data types with respect to spatial and web mining.
6. Benefit the user experiences towards research and innovation.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Content	Hrs.
1	Introduction to Data Warehousing and Dimensional Modelling	Introduction to Data Warehouse, Components of Data warehouse Architecture, Data warehouse architecture, Data warehouse versus Data Marts, E-R Modeling versus Dimensional Modeling, Dimensional process, Data modeling tool, Information Package Diagram, Data Warehouse Schemas; Star Schema, Snowflake Schema, Factless Fact Table, Fact Constellation Schema. Update to the dimension tables.	9
2	ETL and OLAP	Major steps in ETL process, Data Extraction Methods, Data Transformation; Basic Tasks in Transformation, Major Data Transformation Types, Data Loading Techniques, OLTP versus OLAP, Hypercubes, OLAP operations: Slice, Dice, Rollup, Drilldown and Pivot.	8
3	Introduction to Data Mining, Data Exploration	Data Mining Task Primitives, Architecture, KDD process, Issues in Data Mining, Applications of Data Mining, Data Exploration: Types of Attributes, Statistical Description of Data, Data Visualization;	6

	and Data Pre-processing	Data Preprocessing: Descriptive data summarization, Cleaning, Integration & transformation, Data reduction, Data Discretization & Concept hierarchy generation	
4	Classification, Prediction and Cluster Analysis	Classification: Decision Tree: ID3, Bayesian Classification; Prediction: Logistic regression; Clustering: Partitioning Methods (<i>k</i> -Medoids), Hierarchical Methods (BIRCH), Density based Method, Grid based Method.	4
5	Mining frequent patterns and associations	Basic concepts & a Road map: Market Basket Analysis, Frequent Item sets, Closed Item sets, and Association Rule, Frequent Pattern Mining; Efficient and Scalable Frequent Itemset Mining Methods: Apriori Algorithm, Association Rule Generation, Improving the Efficiency of Apriori: FP growth.	8
6	Web & Text Mining	Web Mining: Page rank algorithm, VIPS, Block based. Text mining, Text Data Analysis, Information Retrieval Techniques, Dimensionality Reduction for Text, Text Mining Approaches, Boolean Model, Keyword based retrieval, similarity based retrieval, Indexing Techniques, Vector space model.	4

4. Suggested Experiments:

Software Requirements if any: Python, WEKA Tool, ORACLR/PG Admin

1. Build Data Warehouse/Data Mart for a given problem statement
 - i) Identifying the source tables and populate sample data
 - ii) Design dimensional data model i.e. Star schema, Snowflake schema and Fact Constellation schema (if applicable)
2. To perform various OLAP operations such as slice, dice, drilldown, rollup, pivot
3. Implementation of Data Preprocessing with sample dataset.
4. Implementation of Classification algorithm(Bayesian classification)
5. Implementation of Logistic Regression.
6. Implementation of Clustering algorithm(K-medoids/ DBSCAN)
7. Implementation of Association Rule Mining algorithm (Apriori).
8. Perform data Pre-processing task and Demonstrate performing Classification, Clustering, Association algorithm on data sets using data mining tool (WEKA,R tool, XL Miner, etc.)
9. Implementation of page rank algorithm.
10. Implementation of Text Mining.

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Term Work Assessment: The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

- A. **Term Work:** Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.
- B. **Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

CE 311	Ethical Hacking and Cyber Laws	Examination Scheme	3	2	-	5	3	1	-	4	
			Internal Assessment			End Sem Exam		Term Work	Pract	Oral	Total Marks
			IA1	IA2	Avg	TH	Hrs				
			40	40	40	60	2	25	-	25	150

1. Prerequisite: Computer Network, Operating System, Cryptography and network Security

2. Course Objectives: The course / instructor aims to

1. To understand the basic of ethical Hacking
2. To understand the various tools and techniques use for ethical hacking
3. To understand the concept of OS fingerprinting
4. To explore the knowledge of privilege escalation
5. To explore in linux system hacking
6. To explore Cyber Law

3. Course Outcomes: On successful completion of this course, learner/ student will be able to:

1. To understand the basic of ethical Hacking
2. To understand the various tools and techniques use for ethical hacking
3. To understand the concept of OS fingerprinting
4. To explore the knowledge of privilege escalation
5. To explore in linux system hacking
6. To explore Cyber Law

4. Detailed Theory Syllabus

SN	Module Name	Detailed Content	Hrs	COs
1	Introduction to Ethical Hacking, Ethics, and Legality	Defining Ethical Hacking ,Understanding the Purpose of Ethical Hacking,An Ethical Hacker's Skill Set, Ethical Hacking Terminology ,The Phases of Ethical Hacking Identifying Types of Hacking Technologies,Identifying Types of Ethical Hacks,Understanding Testing Types,How to Be Ethical,Performing a Penetration Test,	6	CO1
2	Gathering Target Information: Reconnaissance, Footprinting, and Social Engineering	Reconnaissance,Understanding Competitive Intelligence, Information-Gathering Methodology ,Footprinting, Using Google to Gather Information,Understanding DNS Enumeration,Understanding Whois and ARIN Lookups Identifying Types of DNS Records,Using Traceroute in Footprinting ,Understanding Email Tracking, Understanding Web Spiders,Social Engineering ,The Art of Manipulation,Types Social engineering-Attacks,Social-Engineering Countermeasures	8	CO2

3	Gathering Network and Host Information: Scanning and Enumeration	Scanning, The CEH Scanning Methodology, Ping Sweep Techniques, nmap Command Switches, Scan Types, TCP Communication Flag Types, War-Dialing Techniques, Banner Grabbing and OS Fingerprinting Techniques, Scanning Anonymously, Enumeration, Null Sessions, SNMP Enumeration, Windows 2000 DNS Zone Transfer	7	CO3
4	System Hacking: Password Cracking, Escalating Privileges, and Hiding Files	The Simplest Way to Get a Password, Types of Passwords, Passive Online Attacks, Active Online Attacks, Offline Attacks, Nonelectronic Attacks Cracking a Password, Understanding the LAN Manager Hash, Cracking Windows 2000 Passwords, Redirecting the SMB Logon to the Attacker, SMB Relay MITM Attacks and Countermeasures, NetBIOS DoS Attacks, Password-Cracking Countermeasures, Understanding Keyloggers and Other Spyware Technologies, Escalating Privileges, Executing Applications, Buffer overflows, Understanding Rootkits, Planting Rootkits on Windows 2000 and XP Machines, Rootkit Embedded TCP/IP Stack, Rootkit Countermeasures, Hiding Files, NTFS File Streaming, NTFS Stream Countermeasures, Understanding Steganography Technologies, Covering Your Tracks and Erasing Evidence	6	CO4
5	Denial of Service and Session Hijacking	Denial of Service, How DDoS Attacks Work, How BOTs/BOTNETs Work, Smurf and SYN Flood Attacks, DoS/DDoS Countermeasures, Session Hijacking, Sequence Prediction, Dangers Posed by Session Hijacking, Preventing Session Hijacking Attacking Applications: SQL Injection, Wireless Network Hacking, Bypassing Network Security, Hacking Linux Systems	6	CO5
6	Cyber Law	Keeping It Legal, Cyber Security Enhancement Act and SPY ACT USC §1029 and 1030, U.S. State Laws, Federal Managers Financial Integrity Act, Freedom of Information Act (FOIA) Federal Information Security Management Act (FISMA) Privacy Act of 1974, USA PATRIOT Act, Government Paperwork Elimination Act (GPEA) Cyber Laws in Other Countries	6	CO6

5. DETAILED PRACTICAL SYLLABUS:

Lab Prerequisite: Knowledge of Digital Forensics

Suggested List of Experiments:

1. Study the use of network reconnaissance tools like WHOIS, dig, traceroute, nslookup to gather information about networks and domain registrars.

2. Study of packet sniffer tools like wireshark, ethereal, tcpdump etc. Use the tools to do the following
 1. Observer performance in promiscuous as well as non-promiscuous mode.
 2. Show that packets can be traced based on different filters.
3. Download and install nmap. Use it with different options to scan open ports, perform OS fingerprinting, do a ping scan, tcp port scan, udp port scan, etc.
4. Detects ARP spoofing using open source tool ARPWATCH.
5. Use the Nessus tool to scan the network for vulnerabilities.
6. Implement a code to simulate buffer overflow attack.
7. Set up IPSEC under LINUX
8. Install IDS (e.g. SNORT) and study the logs.
9. Use of iptables in linux to create firewalls.
10. Case study on cyber Law

6. Theory Assessments:

1. **Internal Assessment:** Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.
2. **End Sem Theory Examination:**
 - Question paper will consist of 5 questions, each carrying 20 marks.
 - Total 3 questions need to be solved.
 - Q.1 will be compulsory, based on the entire syllabus.
 - Remaining questions will be randomly selected from all the modules.
 - Weightage of marks should be proportional to the number of hours assigned to each module.

7. Practical Assessments:

1. **Termwork Assessment:** Term Work shall consist of at least 8 practical's based on the above list. Also Term work Journal must include at least 2 assignments. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance).
2. **Oral/Viva Assessment:** An oral exam will be held based on the above syllabus.

8. Text Books:

1. Certified Ethical Hacker STUDY GUIDE, Kimberly Graves
2. Hacking: The Art of Exploitation by Jon Erickson
3. The Web Application Hacker's Handbook: Finding and Exploiting Security Flaws

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 312	Robotics and its Applications	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 312	Robotics and its Applications	40	40	40	60	25	25	-	150

1. Course Objectives:

The course is aimed to:

1. Learn the basics of Robots.
2. Learn the concepts of Direct and Inverse Kinematics of Robotics.
3. Learn the concepts of Motions, velocities and dynamic analysis of force.
4. Learn the concepts of Trajectory planning.
5. Learn the concepts of Motion Planning
6. Learn the concepts of Potential Functions and Visibility Graphs

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Apply the basic concepts of Robots.
2. Apply and evaluate the concepts of Direct and Inverse Kinematics of Robotics.
3. Apply and evaluate the Motions, velocities and dynamic analysis of force.
4. Apply and evaluate Trajectory Planning for rigid robots and mobile robots.
5. Apply the concepts of Motion planning.
6. Apply the concepts of Potential Functions and Visibility Graphs

3. Detailed Theory Syllabus:

Module No	Module	Detailed Content	Hrs.
1	Introduction to Robotics	Robot Classification, Robot Components, Degrees of freedom, Joints, Coordinates, Coordinate frames, workspace, applications, Soft and Hard automation	3
2	Direct and Inverse Kinematics	Homogeneous transformation ,matrices, Inverse transformation matrices, Forward and inverse kinematic equations – position and orientation, Denavit- Hatenberg representation of forward kinematics, Inverse kinematic solutions, 4-axis Scara Robot	8
3	Motions, velocities and dynamic analysis of force	Differential relationship, Jacobian, Lagrangian mechanics, Moments of Inertia, Transformation of forces and moment between coordinate frames	6
4	Trajectory Planning	Trajectory planning, Joint-space trajectory planning, Cartesian-space trajectories	7

5	Motion Planning	Concept of motion planning, Bug Algorithms – Bug1, Bug2, Tangent Bug	5
6	Potential Functions and Visibility Graphs	Attractive/Repulsive potential, Gradient descent, wave-front planner, navigation potential functions, Visibility map, Generalized Voronoi diagrams and graphs	8

4. Suggested Experiments:

1. Forward Kinematics of Cylindrical Robot Coordinates
2. Forward Kinematics of 3 DOF Robot using D-H algorithm
3. Inverse Kinematics of 2 DOF Robots.
4. Inverse Kinematics of 3 DOF Robot
5. Inverse Kinematics of 3 DOF Robot Arm
6. Trajectory using Third Order Polynomial.
7. Simulation of BUG 2 Algorithm
8. Simulation of Tangent BUG
9. Simulation of Potential Field
10. Simulation of Visibility Graphs

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Term Work Assessment: The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 313	Distributed Systems	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 313	Distributed Systems	40	40	40	60	25	25	-	150

1. Course Objectives:

The course is aimed to:

1. To introduce basic concepts, goals, issues of distributed systems.
2. To introduce basic concepts of NOS, DOS and middleware.
3. To understand the concept of Inter process communications ,Message oriented communication, stream oriented communications.
4. To equip students with skills to analyse and design distributed applications.
5. To provide master skills to measure the performance of distributed synchronization algorithms.
6. To study emerging technologies and distributed file systems.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Understand the basic elements and concepts related to distributed systems technologies.
2. Illustrate the middleware technologies that supports distributed applications such as RPC, RMI and object based middleware.
3. Analyse various techniques used for clock synchronization, election of coordinators and distributed mutual exclusion.
4. Demonstrate the concepts of resource and process management.
5. Demonstrate the concepts of consistency and replication.
6. Apply the knowledge of Distributed File System to analyse various file systems like NFS, AFS and the experience in building large-scale distributed applications.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Content	Hrs.
1	Introduction to Distributed Systems	Characterization of Distributed Systems: Issues, Goals, and Types of distributed systems, Distributed System Models, Middleware: Models of Middleware, Services offered by middleware, Comparison between DOS, NOS, middleware.	5
2	Communication	Interprocess communication, Remote Procedure Call (RPC), Remote Object Invocation, Remote Method Invocation (RMI), Message Oriented Communication ((IPC): MPI), Stream Oriented Communication, Group Communication (consistent, absolute, causal ordering)	8

3	Synchronization	Clock Synchronization, Logical Clocks, Election Algorithms, Mutual Exclusion, Distributed Mutual Exclusion-Classification of mutual Exclusion Algorithm Non Token based Algorithms: Lamport Algorithm, Ricart–Agrawala’s Algorithm, Token Based Algorithms: Raymond’s Tree based algorithm(The spanning tree),Comparative Performance Analysis.	8
4	Resource and Process Management	Desirable Features of global Scheduling algorithm, Task assignment approach, Load balancing approach, load sharing approach. Introduction to Process management, process migration, threads, code migration.	6
5	Consistency, Replication and Fault Tolerance	Introduction to replication and consistency, Data-Centric and Client-Centric Consistency Models, Fault Tolerance: Introduction, Reliable client-server, Recovery	6
6	Distributed File Systems and Name Services	Introduction and features of DFS, File models, File Accessing models, File-Caching Schemes, File Replication, Case Study: Distributed File Systems (DSF), Network File System (NFS), Introduction to Name services and Domain Name System, Directory Services	5

4. Suggested Experiments:

1. To implement Remote Procedure Call/Remote Method Invocation.
2. To implement deadlock management in distributed systems.
3. To implement Logical Clock Synchronization algorithm(Lamport clock)
4. To implement an election algorithm.
5. To implement a distributed mutual exclusion algorithm(Token and non token based).
6. To implement Load balancing algorithm
7. To implement a multithreaded application.
8. To implement Name Resolution protocol.
9. Explore Distributed file system
10. Explore Distributed applications like CORBA.
11. Google case study.

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Term Work Assessment: The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

A. Books:

IN
COMPUTER ENGINEERING**

(Semester VI)

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 314	System Programming Compiler Construction	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 314	System Programming Compiler Construction	40	40	40	60	25	25	--	150

1. Course Objectives:

The course is aimed to:

1. To understand the role and functioning of various system programs over application programs.
2. To understand basic concepts and designing of assembler and Macro processor
3. To understand the role of static and dynamic loaders and linkers.
4. To understand the need to follow the syntax in writing an application program and to learn how the analysis phase of a compiler is designed to understand the programmer's requirements without ambiguity.
5. To understand the various parsers used in syntax analysis.
6. To synthesize the analysis phase outcomes to produce the object code that is efficient in terms of space and execution time.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Identify the relevance of different system programs.
2. Describe the various data structures and passes of assembler design.
3. Identify the need for different features and designing of macros.
4. Distinguish different loaders and linkers and their contribution in developing efficient user applications.
5. Construct different parsers for given context free grammars.
6. Justify the need for analysis and synthesis phase to produce object code optimized in terms of high execution speed and less memory usage.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Content	Hrs.
1	Introduction to System Software	Concept of System Software, Goals of system softwares, system program and system programming, Introduction to various system programs such as Assembler, Macro processor, Loader, Linker, Compiler, Interpreter, Device Drivers, Operating system, Editors, Debuggers.	2
2	Assemblers	Elements of Assembly Language programming, Assembly scheme, pass structure of assembler,	8

		Assembler Design: Two pass assembler Design and single pass Assembler Design for Hypothetical machines , data structures used.	
3	Macros and Macro Processor	Introduction, Macro definition and call, Features of Macro facility: Simple, parameterized, conditional and nested. Design of Two pass macro processor for Hypothetical machines, data structures used.	6
4	Loaders and Linkers	Introduction, functions of loaders, Relocation and Linking concept, Different loading schemes: Relocating loader, Direct Linking Loader, Dynamic linking and loading.	6
5	Compilers: Analysis Phase	Introduction to compilers, Phases of compilers: Lexical Analysis- Role of Finite State Automata in Lexical Analysis, Design of Lexical analyser, data structures used Syntax Analysis- Role of Context Free Grammar in Syntax analysis, Types of Parsers: Top down parser- LL(1), Bottom up parser- SR Parser, Operator precedence parser, SLR, Semantic Analysis, Syntax directed definitions.	10
6	Compilers: Synthesis phase	Intermediate Code Generation: Types of Intermediate codes: Syntax tree, Postfix notation, Three address codes: Triples and Quadruples, indirect triple Code Optimization: Need and sources of optimization, Code optimization techniques: Machine Dependent and Machine Independent. Code Generation: Issues in the design of code generator, code generation algorithm. Basic block and flow graph.	8

4. Suggested Experiments:

Software Requirements if any: Basic C, Java

1. Implementations of two pass Assembler
2. Implementation of single pass Macro Processor.
3. Implementation of Lexical Analyzer.
4. Implementation of Parser (Any one)
5. Implementation of Intermediate code generation phase of compiler
6. Implementation of code generation phase of compiler.
7. Study and implement experiments on LEX. YACC

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. **Term Work:** Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. **Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 315	Artificial Intelligence and Cognitive Computing	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 315	Artificial Intelligence and Cognitive Computing	40	40	40	60	25	25	--	150

1. Course Objectives:

The course is aimed to:

1. To Conceptualize basic ideas of artificial intelligence and cognitive science
2. To distinguish various knowledge representation, planning and reasoning techniques.
3. To familiarize with various learning methods and uncertainty handling techniques
4. To distinguish various computational methods of cognitive science.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Understand fundamentals of artificial intelligence and formulate problem statements along with problem solving techniques for intelligent agents.
2. Analyze and apply knowledge representation, planning and reasoning techniques
3. Choose appropriate learning method for given problem
4. Understand and handle uncertainty problems.
5. Understand cognitive computing with AI as the foundation.
6. Analyze and apply appropriate cognitive computational models for complex problems.

3. Software Requirements: Prolog, Python, Tensorflow, PDDL, Keras

4. Detailed Theory Syllabus:

Unit No.	Module	Detailed content	Hrs
1	Introduction to AI with Intelligent Agents and Problem solving techniques	Definition of AI, Types of AI, Application of AI, Definition of agent, types of agent, Automated problem solving, state space search, Informed Search- Best first Search, A*, AO*, Local search techniques- hill climbing- Scholastic, simulated annealing, Game tree search- min-max tree, α - β pruning	7
2	Knowledge, planning	Propositional logic, Propositional Logic to	8

	and Reasoning	Predicate Logic, Predicate Logic Fundamentals, Resolution Refutation, Constraint Satisfaction Problems, Planning - Block world problem, POP, GraphPlan	
3	Learning	Introduction to learning, types, Reinforcement learning-An n-Armed Bandit Problem, Finite Markov Decision Processes, Monte Carlo Methods, Temporal-Difference Learning, Approximate Solution Methods	8
4	Uncertainty	Handling Uncertainty, Axioms of Probability, Belief network, Inferences using belief networks, Dempster-Shafer Theory, Fuzzy Logic- crisp set, fuzzy set, membership function, operation on fuzzy set, fuzzy relation, composition of fuzzy set, fuzzy relation, composition of relation, fuzzy proposition, fuzzification, Defuzzification	7
5	Introduction to Cognitive Computing	Definition and overview of Cognitive Computing, Biological Neurons and Artificial Neural Network (ANN) Models, AI as the Foundation of Cognitive Computing, Architecture of Cognitive Computing.	3
6	Computational Models of Cognition	Definition and importance of Computational Models in Cognitive Science, Overview of Different types of Computational Models- Symbolic models, Connectionist networks, and Bayesian models, Real-world Applications of Cognitive computing and its Computational Models.	5

5.Suggested Experiments:

1. Identify a problem statement for an Intelligent Agent.
 - a. Solve 8 puzzle problem using A* Algorithm
 - b. Solve 8 queen problem using Local Search.
2. Formulate Constraint Satisfaction Problems: Cryptarithmic Problem and Optimization Problem
3. Study of Prolog, PDDL.
4. To implement Plan for given planning problem using PDDL
5. To implement a multi-layer feed forward neural networks for any classification problem.
6. To implement a Bayesian belief network to handle the uncertainty.
7. To perform sentiment analysis on written context.

6.Books and References:

A. Books:

1. Artificial intelligence : A Modern Approach, Stuart Russell, Peter Norvig, Prentice Hall, Fourth edition

2. Reinforcement Learning: An Introduction, Richard S. Sutton and Andrew G. Barto, Second edition.

7. Theory Assessment:

- A. **Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.
- B. **End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
 1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

8 Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

- A. **Term Work:** Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.
- B. **Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 316	Big Data Analysis	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 316	Big Data Analysis	40	40	40	60	25	-	25	150

1. Course Objectives:

The course is aimed to:

1. To provide an overview of an exciting growing field of big data analytics.
2. To introduce the tools required to manage and analyze big data like Hadoop, NoSql Map-Reduce.
3. To introduce programming skills to build simple solutions using big data technologies such as NoSql, Map-Reduce and write the parallel algorithm for multi process execution.
4. To teach the fundamental techniques and principles in achieving big data analytics with scalability and streaming capability.
5. To enable students to have skills that will help them to solve complex real-world problems in decision support.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Understand the key issues in big data management and its associated applications in intelligent business and scientific computing.
2. Acquire fundamental enabling techniques and scalable algorithms like Hadoop, Map Reduce and NO SQL in big data analytics.
3. Interpret business models and scientific computing paradigms, and apply software tools for big data analytics.
4. Achieve adequate perspectives of big data analytics in various applications like recommender systems, social media applications etc.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Content	Hrs.
1	Overview Of big data analytics	Introduction to Big Data, Big Data characteristics, types of Big Data, Traditional vs. Big Data business approach Big Data Challenges, Examples of Big Data in Real Life, Big Data Applications	3
2	Data analytics using MapReduce/ Hadoop	Introduction to Big Data Frameworks: Hadoop, Core Hadoop Components; Hadoop Ecosystem-Overview, Hadoop Limitations. MapReduce: The Map Tasks, Grouping by Key, The Reduce Tasks, Combiners, Details of MapReduce Execution, Coping With Node Failures. Algorithms Using MapReduce: Matrix-Vector Multiplication by MapReduce, Relational-Algebra Operations, Computing Selections by MapReduce, Computing Projections by MapReduce, Union, Intersection, and Difference by MapReduce	10
3	No SQL	Introduction to NoSQL, NoSQL Business Drivers, NoSQL Data Architecture Patterns: Key-value stores, Graph stores, Column family	6

		(Bigtable)stores, Document stores, Variations of NoSQL architectural patterns, NoSQL Case Study, NoSQL solution for big data, Understanding the types of big data problems; Analyzing big data with a shared-nothing architecture; Choosing distribution models: master-slave versus peer-to-peer; NoSQL systems to handle big data problems.	
4	Mining Data Streams	The Stream Data Model: A Data- Stream-Management System, Examples of Stream Sources, Stream Queries, Issues in Stream Processing. Sampling Data in a Stream : Sampling Techniques. Filtering Streams: The Bloom Filter Counting Distinct Elements in a Stream : The Count-Distinct Problem, The Flajolet-Martin Algorithm, Combining Estimates, Space Requirements . Counting Ones in a Window: The Cost of Exact Counts, The Datar-Gionis-Indyk-Motwani Algorithm, Query Answering in the DGIM Algorithm.	12
5	Finding Similar Items and Clustering	Distance Measures: Definition of a Distance Measure, Euclidean Distances, Jaccard Distance, Cosine Distance, Edit Distance, Hamming Distance. CURE Algorithm, Stream-Computing , A Stream-Clustering Algorithm, Initializing & Merging Buckets, Answering Queries.	10
6	Real-Time Big Data Models	PageRank Overview, Efficient computation of PageRank: PageRank Iteration Using MapReduce, Use of Combiners to Consolidate the Result Vector. Introduction to Recommendation System: content based Recommendation System, collaborative Recommendation System, hybrid Recommendation System. Issues and challenges Recommendation System ,	4

4. Suggested Experiments:

Software Requirements if any: Windows / Linux Desktop OS / Kali Linux, Hadoop, R studio, MongoDB

1. HDFS Basics, Hadoop Ecosystem Tools Overview.
Installing Hadoop.
2. Copying File to Hadoop.
3. Copy from Hadoop File system and deleting file.
4. Moving and displaying files in HDFS.
5. Programming exercises on Hadoop.
6. To install and configure MongoDB/ Cassandra/ HBase/ Hypertable to execute NoSQL commands.
7. Experiment on Hadoop Map-Reduce / PySpark:
8. Write a program to implement a word count program using MapReduce.
9. Implementing simple algorithms in Map-Reduce: Matrix multiplication, Aggregates, Joins, Sorting, Searching, etc.
10. Implementing DGIM algorithm using any Programming Language/ Implement Bloom Filter using any programming language
11. Implementing any one Clustering algorithm (K-Means/CURE) using Map-Reduce
12. Mini Project: One real life large data application to be implemented (Use standard Datasets available on the web)

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Term Work Assessment: The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

A. Books:

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE3 317	Advanced System Security	Contact Hours	3	2	—	5
		Credits	3	1		4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA2	Average					
CE 317	Advanced System Security	40	40	40	60	25	—	25	150

1. Course Objectives: The course is aimed to:

1. To understand Attack Vectors and underlying principles of Access Control Policies.
2. To understand Programming oversights and Targeted Malicious Code.
3. To explore Operating System vulnerabilities, and Authentication Methods.
4. To explore Database System vulnerabilities and Security Requirements to secure Database.
5. To explore web applications vulnerabilities and Social Engineering Attacks.
6. To explore Wireless Security Protocols and Protection mechanisms of wireless networks.

2. Course Outcomes: At the end of the course learner will able to:

1. Students will be able to identify and analyze attack vectors and demonstrate knowledge of principles and implementation of access control policies to mitigate threats.
2. Students will understand common programming vulnerabilities, such as buffer overflows, and evaluate strategies to defend against targeted malicious code.
3. Students will demonstrate the ability to analyze and secure operating system vulnerabilities, while applying robust authentication mechanisms to enhance system security.
4. Students will identify and address database vulnerabilities, ensuring the implementation of security requirements for protecting sensitive data.
5. Students will be able to detect and defend against vulnerabilities in web applications, while understanding and mitigating risks posed by social engineering attacks.
6. Students will explore wireless security protocols, analyze their vulnerabilities, and implement protection mechanisms to secure wireless networks effectively.

3. Prerequisite: Cryptography and System Security

4. Detailed Theory Syllabus

Module No.	Module Name	Detailed Contents	Hrs
1	Introduction & Access Control	1.1 Vulnerabilities, Threats, Risk, controls, Security Functional Requirements, Classifying Attack Vectors-Spoofing, IP Address Spoofing, MAC Address Spoofing, Email Spoofing, Password Attacks, Dictionary Attack, Brute-Force Attack, Reconnaissance Attacks, Ping Scans, Port Scans, OS Fingerprinting, Buffer Overflow, DoS, TCP SYN Flood, Ping of Death, DDoS, Direct DDoS, Reflection, Man-in-the-Middle Attack, ARP Poisoning 1.2 Access Control Policies: DAC, MAC, Multilevel Security Models: Biba Model, Bell LaPadula Model, Single Sign on, Federated Identity Management.	08
2	Programming Security	Malicious and Non-Malicious programming errors, Targeted Malicious codes: Salami Attack, Linearization Attack, Covert Channel, Control against Program threats.	06
3	OS Security	3.1 Operating System Security: Memory and Address protection, File Protection Mechanism, Authentication Methods 3.2 Linux and Windows: Vulnerabilities, File System Security.	08
4	Database Security	Introduction to Databases, The Need For Database Security, Security Requirements of Databases, Reliability and Integrity of Databases, Database Disclosure	04
5	Web Application Security	OWASP, Web Security Considerations, User Authentication and Session, Management, Cookies, SSL, HTTPS, SSH, Privacy on Web, Web Browser Attacks, Account Harvesting, Web Bugs, Clickjacking, Cross-Site Request Forgery, Session Hijacking and Management, Social Engineering, Phishing/Pharming, Prevention, Malware, Data Loss and Exfiltration, Web Service Security	08
6	Wireless Security	Wi-Fi Security, WEP, WPA, WPA-2, Mobile Device Security- Security Threats, Device Security, GSM and UMTS Security, IEEE 802.11/802.11i Wireless LAN Security	05

5. Suggested Experiments:

1. Implementing sLayer 2 Attacks
2. Static code analysis using open source tools like RATS, Flawfinder etc.
3. Vulnerability scanning using Nessus, Nikto (Kali Linux)
4. Explore web-application vulnerabilities using open source tools like Wapiti, browser exploitation framework (BeEf), etc.
5. Detect SQL injection vulnerabilities in a website database using SQLMap
6. Account Harvesting using Harvester tool
7. Detect Cross Site Scripting vulnerabilities
8. Social Engineering Attack (Phishing)
9. Install and use a security app on an Android mobile (e.g. Droidcrypt)
10. Wifi Password Cracking using aircrack-ng

11. Password cracking using Hydra, John the ripper.

6. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
 1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

7. Term Work Assessment: The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

- A. Term Work:** Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.
- B. Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 318	Internet of Everything	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 318	Internet of Everything	40	40	40	60	25	-	25	150

1. Course Objectives:

The course is aimed to:

1. To learn the concepts of IOT.
2. To identify the different technologies.
3. To learn different applications in IOT.
4. To learn different protocols used in IOT.
5. To learn the concepts of smart city development in IOT.
6. To learn how to analyze the data in IOT.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Apply the concepts of IOT.
2. Identify the different technologies.
3. Apply IOT to different applications.
4. Analysis and evaluate protocols used in IOT.
5. Design and develop smart city in IOT.
6. Analysis and evaluate the data received through sensors in IOT.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Content	Hrs.
1	Introduction	Definition of Internet of Everything (IoE), Pillars of IoE, Relationship between M2M, IoT and IoE, Objects and Identifier.	3
2	RFID Technology	Introduction, Principle, Components and Architecture of RFID, RFID middleware, Issues in RFID, IPv6 Addressing Schemes and Electronic Product Code, RFID Applications and case studies, Hardware issues.	8
3	RFID Protocols	Types of Protocols : Pure, Slotted, Frame slotted ALOHA, Tree protocols, Tree splitting algorithms, Binary search algorithms, Bitwise arbitration protocols, Main query tree protocols. Basic Differences between protocols.	8
4	Communication Protocols and Localization	Introduction to Wireless Sensor Network, Protocols: MQTT, CoAP, REST Transferring data, Basic Difference between Protocols, Security IoT Protocols and Technology: CoAP and DTLS, Localization, mobility management	8
5	Industrial Internet of Things	Introduction ,Industry 4.0 , Industrial Internet of Things (IIoT) , IIoT Architecture , Basic Technologies Applications and Challenges	8
6	Data Analytics for IoE	Big Data Analytics, Cloud and Fog Computing in the Internet of Things: IoT System Requirements, Cloud Computing in	4

		IoT ,Advantages of Using the Cloud for IoT, Examples of Cloud - Based IoT	
--	--	---	--

4. Suggested Experiments:

Software Requirements if any: Arduino IDE, Tinkercad, Proteus

1. Create a Problem statement based on Survey, identify the Hardware and software requirement for their mini project problem statement.
2. Study of IoT architecture with respect to your mini project.
3. Identify and design the required hardware and sensors for your circuit board configuration.
4. Use suitable software and an emulator for coding the input devices and sensors.
5. Interface hardware with Web to publish or remotely access the data on the Internet.
6. Analyze the readings obtained in the project and identify its future scope
7. Documentation (PPT + Report) of mini-project and technical paper writing.

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Term Work Assessment: The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

AY 2022-23

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 319	Blockchain Technology	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 319	Blockchain Technology	40	40	40	60	25	-	25	150

1. Course Objectives:

The course is aimed to:

1. Understand how blockchain systems work
2. To securely interact with Blockchains
3. Integrate ideas from blockchain technology into their own projects.
4. Understand distributed consensus mechanisms
5. Understand the concepts of decentralization in blockchain
6. Design, build, and deploy smart contracts and distributed applications using cryptocurrency

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Able to explore the working of blockchain systems
2. Able to securely interact with Blockchains
3. Able to Integrate ideas from blockchain technology into their own projects.
4. Able to explore distributed consensus mechanisms
5. Able to identify the concepts of decentralization in blockchain
6. Able to Design, build, and deploy smart contracts and distributed applications using cryptocurrency.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Content	Hrs.
1	Introduction to Blockchain Technology	Introduction, Advantage over conventional distributed database, Blockchain Network, Mining Mechanism, Merkle Patricia Tree, Gas Limit, Transactions and Fee, Anonymity, Reward, Chain Policy, Life of Blockchain application, Revolutionizing the Traditional Business Network, Tracing Blockchain's Origin, Key concepts of blockchain,	5
2	Blockchain 101	The growth of blockchain technology, Generic elements of a blockchain, Benefits and limitations of blockchain, Working principle, Types of blockchain, Tiers of blockchain technology, Features of a blockchain	6
3	Blockchain in Action: Use Cases	Financial Services, Insurance, Government, Supply Chain Management, Healthcare, Healthcare payments pre-authorization, The Internet of Things (IoT)	6
4	Distributed Consensus	Consensus mechanism, Types of consensus mechanisms, The structure of the network: consensus algorithm, CAP theorem and blockchain, SybilAttack, Energy utilization and alternate.	7
5	Decentralization Concepts in BlockChain	Decentralization using blockchain, Methods of decentralization, Routes to decentralization, Blockchain and full ecosystem decentralization, Smart contracts, Definition, Ricardian contracts,	8

		Smart contract templates, Deploying smart contracts on a blockchain. Ethereum: Concept, notion of decentralization, Ethereum mining, forking, and block architecture, Ethereum wallets and client interfaces, Comparison to bitcoin,.	
6	Cryptocurrency	History, Distributed Ledger, Hyperledger, a Linux Foundation Project, Bitcoin protocols - Mining strategy and rewards, Ethereum - Construction, DAO, GHOST, Vulnerability, Attacks, Sidechain.	7

4. Suggested Experiments:

Software Requirements if any: Python, Java Scripts, Geth

1. Implementation of any symmetric and asymmetric cryptosystem.
2. Simple blockchain implementation in any suitable programming language
3. Block chain implementation with database
4. Smart contract with token/coin.
5. Smart Contract to solve/optimize a problem using Ethereum
6. Use Geth to Implement Private Ethereum BlockChain
7. Create a DApp, with Ethereum
8. Build Hyperledger Fabric Client Application.
9. Build Hyperledger Fabric with Smart Contract
10. Create a Case study of BlockChain being used in illegal activities in the real world.

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Term Work Assessment: The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

AY 2022-23

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 320	Natural Language Processing	Contact Hours	03	02	-	5
		Credits	03	01	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 320	Natural Language Processing	40	40	40	60	25	--	25	150

Course objectives: The course is aimed to:

1. Understand the principles of natural language processing.
2. Acquire knowledge in fundamental morphological analysis, word embedding, and text processing techniques.
3. Develop proficiency in POS tagging, parsing techniques, and grammar formalisms.
4. Recognize the significance in semantic, pragmatic, and discourse analysis in enhancing natural language understanding.
5. Gain a comprehensive understanding of language modeling, Transformer architecture, and Large Language Models (LLMs) for NLP tasks.
6. Develop practical applications using Natural Language Processing techniques.

Course outcomes: On successful completion of course learner should be able to:

1. Demonstrate understanding of the principles of natural language processing and apply them to various applications.
2. Acquire expertise in fundamental morphological analysis, word embedding, and text processing techniques.
3. Demonstrate mastery in POS tagging, parsing techniques, and grammar formalisms.
4. Apply semantic, pragmatic, and discourse analysis effectively for enhanced natural language understanding.
5. Demonstrate proficiency in implementing language modeling, Transformer architecture, and Large Language Models (LLMs) for NLP tasks.
6. Apply the principles of natural language processing into various real world applications.

Prerequisite: Data structure & Algorithms, Theory of computer science, Probability Theory.

Sr. No.	Module	Detailed Content	Hours	CO Mapping
I	Introduction	Introduction to Natural Language Processing (Natural Language, Importance of NLP, Knowledge of Language, Use of NLP), History of NLP, Natural Language Generation, Natural Language Understanding, Ambiguity in Natural language, Stages in NLP, Generic NLP System, Challenges of NLP	6	CO 1
II	Morphology Analysis	Morphological analysis: prefixes, suffixes, and root words, Inflectional morphology & Derivational morphology, Stemming and Lemmatization, Word	7	CO 2

		embeddings: Representing words numerically (Bag-of-words :Tf/IDF, Count vector, Word2Vec, Doc2Vec, GloVe, fastText), Text Processing (tokenization, text filtration, script validation, stop words)		
III	Syntax Analysis	Parts-of-speech (POS) tagging and techniques (Rule based, Transformation-Based Tagging Hidden Markov Models, Stochastic Tagging) Parsers: Constituency parsing and dependency parsing techniques. Grammar formalisms: Context-Free Grammars (CFGs) and dependency grammar. Top down parser; Bottom Up Parser	6	CO 3
IV	Semantic, Pragmatic and Discourse Analysis	Semantic Analysis: Lexical semantics and word-sense disambiguation. Compositional semantics. Semantic Role Labeling and Semantic Parsing, Vector Space Models of Semantics Pragmatic Analysis: Pragmatic analysis and understanding Discourse analysis: Cohesion, coherence, and Coreference Resolution	6	CO 4
V	Language Models	Introduction to Language Models. N-gram language models and their limitations. Recurrent Neural Networks (RNNs) for Language Modeling. Advanced RNN Variants: LSTMs and GRUs for Language Modeling. Attention Mechanisms. Transformer Architecture. Pre-trained Language Models (BERT) and Transfer Learning. Fine-Tuning Pre-trained Models. Introduction to Large Language Models (LLMs): GPT	7	CO 5
VI	Applications of NLP	Machine Translation, Information Retrieval, Question Answers System, Text Categorization, Summarization, Sentiment analysis, Named Entity Recognition, Plagiarism Detection, Text Extraction, Text Generation	6	CO 6

4. Suggested Experiments:

- A. Write a program to apply various text processing techniques that demonstrates tokenization, filtering, and script validation of text
- B. Write a program that demonstrates techniques for stemming and lemmatization
- C. Write a program to perform morphological analysis and word generation for any given text
- D. Write a program to demonstrate rule based Part of Speech Tagging and Named Entities Recognition
- E. Write a program to generate parse tree from text and extract noun and verb phrase of English Text
- F. Write a program to demonstrate semantic analysis using a vector database and word embeddings.
- G. Write a program to demonstrate n-gram language model

H. Natural Language Processing case study for News classification

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hours.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

AY 2022-23

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 321	Network and Cloud security	Contact Hours	3	2	—	5
		Credits	3	1		4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA2	Average					
CE 321	Network and Cloud security	40	40	40	60	25	—	25	150

1. Course Objectives:

- 1.To implement robust security measures for the routing process, ensuring the integrity, confidentiality, and availability of network communications.
- 2.To identify, analyze, and mitigate Layer 2 attacks in network environments.
- 3.Understand the principles and practices of VLAN security to effectively design, implement, and manage secure virtual local area networks.
- 4.Understand VPN security protocols to ensure secure remote access and data protection in network communications.
- 5.understanding of firewall policies and prevention techniques to effectively secure network infrastructures against unauthorized access and cyber threats.
6. To explore cloud privacy and Security.

2. Course Outcomes: At the end of the course learner will able to

- 1.Students will be able to implement and evaluate security measures to protect the routing process against vulnerabilities and attacks
- 2 Students will be able to identify, analyze, and implement effective mitigation strategies against Layer 2 attacks in network environments..
- 3 Demonstrate the ability to understand, configure, and implement VLAN security measures to protect network integrity and data confidentiality.
- 4.Students will be able to effectively implement, and manage VPN security protocols to ensure secure remote access and data protection in various network environments.
- 5.Equip learners with the knowledge and skills to effectively understand, configure, and manage firewalls for optimal network security and prevention of unauthorized access.
6. To be able to apply the knowledge of security for cloud data storage and secure server client configuration.

3. Prerequisite: Cryptography and System Security,computer networks

4. Detailed Theory Syllabus

Module No.	Module Name	Detailed Contents	Hrs
1	Securing the Routing Protocols	Network topologies- CAN, WAN, Data Center,SOHO,Virtual, Network Security Zones-demilitarized zone, Intranet and Extranet,VLAN Securing the Routing Process - Security on Cisco routers-Configuring SSH Access, Configuring Privilege Levels in IOS, Configuring IOS Role-Based, IOS Resilient Configuration Securing routing protocols- OSPF Routing Update authentication,EIGRP Routing Update Authentication	06
2	Securing the Data link layer Protocols	Layer 2 Attacks- STP attacks,ARP spoofing,MAC spoofing, CAM table overflows,CDP/LLDP reconnaissance,VLAN hopping,DHCP spoofing Configuring DHCP Snooping,Dynamic ARP Inspection,Port Security,STP Security Features,Disabling DTP	06
3	VLAN Security	VLAN Security-Native VLANs,PVLANs,PVLAN Edge,PVLAN Proxy Attack,ACLs on Switches-Port ACLs-VLAN ACLs Secure management-AUX Port,VTY Ports,Console Port,Securing Network Management-SSH,HTTPS,ACLs,SNMPv3 AAA concepts,802.1x Components-RADIUS and TACACS+ Technologies-Local AAA Authentication and Accounting-SSH Using AAA-Authentication and Authorization Using ACS and ISE-Integration of Active Directory with AAA	08
4	VPN Security	VPNs,IPsec,Protocols,Internet Key Exchange,Internet Security Association Key Management Protocol,ESP,IPsec with IPV6,Configuring VPNs,Remote access VPN,Site-to-site VPN	05
5	Firewall Configuration	Understanding Firewalls,-Packet Filtering-Proxy Firewalls-Application Firewall-Stateful vs. Stateless Firewalls-Configuring NAT and Zone-Based Firewalls-Implementing NAT on ASA,Configuring Zone-Based Firewalls-Configuring the Firewall on an ASA Intrusion Prevention-IPS Terminology-Evasion Techniques-Understanding Modes of Deployment-Positioning of the IPS within the Network-Understanding False Positives, False Negatives, True Positives, and True Negatives	08
6	Email and Cloud Security	Spam filtering, anti-malware filtering, DLP, blacklisting, email encryption Local and cloud-based web proxies-Blacklisting, URL filtering, malware scanning, URL categorization, web application filtering, TLS/SSL decryption Cloud Identity and Access Management, Cloud Security as a Service, SAML, OAuth	06

5. Suggested Experiments:

- 1.Reconnaissance Attacks
- 2 Configure multiple privilege levels
- 3.Configure Cisco IOS role-based CLI access
- 4.Implement routing update authentication on OSPF
- 5.Implementing EIGRP Routing Update Authentication
- 6.Implement DHCP snooping
- 7.Implement Dynamic ARP Inspection
- 8.Implement port security
- 9.Native VLANs ,PVLAN,Port ACLs
- 10.Configuring and verifying secure access through SNMP v3 using an ACL
- 11.Local AAA Authentication and Accounting
- 12.SSH Using AAA
- 13.Configuring Remote Access VPNs
- 14.Configuring Site-to-Site VPNs
- 15.Implementing NAT on ASA 9.x
- 16.Implementing Firewall with DHCP
- 17.Implementing AAA and SSH
- 18.Implementing Firewall with inspection policies
- 19.Implementing security level specification
- 20.Implementing oauth

6. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

7. Term Work Assessment: The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

- A. Term Work:** Term Work shall consist of practical's based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.
- B. Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

Text Books:

1. Computer Security Principles and Practice, William Stallings, Sixth Edition, Pearson Education
2. Security in Computing, Charles P. Pfleeger, Fifth Edition, Pearson Education
3. Network Security and Cryptography, Bernard Menezes, Cengage Learning
4. Network Security Bible, Eric Cole, Second Edition, Wiley

Reference Books:

2. CCNA security guide, Troy McMillan, CYbex Wiley brand

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 322	Digital Image Processing	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 322	Digital Image Processing	40	40	40	60	25	--	25	150

1. Course Objectives:

The course is aimed to:

1. To learn about sampling and reconstruction
2. To understand spatial domain image enhancement techniques.
3. To apply image transform operations like DFT and DCT
4. To learn about edge detection techniques
5. To understand image compression techniques like Huffman coding
6. To understand binary image processing operations

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Sample and Reconstruct a signal.
2. Implement Image Enhancement Techniques.(**Apply Image Enhancement Techniques.**)
3. Implement operations like DFT and DCT (image transform
4. Implement Edge Detection techniques using first order Derivative Filters.(**Analyse Edge Detection techniques**)
5. Implement Image Compression Algorithms
6. Perform Binary Image Processing Operations.

3. Detailed Theory Syllabus:

Prerequisite: Computer CGVR

Module No	Module	Detailed Contents of Module	Hrs.
1	Image Fundamentals	Introduction, Origin, Fundamental Steps in Digital Image Processing, Applications of Digital Image Processing, Components of digital image processing system, Image Sampling and Quantization, Pixel connectivity, Distance Transform	5
2	Enhancement in Spatial Domain	Introduction, Point Operation, Zero memory point operations , Histogram Processing, Image smoothening, Sharpening of the Image.	8
3	Image Transforms	Introduction, Need for transform, Fourier Transform, 2D Discrete Fourier Transform, Properties of 2D DFT(without proof), Hadamard Transform, Walsh Transform, FFT, Discrete Cosine Transform (2D-DCT), Introduction to wavelet transform	8

4	Image Segmentation	Introduction, Classification, region based segmentation, Image segmentation based on thresholding- Local and Global, Segmentation based on discontinuities - Edge , line and Point Detection	8
5	Image Compression	Introduction, Redundancy, Fidelity Criteria, Classification of Image Compression Techniques, Run-length Coding, Huffman Coding, Improved Gray Scale Quantization, Vector Quantization	7
6	Binary Image Processing	Introduction, Structuring element, Binary Morphological Operators, Hit-or-Miss Transformation, Boundary Extraction	3

4. Suggested Experiments:

Software Requirements if any:

1. Sampling and Reconstruction
2. To perform Discrete Correlation
3. To perform Discrete Convolution
4. To perform Discrete Fourier Transform
5. To perform Fast Fourier Transform
7. Implementation of Image negative, Gray level Slicing and Thresholding
8. Implementation of Contrast Stretching ,Dynamic range compression & Bit plane Slicing
9. Implementation of Histogram Processing
10. Implementation of Image smoothing/ Image sharpening
11. Implementation of Edge detection using Sobel and Prewitt masks

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

CE 323	Human Computer Interaction	40	40	40	60	25	--	25	150

1. Course Objectives :

The course is aimed to:

1. Understand the history of screen designing.
2. Understand the importance of human characteristics, design goals and business functions in interface design.
3. Understand functions of Menus, Windows and importance of graphical user interface.
4. Understand characteristics and selection of device based controls.
5. Understand different types of software tools to design interfaces.
6. Understand various design technologies to meet user requirements..

2. Course Outcomes :

On successful completion of course learner/student will be able to:

1. Describe and apply core theories, models and methodologies from the field of HCI
2. Identify User Interface (UI) design principles.
3. Apply an interactive design process and universal design principles to designing HCI systems.
4. Evaluate interactive software using guidelines from human factor theories.
5. Conduct user and task analysis
6. Implement graphical user interfaces with modern software tools

3. Detailed Theory Syllabus:

Prerequisite: GUI Basics

Module No	Module	Detailed Contents of Module	Hrs.
1	Overview of HCI	Introduction: Importance of user Interface – definition, importance of good design. Benefits of good design. A brief history of Screen design. The graphical user interface – popularity of graphics, the concept of direct manipulation, graphical system, Characteristics, Web user – Interface popularity, characteristics- Principles of user	5
2	Design process	Design process: Human interaction with computers, importance of human characteristics, human consideration, and Human interaction speeds, understanding business functions. Screen Designing : Design goals – Screen planning and purpose, organizing screen elements, ordering of screen data and content – screen navigation and flow – Visually pleasing composition – amount of information – focus and emphasis – presentation information simply and meaningfully – information retrieval on web – statistical graphics – Technological consideration in interface design	8
3	System Menus	System Menus – Structures of Menus, Functions of Menus, Content of Menus, Kinds of Graphical menus. Windows – New and Navigation schemes selection of window, selection of devices based and screen based controls. Graphics: Icons, Multimedia, colors, uses problems, choosing colors.	5
4	Controls	CONTROLS: Characteristics of device based controls, Selecting the proper device based controls, Operable controls, Text Entry/Read-only controls, Selection controls, Combination Entry/selection controls, Selecting the proper controls.	5
5	HCI in the software process,	HCI in the software process, The software life cycle Usability engineering Iterative design and prototyping Design Focus: Prototyping in practice Design rationale Design rules Principles to support usability Standards Golden rules and heuristics HCI patterns Evaluation techniques, Goals of evaluation, Evaluation through expert analysis, Evaluation through user participation, Choosing an evaluation method. Universal design, Universal design principles Multimodal interaction	8
6	Software Tools	SOFTWARE TOOLS: Specification methods, Interface, Building tools, Interaction devices, Keyboard and function keys, Pointing devices, Speech recognition digitization and generation, Image and video displays, Drivers.	5

4. Suggested Experiments:

1. To understand the trouble of interacting with machines – Redesign interfaces of home appliances.
2. Design a system based on a user-centered approach.
3. Understand the principles of good screen design.
4. Redesign existing Graphical User Interface with screen complexity
5. Design Web User Interface
6. Implementation of Different Kinds of Menus

7. Implementation of Different Kinds of Windows
8. Design a system with proper guidelines for icons
9. Design website using interface design rules
10. Design mobile app using interface design rules

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

A. Books:

1. The essential guide to user interface design, Wilbert O Galitz, Wiley DreamTech.
2. Designing the user interface. 3rd Edition Ben Shneidermann , Pearson Education Asia.
3. Alan Dix, Janet Finlay, Gregory Abowd, Russell Beale, "Human Computer Interaction", 3rd Edition, Pearson Education, 2004.

B. References:

1. Human – Computer Interaction. Alan Dix, Janet Fincay, Gre Goryd, Abowd, Russell Bealg, Pearson Education.
2. Interaction Design Prece, Rogers, Sharps. Wiley Dreamtech,
3. User Interface Design, Soren Lauesen , Pearson Education.
4. Donald A. Norman, "The design of everyday things", Basic book

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 360	Entrepreneurship	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 360	Entrepreneurship	40	40	40	60	-	-	--	100

Course Objectives:

1. To understand the basic concepts of entrepreneurship.
2. To understand the role of entrepreneurship in economic development
3. To understand the importance of opportunity recognition and internal and external analyses to the success of a business venture
4. To enable the learners to know the factors contributed in failure of the enterprise

Course Outcomes: Learner will be able to

1. Analyse the business environment in order to identify business opportunities
2. Identify the elements of success of entrepreneurial ventures
3. Evaluate the effectiveness of different entrepreneurial strategies,
4. Interpret their own business plan

Module	Detailed Contents	Hrs
1	Conceptual definition of entrepreneurs and entrepreneurship, Advantages and Disadvantages of Being an Entrepreneur , Entrepreneurial motivation, Entrepreneurial characteristics	8
2	Recognizing, assessment and Exploiting the Opportunity, Conducting Internal and External Analyses, Determining the Feasibility of the Concept, Selecting a Marketing Strategy	6
3	Entrepreneurial Business Types A. Overview of Franchising and Their Advantages and Disadvantages B. Overview of Buyouts & Their Advantages and Disadvantages C. Overview of Family Businesses and Their Advantages and Disadvantages	6
4	The Overall Business Plan, Purpose of the Business Plan, Components of the Business Plan, Presentation of the Business Plan, Matching the Business Plan to the Needs of the Firm	6
5	The Marketing Plan, Conducting a Market Analysis, Understanding the Target Market, Reaching the Target Market through Locale and Engagement	8
6	Entrepreneurial failure, early stage failure, late stage failure	6

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks

2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Reference Books:

1. Fundamentals of Entrepreneurship by H. Nandan, PHI
2. Entrepreneurship by Robert Hisrich, Michael Peters, Dean Shepherd, Sabyasachi Sinha, Mc Graw Hill
3. Why startups fail: A new roadmap for entrepreneurial success by Tom Eisenmann

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 361	E-Commerce and E-Business	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 361	E-Commerce and E-Business	40	40	40	60	-	-	--	100

Course Objectives:

1. To understand the factors needed in order to be a successful in ecommerce
2. Identify advantages and disadvantages of technology choices such as merchant server software and electronic payment options.
3. Analyse features of existing e-commerce businesses, and propose future directions or innovations for specific businesses.

Course Outcomes: Learner will be able to

1. Appreciate the global nature and issues of electronic commerce as well as understand the rapid technological changes taking place.
2. Define and differentiate various types of E-commerce
3. Discuss various E-business Strategies.

Module	Detail Content	Hrs.
1	E-commerce system: Introduction- scope of electronics commerce, definition of e-commerce, difference between e-commerce and e-business, business models of e-commerce transactions. E-commerce infrastructure: client server technology, two tier client server architecture for e-commerce, drawbacks, three tier architecture for e-commerce.	8
2	Business strategies for e-commerce: Introduction- elements of e-commerce strategy, simplicity, mobile responsiveness, choosing e-commerce store platform, user-based focus, compliance and security measures, e-commerce strategy: strategy overview, strategy task, technology issues. Case study: Flipkart v/s Amazon, competitive edge, marketing strategy, sales strategy	8
3	Design of E-commerce systems: e-commerce types- electronic market, electronics data interchange EDI, modeling of e-commerce system, three tier component model of e-commerce system, e-commerce system design- data model, web modeling, database structure design, process model, user friendly design of e-commerce site.	7
4	Technologies for e-commerce systems: Introduction- technologies for e-commerce, PHP and Java script, SEO, Social Plugins, payment processes, SSL Encryption, hosting server, Service oriented architecture.	7
5	Scalability of e-commerce systems: Web scalability- Vertical scalability , horizontal scalability, Load balancing- working of load balancers, global	6

	server load balancers, cloud load balancing- goals of cloud balancing, automated cloud balancing. web caching and buffering	
6	E-commerce system implementation: E-commerce implementation, - website testing, web maintenance, web advertisement, copyright services, SMS alert services, bulk email services, Web personalization- techniques for gathering information, analysis techniques for website personalization, domain name registration and web hosting- different types of web hosting, different components of web hosting, features in web hosting.	6

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Reference Books:

1. Electronic Business and Electronic Commerce Management, 2nd edition, Dave Chaffey, Prentice Hall, 2006
2. Elias. M. Awad, " Electronic Commerce", Prentice-Hall of India Pvt Ltd.
3. E-Commerce Strategies, Technology and applications (David Whitley) Tata McGrawHill
4. E-business- theory and practise, Brahm Canzer, cengage learning
5. Secure e-commerce systems (Kindle edition), Amazon publishing, P S Lokhande, B B Meshram, first edition

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 362	Research Methodology	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 362	Research Methodology	40	40	40	60	-	-	--	100

Course Objectives:

1. To understand Research and Research Process
2. To acquaint students with identifying problems for research and develop research strategies
3. To familiarize students with the techniques of data collection, analysis of data and interpretation

Course Outcomes: At the end of the course learner will be able to

1. Prepare a preliminary research design for projects in their subject matter areas.
2. Accurately collect, analyse and report data.
3. Present complex data or situations clearly.
4. Review and analyse research findings.

Module	Detail Content	Hrs.
1	Introduction and Basic Research Concepts 1.1 Research – Definition; Concept of Construct, Postulate, Proposition, Thesis, Hypothesis, Law, Principle. Philosophy and validity of research 1.2 Objectives of Research 1.3 Characteristics of Research: Systematic, Valid, Verifiable, Empirical and Critical 1.4 Need of Research in Business and Social Sciences 1.5 Issues and Problems in Research	8
2	Types of Research 2.1. Pure and Applied Research 2.2. Descriptive and Explanatory Research 2.3. Analytical Research 2.4 Qualitative and Quantitative Approaches 2.5 Literature review 2.6 Developing the objectives.	8
3	Research Design and Sample Design 3.1 Research Design – Meaning, Types and Significance 3.2 Sample Design – Meaning and Significance Essentials of a good sampling Stages in Sample Design Sampling methods/techniques Sampling Errors	7

4	Research Methodology 4.1 Meaning of Research Methodology 4.2. Stages in Scientific Research Process: a. Identification and Selection of Research Problem b. Formulation of Research Problem c. Review of Literature d. Formulation of Hypothesis e. Formulation of research Design f. Sample Design g. Data Collection h. Data Analysis i. Hypothesis testing and Interpretation of Data j. Preparation of Research Report	8
5	Formulating Research Problem 5.1 Considerations: Relevance, Interest, Data Availability, Choice of data, Analysis of data, Generalization and Interpretation of analysis.	4
6	Outcome of Research 6.1 Preparation of the report on conclusion reached. 6.2 Validity Testing & Ethical Issues 6.3 Suggestions and Recommendation 6.4 Identification of future scope	4

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Books/References:

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 363	Introduction to Bioengineering	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 363	Introduction to Bioengineering	40	40	40	60	-	-	--	100

Course Objectives:

1. To understand and analyze the human body as a mechanical assembly of linkages and describe the fundamentals of biomechanics.
2. To Study the deformability, strength, visco elasticity of bone and flexible tissues, modes of loading and failure and describe the types and mechanics of skeletal joints.
3. To describe movement precisely, using well defined terms (kinematics) and also to consider the role of force in movement (kinetics).
4. To teach students the unique features of biological flows, especially constitutive laws and boundaries.
5. To teach students approximation methods in fluid mechanics and their constraints.
6. To consider the mechanics of orthopedic implants and joint replacement , mechanical properties of blood vessels and Alveoli mechanics

Course Outcomes: Learner will be able to

1. Apply a broad and coherent knowledge of the underlying principles and concepts of biomechanics, particularly in the fields of kinematics and kinetics as applied to human and projectile motion.
2. Understand and describe the properties of blood , bone and soft tissues like articular cartilage tendons and ligaments.
3. Gain broad knowledge about the mechanics of moving systems and familiarity with human anatomy to competently analyze gross movement of the human body.
4. Be able to computationally analyze the dynamics of human movement from the most commonly used measurement devices in the field, such as motion capture and force platform systems.
5. Use knowledge gained to competently interpret the current understanding of human movement and present recommendations for further study.

Module	Detail Content	Hrs.
1	Introduction: Definition of Biomechanics, Selected Historical highlights, The Italian Renaissance, Gait century, Engineering Physiology & Anatomy	6
2	Tissue Biomechanics: Bone structure & composition mechanical properties of bone, cortical and cancellous bones, viscoelastic properties, Maxwell & Voight models – anisotropy. Structure and functions of Soft Tissues: Cartilage, Tendon, Ligament, and Muscle	8

3	Joints Biomechanics: Skeletal joints, forces and stresses in human joints, Analysis of rigid bodies in equilibrium, free body diagrams, types of joint, biomechanical analysis of elbow, shoulder, hip, knee and ankle.	7
4	Biomaterials: Brief Anatomy, Bone, cartilage, ligament, tendon, Muscles, biofluid their physical properties	6
5	Implants: General concepts of Implants, classification of implants, Soft tissues	6
6	Application of advanced engineering techniques to the human body, case studies.	6

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 364	Biomedical Instrumentation	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 364	Biomedical Instrumentation	40	40	40	60	-	-	--	100

Course Objectives:

1. To familiarize students with various aspects of measuring electrical parameters from the living body.
2. To introduce students with the characteristics of medical instruments and related errors.
3. To illustrate various types of amplifiers used in biomedical instruments.
4. To familiarize students with biomedical recording devices.
5. To introduce students with patient monitoring systems & their characteristics.

Course Outcomes: Learner will be able to

1. Safely and effectively use biomechanics instrumentation and equipment to record and assess human and object motion.
2. Describe and characterize the origin of bio-potentials and inspect common biomedical signals by their characteristics features
3. Understand the basic instrumentation system with their limitations & familiarize with pc based medical instrumentation & control of medical devices.
4. Describe and characterize medical instruments as per their specifications, static & dynamic characteristics and understand data acquisition system
5. Describe, analyze, characterize and design bio-potential amplifiers and design various medical recording systems & their components.
6. Understand and describe patient monitoring systems and its necessity in healthcare system.

Module	Detail Content	Hrs
1	Medical Instrumentation: Sources of Biomedical Signals, Basic medical Instrumentation system, Performance requirements of medical Instrumentation system, Microprocessors in medical instruments, PC based medical Instruments, General constraints in design of medical Instrumentation system, Regulation of Medical devices.	6
2	Measurement systems: Specifications of instruments, Static & Dynamic characteristics of medical instruments, Classification of errors, Statistical analysis, Reliability, Accuracy, Fidelity, Speed of response, Linearization of technique, Data Acquisition System.	6

3	Bioelectric signals and Bioelectric amplifiers: Origin of bioelectric signals, Electrodes, Electrode Tissue interface, Galvanic Skin Response, BSR, Motion artifacts, Instrumentation amplifiers, Special features of bioelectric amplifiers, Carrier amplifiers, Chopper amplifiers, Phase sensitive detector. ECG, EEG, EMG, ERG, Lead systems and recording methods.	8
4	Biomedical recording systems: Basic Recording systems, General consideration for signal conditioners, Preamplifiers, Differential Amplifier, Isolation Amplifier, Electrocardiograph, Phonocardiograph, Electroencephalograph, Electromyography, Digital stethoscope Other biomedical recorders, Biofeedback instrumentation, Electrostatic and Electromagnetic coupling to AC signals, Proper grounding, Patient isolation and accident prevention.	7
5	Patient Monitoring Systems: System concepts, Cardiac monitor, selection of system parameters, Bedside monitors, Central monitors, Heart rate meter, Pulse rate meter, Measurement of respiration rate, Holter monitor and Cardiac stress test, Catheterization Laboratory Instrumentation , Organization and equipments used in ICCU and ITU.	6
6	Biological sensors: Sensors / receptors in the human body, basic organization of nervous system-neural mechanism, Chemoreceptor: hot and cold receptors, baro receptors, sensors for smell, sound, vision, Ion exchange membrane electrodes, enzyme electrode, glucose sensors, immunosensors, Basic principles of MOSFET biosensors & BIOMEMS, basic idea about Smart sensors.	6

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 365	Design of Experiments	40	40	40	60	-	-	--	100

Course Objectives:

1. To understand the issues and principles of Design of Experiments (DOE)
2. To list the guidelines for designing experiments
3. To become familiar with methodologies that can be used in conjunction with experimental designs for robustness and optimization

Course Outcomes: Learner will be able to...

1. Fundamentals of experiments and its uses
2. Basic statistics including ANOVA and regression
3. Experimental designs such as RCB, BIBD, Latin square, factorial and fractional factorial designs.
4. Apply statistical models in analyzing experimental data
5. RSM to optimize response of interest from an experiment
6. Use software such as Minitab

Module	Detailed Contents	Hrs
1	Introduction 1. Why experiment? 2. Terms and Component of Experiment 3. Experimental Units and Responses 4. Types of Data ,Plots and Charts 5. Importance of Product Reliability 6. Uncertainty of Measurement 7. Classification of DOE 8. Software for DOE 9. Principle of Experimental Design 10. Types of Experimental Design	08
2	Basic Statistics and ANOVA 1. Random Variable and Probability Distribution 2. Normal Distribution 3. Sampling Distribution 4. Estimation	08

	5. Hypothesis Testing 6. Determination of Sample size 7. Analysis of Variance(ANOVA) 8. Estimation of model parameters and Adequacy test 9. ANOVA-Pair wise comparison and Tukey's and Fishers LSD test 10. Two way ANOVA 11. Multi way ANOVA 12. Determination of Sample Size for ANOVA	
3	Regression 1. Introduction to Multiple Linear Regression(MLR) 2. Sampling distribution of Regression coefficients 3. MLR: Hypothesis testing and Model Adequacy Test 4. MLR:Diagnostic and Testing for Lack of Fit 5. Regression approach to ANOVA	07
4	Experimental Designs 1. Randomized Complete block design (RCBD) 2. RCBD-Estimation of Parameters 3. RCBD-Balanced Incomplete block design(BIBD) 4. RCBD-Latin square design 5. Introduction to Factorial Design 6. Statistical Analysis of Factorial Design 7. Estimation of parameters and Model Adequacy test 8. Full factorial design 9. Two level factorial design 10. Statistical Analysis of the 2^k Design 11. Blocking and Confounding in the 2^k Design 12. Fractional Factorial Design	08
5	Response Surface Methods and Designs 1. Introduction to Response Surface Methodology 2. RSM-First order model 3. Experimental design for fitting Response Surfaces 4. RSM-Fitting Second order model 5. Analysis of Second order RSM	06
6	Taguchi Approach 1. Crossed Array Designs and Signal-to-Noise Ratios 2. Analysis Methods 3. Robust design examples	04

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

		IA 1	IA 2	Average					
IL 366	Design for Sustainability	40	40	40	60	-	-	--	100

Course Objectives:

1. Understand the complex environmental, economic, and social issues related to sustainable engineering
2. Become aware of concepts, analytical methods/models, and resources for evaluating and comparing sustainability implications of engineering activities
3. Critically evaluate existing and new methods
4. Develop sustainable engineering solutions by applying methods and tools to research a specific system design
5. Clearly communicate results related to their research on sustainable engineering

Course Outcomes: Learner will be able to

1. Account for different theoretical and applied design principles and models for sustainable design
2. Account for and critically relate to sustainable design from an ethical, cultural and historical perspective
3. Critically review different design solutions ecological, social and economical consequences, risks, possible uses and functions in the work for a sustainable development
4. Independently apply a specific design theory on a specific challenge within the sustainability field.

Module	Detailed Contents	Hrs
1	Introduction - Need, Evolution of sustainability within Design, environmental - economic sustainability concept, Challenges for sustainable development, Environmental agreement & protocols	6
2	Product Life Cycle Design – Life Cycle Assessment, Methods & Strategies, Software Tools	6
3	Sustainable Product - Service System Design, Definition, Types & Examples ,Transition Path and Challenges, Methods and Tools, Design thinking and design process for sustainable development	8
4	Design for Sustainability – Engineering Design Criteria and Guidelines	6
5	Design for Sustainability – Architecture, Agriculture, Cities & Communities, Carbon Footprint	6
6	Green Building Technologies - Necessity, Principles, low energy materials, effective systems	6

Assessment:**Internal Assessment: 40 marks**

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 367	Political Science	40	40	40	60	-	-	--	100

Course Objectives:

1. Provide a good grounding in the basic concepts of Political Theory.
2. Familiarize learners with fundamental rights and duties.
3. Teach students the structure and process of the electoral system, the features and trends of the party system and create an awareness of the social movements in India.
4. To inculcate the values of renowned thinkers on law, freedom of thought and social justice.
5. To prepare the learners for understanding the importance of Comparative Government and Politics.
6. To train learners in understanding International Relations.

Course Outcomes: Learner will be able to

1. Acquire conceptual and theoretical knowledge in the basic concepts of political theory.
2. Demonstrate understanding of fundamental rights and duties and directive principles.
3. Perform successfully in expressing the process of the electoral system, the features and trends of the party system and the importance of the social movements in India.
4. Illustrate the contribution of renowned thinkers and relate it to the current scenario.
5. Compare and contrast Indian Government and Politics with European countries.
6. Develop an understanding of International Relations with respect to Indian foreign policy.

Module	Detail Content	Hrs.
1	Understanding Political Theory- Evolution of State, Nation, Sovereignty, Types and Linkages between Power and Authority; Interrelationships between Law, Liberty, Equality, Rights; Justice and Freedom, Democracy vs Authoritarianism	4
2	Constitutional Government in India - Evolution of the Indian Constitution, Fundamental Rights and Duties. Directive Principles. Union-State Relations, Union Legislature: Rajya Sabha, Lok Sabha: Organisation, Functions – Law making procedure, Parliamentary procedure, Government in states: Governor, Chief Minister and Council of Ministers: position and functions – State Legislature: composition and functions. Judiciary: Supreme Court and the High Courts: composition and functions – Judicial activism. Constitutional amendment. Major recommendations of National Commission to Review the Working of the Constitution.	6

3	Politics in India: Structures and Processes- Party system: features and trends – major national political parties in India: ideologies and programmes. Coalition politics in India: nature and trends. Electoral process: Election Commission: composition, functions, role. Electoral reforms. Role of business groups, working class, peasants in Indian politics, Role of (a) religion (b) language (c) caste (d) tribe. Regionalism in Indian politics. New Social Movements since the 1970s: (a) environmental movements (b) women's movements (c) human rights movements.	6
4	Indian Political Thought- Ancient Indian Political ideas: overview. Kautilya: Saptanga theory, Dandaniti, Diplomacy. Medieval political thought in India: overview (with reference to Barani and Abul Fazal). Legitimacy of kingship. Principle of Syncretism, Modern Indian thought: Rammohun Roy as pioneer of Indian liberalism – his views on rule of law, freedom of thought and social justice. Bankim Chandra Chattopadhyay, Vivekananda and Rabindranath Tagore: views on nationalism. M.K. Gandhi: views on State, Swaraj, Satyagraha.	7
5	Comparative Government and Politics- Evolution of Comparative Politics. Scope, purposes and methods of comparison. Distinction between Comparative Government and Comparative Politics.	6
6	Perspectives on International Relations- Understanding International Relations: outline of its evolution as academic discipline. Major theories: (a) Classical Realism and Neo-Realism (b) Dependency (c) World Systems theory. Emergent issues: (a) Development (b) Environment (c) Terrorism (d) Migration. Making of foreign policy. Indian foreign policy: major phases: 1947-1962; 1962-1991; 1991-till date. Sino-Indian relations; Indo-US relations.	7

Assessments:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 368	Visual Arts	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 368	Visual Arts	40	40	40	60	-	-	--	100

Course Objectives:

1. To enable learners to develop aesthetic judgement, visual perception, critical thinking skills in the different forms of art and understand its application.
2. To promote the concept of visual design and understand the different meanings assigned to colours, its impact and problems.
3. To provide the opportunity and scope to use the image editing software for creating images for Web and Video.
4. To inculcate the basic skills required in drawing and painting through exposure in nature and study of still objects.
5. To train students to express their feelings and write imaginatively.
6. To prepare the learners for the use of clay modelling techniques and its industrial applications.

Course Outcomes: Learner will be able to

1. Acquire the skills necessary for aesthetic judgement, visual perception and critical thinking required in different forms of art.
2. Demonstrate the understanding of the concept of visual design with respect to the different meanings assigned to colours and the problems associated.
3. Illustrate effective use of image editing software for creating images for the Web and Video.
4. Determine the importance of drawing and painting with respect to nature and still objects.
5. Perform successfully in expressing their feelings creatively.
6. Develop the techniques required for clay modelling and sculpture for industrial use.

Module	Detail Content	Hrs.
1	History of Art and Architecture- Changing needs and forms of art from the Palaeolithic period to The Renaissance period with special reference to Roman, Indian and Chinese art	4
2	Introduction and concepts of visual design with special emphasis on the psychological impact of colour	5
3	Introduction to image editing software, tools, application and creating Images for Web and Video. With special reference to Adobe Photoshop	7
4	Fundamentals of Drawing- study of forms in nature, study of objects and study from life, creative painting- basic techniques, tools and equipment, medium of painting.	6

5	Creative writing- Movie critique, book reviews, Poems, short plays and skits, Humorous Essays, Autobiography and short stories.	7
6	Creative sculpture- Introduction to clay modelling techniques, study of natural and man-made objects in clay, Sculpture with various materials - Relief in Metal Sheets – Relief on Wood – Paper Pulp - Thermocol. Sculpture with readymade materials.	7

Assessments:

Internal Assessment: 40 marks

End Semester Examination: 60 marks

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 369	Modern Day Sensor Physics	40	40	40	60	-	-	--	100

Course Objectives:

1. Acquire knowledge about the principles and analysis of sensors.
2. Emphasis on characteristics and response of micro sensors.
3. Acquire adequate knowledge of different transducers and Actuators.
4. Learn about the Microsensors and Microactuators.
5. Selection of sensor materials for fabrication for different applications

Course Outcomes: On successful completion of course learner/student will be able to:

1. Analyze the basics and design the resistive sensors.
2. Identify the materials and designing of inductive and Capacitive Sensors.
3. Analyze various types of Actuators.
4. Design Microsensors and Microactuators for various applications.
5. Implement fabrication process and technologies and compare various Micro machining processes

Module	Detail Content	Hrs.
1	Fundamentals of Sensors : Difference Between Sensor, Transducer And Actuators- Classification Of Sensors: Proprioceptive And Exteroceptive – Active And Passive– Contact And Non-Contact, Selection And Characteristics: Range; Resolution, Sensitivity, Error, Repeatability, Linearity And Accuracy, Primary Sensing Elements.	6
2	Temperature sensors: Principle of operation, construction details, characteristics and applications of Bimetallic thermometer, Resistance thermometer, Thermistor, Thermocouples and Total radiation Pyrometers	8
3	Strain, Force, Torque and Pressure Sensors Strain gauges, strain gauge beam force sensor, piezoelectric force sensor, load cell, torque sensor, Piezo- resistive and capacitive pressure sensor, Manometer, vacuum sensors, Pirani gauge.	6

4	Displacement, Level and Flow Sensors Displacement Sensors: LVDT, RVDT, eddy current, transverse inductive, Hall Effect, magneto resistive, magnetostrictive sensors. Liquid level sensor: Fabry Perot sensor, ultrasonic sensor, capacitive liquid level sensor. Flow sensors: pressure gradient technique, ultrasonic, electromagnetic sensors and Hot wire anemometer. Micro flow sensor, Coriolis mass flow and drag flow sensor.	8
5	Micro Machining Technologies Overview of silicon processes techniques, Photolithography, Ion Implantation, and Diffusion, Chemical Vapor Deposition, Physical vapor Deposition, Epitaxy, Etching, Bulk micromachining, Surface Micromachining, LIGA and other techniques.	6
6	Actuators Definition, types and selection of Actuators; linear; rotary; Logical and Continuous Actuators, Pneumatic actuator, Hydraulic actuator - Control valves and cylinders Electrical actuating systems: Solenoids, Electric Motors- D.C motors - AC motors - Three Phase Induction Motor, Stepper motors -Piezoelectric Actuator.	5

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 370	Energy Audit and Management	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 370	Energy Audit and Management	40	40	40	60	-	-	--	100

Course Objectives:

1. To impart basic knowledge to the students about current energy scenario, energy conservation, audit and management.
2. To inculcate among the students systematic knowledge and skill about assessing the energy efficiency, energy auditing and energy management.
3. To introduce performance evaluation criteria of various electrical and thermal installations to facilitate the energy management
4. To relate the data collected during performance evaluation of systems for identification of energy saving opportunities.

Course Outcomes: Upon successful completion of this course, the learner will be able to

1. To identify and describe the present state of energy security and its importance.
2. To identify and describe the basic principles and methodologies adopted in energy audit of an utility
3. To describe the energy performance evaluation of some common electrical installations and identify the energy saving opportunities.
4. To describe the energy performance evaluation of some common thermal installations and identify the energy saving opportunities.
5. To analyze the data collected during performance evaluation and recommend energy saving measures

Module	Detail Content	Hrs.
1	Energy Scenario: Energy needs of growing economy, Long term energy scenario, Energy pricing, Energy sector reforms, Energy and environment: Air pollution, Climate change, Energy security, Energy conservation and its importance, Energy strategy for the future, Energy conservation Act2001 and its features.	4
2	Energy Management and Audit: Definition, Energy audit- need, Types of energy audit, Energy management (audit) approach-understanding energy costs, Bench marking, Energy performance, Matching energy use to requirement, Maximizing system efficiencies, Optimizing the input energy requirements, Fuel and energy substitution, Energy audit instruments.	10

	Material and Energy balance: Facility as an energy system, Methods for preparing process flow, Material and energy balance diagrams. Financial Management: Investment-need, Appraisal and criteria, Financial analysis techniques- Simple payback period, Return on investment, Net present value, Internal rate of return, Cash flows, Risk and sensitivity analysis, Financing options, Energy performance contracts and role of ESCOs	
3	Energy Management and Energy Conservation in Electrical System: Electricity billing, Electrical load management and maximum demand Control; Power factor improvement, Energy efficient equipments and appliances, star ratings. Energy efficiency measures in lighting system, Lighting control: Occupancy sensors, daylight integration, and use of intelligent controllers. Energy conservation opportunities in: water pumps, industrial drives, induction motors, motor retrofitting, soft starters, variable speed drives.	10
4	Energy Management and Energy Conservation in Thermal Systems: Review of different thermal loads; Energy conservation opportunities in: Steam distribution system, Assessment of steam distribution losses, Steam leakages, Steam trapping, Condensate and flash steam recovery system. General fuel economy measures in Boilers and furnaces, Waste heat recovery, use of insulation- types and application. HVAC system: Coefficient of performance, Capacity, factors affecting Refrigeration and Air Conditioning system performance and savings opportunities.	10
5	Energy Performance Assessment: On site Performance evaluation techniques, Case studies based on: Motors and variable speed drive, pumps, HVAC system calculations; Lighting System: Installed Load Efficacy Ratio (ILER) method, Financial Analysis.	3
6	Energy conservation in Buildings: Energy Conservation Building Codes (ECBC): Green Build Building, LEED rating, Application of NonConventional and Renewable Energy Sources	3

Assessment:**Internal Assessment: 40 marks**

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 371	Maintenance of Electronics Equipment	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 371	Maintenance of Electronics Equipment	40	40	40	60	-	-	--	100

Course Objectives:

1. To demonstrate use of different types of hand tools.
2. To understand testing of different active and passive components mounted on PCB
3. To understand functionality TTL and CMOS digital IC tester.
4. To demonstrate computer assembling, troubleshooting and software installation.
5. To understand/demonstrate concept of circuit diagram of LED/LCD TV, DTH and mobile phone troubleshooting.
6. To understand concept of designing, manufacturing electronic circuit, medical equipment.

Course Outcomes:

1. Demonstrate use of different types of hand tools.
2. Understand testing of different active and passive components mounted on PCB.
3. Understand functionality TTL and CMOS digital IC tester.
4. Demonstrate computer assembling, troubleshooting and software installation.
5. Understand/demonstrate concept of circuit diagram of LED/LCD TV, DTH and mobile phone troubleshooting.
6. Understand the concept of designing, manufacturing electronic circuits, and medical equipment.

Detailed Lab/Tutorial Description: Students will have to perform six to eight experiments / tutorials in the lab from the following list and write a journal as a term work.

SN	Detailed Lab/Tutorial Description	Hrs.
1	Demonstrate working, use of two instruments in electronics laboratory.	4
2	Test the performance of different passive electronic components (fixed/variable)	4
3	Test the performance of active electronic components like general purpose transistor/FET/MOSFET/SCR/ DIAC/TRIAC with DMM and CRO OR Components Tester	4
4	Verify the functionality of TTL and CMOS Digital IC's using IC tester	4

5	Explore a datasheet of minimum any five electronics components and analog/ Digital IC's.	4
6	Draw the given regulated power supply circuit/ SMPS (from any television/fridge/ computer system/ laboratory etc)	4
7	Identify basic sections of a personal computer/Laptop	4
8	Demonstrate Assembling of Personal Computer/Laptop	4
9	Troubleshoot the booting process of computer system and install different hardware associated with computer (HDD, LAN Card, Audio System etc)	4
10	Study Installation of Software and Configure Internet	4
11	Explore circuit diagrams of LED/LCD TV.	4
12	Demonstrate Installation of DTH system	4
13	Demonstrate installation Solar power system	4
14	Practice steps for mobile troubleshooting	4

In addition, the students will have to submit report in prescribed format and give presentation at the end of semester on any one of the following activity:

SN	Details of Activity	Hrs.
1	Design and assembling of a small electronic project circuit on PCB. Students will learn design of circuit, its simulation, PCB design, PCB manufacturing, soldering of components, troubleshooting of the circuit.	12
2	Visit to medical equipment industry / laboratory	12

Assessments:

Internal Assessment: 40 marks

End Semester Examination: 60 marks

Books/References:

1. Troubleshooting and Maintenance of Electronics Equipment, Singh K. Sudeep, Katson Book, New Delhi, II edition, Reprint 2014
2. Mobile repairing Books, Manohar Lotia, BPB Publication, New Delhi , latest edition
3. Troubleshooting Electronic Equipment: Includes Repair and Maintenance, Second Edition, Khandpur R. S., Tata McGraw-Hill Education, New Delhi, India, latest edition.
4. Data Books, National semiconductor.
5. Modern Digital Electronics, Fourth edition, R. P. Jain, Tata McGraw-Hill Education, New Delhi, India.
6. Manuals of instruments in electronics laboratories.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 372	Cooking and Nutrition	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 372	Cooking and Nutrition	40	40	40	60	-	-	--	100

Course Objectives: The course is aimed to

1. To understand nutrition and of health problems related to diet and various factors affect diet
2. To various statistical tools required to analyze the experimental data in nutrition and community research
3. Gain information about various food constituents, and changes that occur in them during food processing.
4. To gain food-related knowledge and skills so that they can organise and manage family resources effectively according to the needs and lifestyles of family members
5. To be able to make informed judgements and choices about the use of food available.
6. To create interest in the creative side and enjoyment of food and the skills necessary for food preparation and food preservation. And to be aware of relevant mandatory and other necessary safety and hygiene requirements

Course Outcomes: On successful completion of course learner/student will be able to

1. To understand the importance and mechanisms of the food components taking place during food processing,
2. To understand nutrition and of health problems related to diet and various factors affect diet
3. To aware how eating patterns and dietary needs depend on age and social group
4. Ability to assess the effectiveness and validity of claims made by advertisers
5. To enhance aesthetic and social sensitivity to dietary patterns and to develop an interest in the creative aspect and enjoyment of food
6. To develop skills necessary for food preparation and food preservation and knowledge of safety and hygiene requirements

Module	Detail Content	Hrs.
1	Nutritional terms: proteins (high biological and low biological value), carbohydrates (monosaccharide, disaccharide and polysaccharide), fats, vitamins (A, C, D, E, K, B group – thiamin, riboflavin, nicotinic acid and cobalamin), mineral elements (calcium, iron, phosphorous, potassium, sodium, iodide) water Sources and uses of food energy. Sources and functions of dietary fibre.	3
2	Kitchen equipment & Kitchen planning: Selection, Use and care of: modern cookers, thermostatic control and automatic time-controlled ovens, microwave ovens, slow electric cook pots, refrigerators and freezers, small	4

	kitchen equipment, e.g. knives, pans, small electrical kitchen equipment, e.g. food processors, electric kettles, Advantages and disadvantages of microwave ovens, Organisation of cooking area and equipment for efficient work., Selection, Use and care of: work surfaces, flooring, walls and wall coverings, lighting, ventilation	
3	Meal planning and guidelines: Factors affecting food requirements, Planning and serving of family meals, Meals for different ages, occupations, cultures and religions, Special needs of: people with food allergies and intolerances, people with medical conditions linked to diet, such as diabetes, convalescents, vegetarians, including vegans and lacto-vegetarians, Meals for special occasions, festivals, packed meals, snacks, beverages, Use of herbs, spices and garnishes, Attractive presentation of food, Terminology describing recommended dietary intakes, e.g. Dietary Reference Value (DRV) and Reference Daily Intake (RDI).	6
4	Strategic cooking: Transfer of heat by conduction, convection and radiation. Principles involved in the different methods of cooking, baking, boiling, braising, cooking in a microwave oven, frying, grilling, poaching, pressure cooking, roasting, simmering, steaming, stewing, use of a slow cooker. Reasons for cooking food, Sensory properties of food (flavour, taste, texture), Effect of dry and moist heat on proteins, fats and oils, sugars and starches, and vitamins to include: caramelisation, coagulation dextrinization, enzymic and non-enzymic browning, gelatinisation, rancidity, smoking point, Preparation and cooking of food to preserve nutritive value, Economical use of food, equipment, fuel and labour.	6
5	Convenience foods and Basic proportions: Foods partly or totally prepared by a food manufacturer – dehydrated, tinned, frozen, ready-to-eat, Intelligent use of these foods, Advantages and disadvantages, Food additives – types and function, Packaging – types, materials used, Labelling – information found on labels, Importance of maintaining proportions, maintaining proportions for : Bakery products, melting, rubbing-in and whisking methods, Pastries – shortcrust, flaky and rough puff, Sauces – pouring and coating, roux and blended methods, Batters – thin (pouring) and coating, Sweet and savoury yeast products	5
6	Food preservation & Kitchen safety and first aid: Food preservation & Kitchen safety and first aid: Reasons for preserving food, Methods of preservation and an understanding of the principles involved: heating – canning, bottling; removal of moisture – dehydrating; reduction in temperature – freezing; chemical preservation – sugar, salt, vinegar; modified atmosphere packaging; irradiation; Awareness of potential danger areas in the kitchen. Safety precautions. First aid for burns and scalds, cuts, electric shock, fainting, shock.	5

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Books/References:

1. Fundamentals of Food and Nutrition by Tejmeet Rekhi, Heena Yadav
2. Food Process Engineering And Technology by Akash Pare, B L Mandhyan

AY 2022-23

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 373	Environmental Management	Contact Hours	3	-	-	3

		IA 1	IA 2	Average					
IL 373	Environmental Management	40	40	40	60	-	-	--	100

Objectives:

1. To promote the safety, health, and welfare of people and the environment through engineering professionals.
2. To encourage students to be productive and contributing members of the environmental profession as practitioners, entrepreneurs, researchers, or teachers.
3. To develop environmental awareness among students that meet specified engineering needs with consideration of public health, safety, and welfare, as well as global, environmental, and legal factors.

Outcomes: On successful completion of the course learner/student will be able to:

1. Understand core concepts and methods from ecological sciences and their application in environmental problem-solving.
2. Recognize different types of toxic substances and analyze toxicological information
3. Acquire and apply environmental knowledge to the engineering field as needed.
4. Assist industries and projects in obtaining environmental clearance and compliance with other environmental laws.
5. Interpret appropriate environment-related legislation.
6. Develop a thorough understanding of practice and procedure followed by various enforcing agencies/bodies/countries.

Module	Detail Contents	Hrs.
1	Fundamentals of Environmental Sciences Definition, Principles, and Scope of Environmental Science. Structure and composition of the atmosphere, hydrosphere, lithosphere, and biosphere. Concept of Ecology- Ecosystem, Food chain, Food web, Ecological pyramid, Ecological succession, limiting factor, and carrying capacity. Global Environmental Concerns (Global warming, Loss in Biodiversity, Ozone depletion, E-waste management) and Renewable Energy Resources (Solar Energy, Wind Energy, Hydrothermal Energy, etc.)	8
2	Environmental Chemistry Toxic chemicals: Pesticides and their classification and effects. Biochemical aspects of	8

	heavy metals (Hg, Cd, Pb, Cr) and metalloids (As, Se), Sewage treatment, Concept of DO, BOD, and COD. Composition of air-chemical processes in the formation of inorganic and organic particulate matter, Thermochemical and photochemical reactions in the atmosphere, Oxygen and Ozone chemistry. Photochemical smog, Air Quality Index	
3	Fundamentals of Environmental Management Concept of Environmental Management, Need & Objective of Environmental Management, Role of Engineers in Environmental Management, Career Opportunities. The need for sustainable development, Sustainable Development Goals	5
4	Scope of Environmental Management Role and functions of Government as a planning and regulatory agency. Environment Quality Management and Corporate Environmental Responsibility. Total quality Environmental management: ISO 14000, EMS Certification. Environmental Management System Standards (ISO-14000 series). Environment and Social Management Plan	7
5	Overview of Environmental Laws in India Constitutional provisions in India (Articles 48A and 51A). Wildlife Protection Act, 1972 Indian Forest Act, Water (Prevention and Control of Pollution) Act, Air (Prevention and Control of Pollution) Act, Environmental (Protection) Act, 1986, The e-waste (Management) Rules 2016	5
6	Environmental Conventions and Agreements Stockholm Conference on Human Environment 1972, Montreal Protocol, 1987, Earth Summit at Rio de Janeiro, 1992, Agenda-21, Convention on Biodiversity (1992), UNFCCC, Kyoto Protocol, 1997, Copenhagen Summit, Paris Agreement, CITES.	6

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 391	Project A	—	—	—	—	50	—	25	75

1. Project A Objectives :

Students will try to:

1. To offer students a glimpse into real world problems and challenges that need IT based solutions
2. To enable students to create very precise specifications of the IT solution to be designed.
3. To introduce students to the vast array of literature available of the various research challenges in the field of IT
4. To create awareness among the students of the characteristics of several domain areas where IT can be effectively used.
5. To enable students to use all concepts of IT in creating a solution for a problem
6. To improve the team building, communication and management skills of the students.

2. Project A Outcomes :

On successful completion of Mini Project learner/student will be able to:

1. Discover potential research areas in the field of IT
2. Conduct a survey of several available literature in the preferred field of study
3. Compare and contrast the several existing solutions for research challenge
4. Demonstrate an ability to work in teams and manage the conduct of the research study.
5. Formulate and propose a plan for creating a solution for the research plan identified
6. To report and present the findings of the study conducted in the preferred domain

3. Guidelines:

1. The project work is to be conducted by a group of three students
2. Each group will be associated with a project mentor/guide. The group should meet with the project mentor/guide periodically and record of the meetings and work discussed must be documented
3. Department has to allocate half a day for project work in VI semester, 1 day in VII semester and 2 days in VIII semester every week.
4. To encourage project based learning in the curriculum students may identify their technical domain area in semester VI and can perform the Mini-project in the VI semester or students may do literature survey
5. Each group along with its guide/mentor shall identify a potential research area/problem domain, on which the study is to be conducted.
6. Each team will do a rigorous literature survey of the problem domain by reading and understanding at least 3-5 research papers from current good quality national/international journals/conferences. (Papers selected must be indexed by Scopus/IEEE/Springer/ACM etc.). The list of papers surveyed must be clearly documented.
7. The project assessment for term work will be done at least two times at department level by giving presentation to panel members which consist of at least three (3) members as Internal

examiners (including the project guide/mentor) appointed by the Head of the department of respective Programme.

8. A report is to be prepared summarizing the findings of the literature survey. A comparative evaluation of the different techniques surveyed is also to be done.
9. Teams must analyze all the results obtained by comparing with other standard techniques.
10. Every team must publish their work in national / international conferences/journals (if possible publish in Scopus indexed journals).
11. The team will finally propose a plan for project work to be continued in the final year.
12. Semester VII to carry out the project good quality project and all these project parts.

4. Project Evaluation:

1. Each team has to give a presentation/demo to the Internal Panel and External examiner.
2. Each team will prepare a report that will summarize the results of the literature survey and the project proposal. The list of papers surveyed must be clearly documented.
3. Each group will be jointly evaluated by a team of Internal and External Examiners approved by the University of Mumbai.
4. Oral exams will be conducted on the project done by the students.

5. Project Assessment:

Term Work:

1. Term Work shall consist of a full Mini Project on above guidelines/syllabus.
2. Term Work Marks: 50 Marks

Oral Exam:

1. An Oral exam will be held based on the Mini Project and Presentation.
2. Oral Exam Marks: 25 marks

**BACHELOR OF TECHNOLOGY
IN
COMPUTER ENGINEERING
(Semester VII)**

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 401	Software Testing and Quality Assurance	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 401	Software Testing and Quality Assurance	40	40	40	60	25	—	25	150

1. Course Objectives :

The course is aimed to:

1. To provide students with knowledge in Software Testing techniques.
2. To provide knowledge of Black Box and White Box testing techniques.
3. To provide skills to design test case plans for testing software.
4. To prepare test plans and schedules for testing projects.
5. To understand how testing methods can be used in a specialized environment.
6. To understand how testing methods can be used as an effective tool in providing quality assurance concerning software.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Investigate the reason for bugs and analyze the principles in software testing to prevent and remove bugs.
2. Understand various software testing methods and strategies.
3. Manage the testing process and testing metrics.
4. Understand fundamental concepts of software automation and use automation tools.
5. Apply the software testing techniques in the real time environment.
6. Use practical knowledge of a variety of ways to test software and quality attributes.

3. Detailed Theory Syllabus:

Prerequisite: Programming Language (C++, Java), Software Engineering

Module No	Module	Detailed Contents of Module	Hrs.
1	Testing Methodology	Prerequisites: Software Engineering Concepts, Basics of programming Language; Introduction to Software Testing, Goals of Software Testing, Software Testing Definitions, Model for Software Testing, Effective Software Testing vs Exhaustive Software Testing, Software Failure Case Studies, Software Testing Terminology, Software Testing Life Cycle (STLC), Software Testing methodology, Verification and Validation, Verification requirements, Verification of high level design, Verification of low level design, validation. Self-learning Topics: Study any	09

		system/application, find requirement specifications and design the system. Select software testing methodology suitable to the application.	
2	Testing Techniques	Dynamic Testing: Black Box Testing: Boundary Value Analysis, Equivalence Class Testing, State Table Based testing, Cause-Effect Graphing Based Testing, Error Guessing. White Box Testing Techniques: need, Logic Coverage Criteria, Basis Path Testing, Graph Matrices, Loop Testing, Data Flow testing, Mutation testing. Static Testing. Validation Activities: Unit validation, Integration, Function, System, Acceptance Testing. Regression Testing: Progressive vs. Regressive, Regression Testing, Regression Testability, Objectives of Regression Testing, Regression Testing Types, Define Problem, Regression Testing Techniques. Self-learning Topics: Select the test cases (positive and negative scenarios) for the selected system and Design Test cases for the system using any two studied testing techniques.	09
3	Managing the Test Process	Test Management: test organization, structure and of testing group, test lanning, detailed test design and test Specification. Software Metrics: need, definition and Classification of software matrices. Testing Metrics for Monitoring and Controlling the Testing Process: attributes and corresponding metrics, estimation model for testing effort, architectural design, information flow matrix used for testing, function point and test point analysis. Efficient Test Suite Management: minimizing the test suite and its benefits, test suite minimization problem, test suite prioritization its type , techniques and measuring effectiveness. Self-learning Topics: Design quality matrix for your selected system	08
4	Test Automation	Automation and Testing Tools: need, categorization, selection and cost in testing tool, guidelines for testing tools. Study of testing tools: JIRA, Bugzilla, TestDirector and IBM Rational Functional Tester, Selenium etc. Self-learning Topics: Write down test cases, execute and manage using studied tools	05
5	Testing for specialized environment	Agile Testing, Agile Testing Life Cycle, Testing in Scrum phases, Challenges in Agile Testing Testing Web based Systems: Web based system, web technology evaluation, traditional software and web based software, challenges in testing for web based software, testing web based testing Self-learning Topics: Study the recent technical papers on software testing for upcoming technologies (Mobile, Cloud, Blockchain, IoT)	04
6	Quality Management	Software Quality Management, McCall's quality factors and Criteria, ISO9000:2000, SIX sigma, Software quality management Self-learning Topics: Case Studies to Identify Quality Attributes Relationships for different types of Applications (Web based, Mobile based etc.)	04

4. Suggested Experiments:

1. Install Selenium IDE; Write a test suite containing minimum 4 test cases for different formats.

2. Conduct a test suite for any two web sites.
3. Install Selenium server (Selenium RC) and demonstrate it using a script in Java/PHP.
4. Write and test a program to login to a specific web page.
5. Write and test a program to update 10 student records into table into Excel file
6. Write and test a program to select the number of students who have scored more than 60 in any one subject (or all subjects).
7. Write and test a program to provide a total number of objects present / available on the page.
8. Write and test a program to get the number of items in a list / combo box.
9. Write and test a program to count the number of check boxes on the page checked and unchecked count.
10. Load Testing using JMeter, Android Application testing using Appium Tools, Bugzilla Bug tracking tools.

5. Theory Assessment:

- A. **Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.
- A. **End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
 1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

- A. **Term Work:** Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.
- B. **Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 402	Data Science	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 402	Data Science	40	40	40	60	25	25	--	150

1. Course Objectives:

The course is aimed to:

1. Explain the fundamental concepts, processes, and roles in data science.
2. Cultivate the application of statistical methodologies and probabilistic reasoning for data exploration and inference.
3. Develop proficiency in robust data management, cleaning, and preparation techniques across diverse datasets.
4. Impart the principles and practices of MLOps for designing, implementing, and managing the entire Machine Learning model lifecycle.
5. Enable the ethical creation of impactful data visualizations and compelling narratives to effectively communicate data-driven insights.
6. Foster the ability to analyze and propose data science solutions for complex challenges across various industry applications.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Explain the foundational concepts, workflow, and professional roles within the field of Data Science.
2. Apply a range of descriptive and inferential statistical techniques, to analyze data and draw valid conclusions.
3. Implement comprehensive data acquisition, cleaning, transformation, and feature engineering procedures to prepare raw data for advanced analysis.
4. Manage the end-to-end Machine Learning lifecycle, incorporating MLOps practices for model versioning, deployment, monitoring, and maintenance.
5. Create ethical and compelling data visualizations and narratives, effectively communicating complex data insights to both technical and non-technical audiences.
6. Analyze real-world business challenges and propose appropriate data science solutions across diverse industry sectors.

3. Detailed Theory Syllabus:

Prerequisite: BDA, ML, DBMS, Python, NLP

Module No	Module	Detailed Contents of Module	Hrs
1	Introduction to data science	Definition, working, defining goal, benefits and uses of Data Science, Data science vs BI, The data science process, Role of a Data Scientist.	3
2	Applied Probability and Statistics for Data Science	Descriptive Statistics: Measures of Central Tendency: Mean, Median, Mode, Measures of Dispersion:Skewness and Kurtosis· Probability Theory Refresher: Sample Space, Events, Conditional Probability, Bayes' Theorem, Independence and mutual exclusivity, Real-world use cases: fraud detection, spam classification, Probability Distributions: Binomial, Bernoulli, Poisson (for count-based data) ,Normal, Exponential, Uniform, t-distribution , Central Limit Theorem (CLT), Application in modeling and simulation, Inferential Statistics: Population vs. Sample, Confidence Intervals, Hypothesis Testing: Null & Alternative Hypothesis, Type I & II Errors, t-test, z-test, ANOVA, Chi-Square test , Use cases in A/B testing, clinical trials, Correlation and Regression: Pearson and Spearman Correlation, Simple and Multiple Linear Regression, Residual analysis and assumptions, Multicollinearity and VIF, Statistical Thinking in Data Science: Bias-Variance Tradeoff, Sampling Methods: Random, Stratified, Cluster, Power of a test, p-value interpretation, Real-world decision making: Marketing, Product experiments	10
3	Data management	Data management - Understanding how to create the data set, Data collection methods, Data preparation - importance of data 'cleaning', validity and quality. Data analysis - how format and volume of data limits methods of analysis available.	4
4	MLOps and Model Lifecycle Management	Introduction to MLOps: Evolution from DevOps to MLOps, Differences between software and ML systems,Challenges: Data drift, model versioning ML Lifecycle Phases: Model Development: Data processing, Feature Engineering Experimentation: Hyperparameter tuning Deployment: CI/CD for ML, rollback strategies Monitoring: Drift detection Version Control and Experiment Tracking: Git, DVC for versioning, MLFlow, Weights & Biases for tracking, Best practices in code and data separation Model Packaging and Serving: Pickle, Flask/FastAPI APIs, Docker CI/CD Pipelines: Jenkins, GitHub Actions, Azure DevOps, Automated testing, Cloud deployment Monitoring, Retraining, Governance: Concept/Data Drift detection, Retraining automation Explainability, SHAP/Fairlearn integration	10
5	Ethical Data Storytelling and Visualization	Communicating Data to Non-Technical Audiences: Audience identification, storytelling, simplifying ML/AI, examples Introduction to Data Visualization: Principles of good design, right chart types, tools overview Advanced	6

		Visualizations: Geospatial: Folium, GeoPandas, Time-series: Trends, anomalies, Dashboards: Streamlit, PowerBI, Ethics in Data Science: Data ownership, consent, privacy, The Five Cs: Consent, Clarity, Control, Choice, Consequence, Real-world ethical case studies Practicing Ethical Visualization: Avoiding bias and manipulation in visuals, Fairness, transparency, ethical safeguards	
6	Applications	Healthcare, Banking, Finance, Sports, Advertisement, Transport, Tourism	6

4. Suggested Experiments:

1. Implement using any tools or language the process of dataset creation (Data Acquisition, Data Cleaning, Data Labelling)
2. Perform statistical data analysis on the generated dataset
3. Perform Predictive data analytics using open source tools or language
4. Perform Model Deployment.
5. Perform Data Visualization by using various Visualization Tools(Area Plots, Histograms ,Bar Charts, Pie Charts, Box Plots, Scatter Plots, Waffle Charts, Word Clouds) and generate data visualization dashboard
6. Case study on Understanding and Implementing Data Science Ethics
7. Case study or Mini project on application of data science in(Healthcare, Banking, Finance, Sports, Advertisement, Transport, Tourism)

5. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hours.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
 1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

- A. Term Work:** Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.
- B. Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 403	Pentesting and Vulnerability Assessment	Contact Hours	03	02	-	5
		Credits	03	01	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 403	Pentesting and Vulnerability Assessment	40	40	40	60	25	--	25	150

1. Course Objectives:

1. To understand the fundamental concepts of ethical hacking and penetration testing.
2. To learn techniques for information gathering, including active and passive methods, social engineering, DNS reconnaissance, and port scanning.
3. To identify vulnerabilities using tools like Nessus and common attack types like password attacks and social engineering.
4. To learn exploitation frameworks like Metasploit and Meterpreter.
5. To learn to test web applications for security flaws such as SQL injection, XSS, and file inclusion vulnerabilities.
6. To explore wireless network security measures, detect wireless attacks, and understand methods to crack and secure wireless networks.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Explain the core principles of ethical hacking and penetration testing.
2. Apply information gathering techniques to carry out reconnaissance.
3. Identify security vulnerabilities and recognize common attack techniques.
4. Utilize exploitation tools like Metasploit for testing security weaknesses.
5. Assess web applications for security vulnerabilities and recommend remediation.
6. Analyze wireless networks for security threats and implement protective measures.

3. Detailed Syllabus:

Prerequisites: Computer Networks, Operating System, Cryptography and Network Security, Ethical Hacking

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction to Hacking and Pentesting	Introduction to Ethical Hacking, Hacking Types, Security challenges, Phases of hacking. Introduction to penetration testing, Vulnerability Assessment and Penetration Testing, Types of penetration testing, Penetration testing methodology	5
2	Information Gathering Techniques	Information Gathering Types: Active, Passive; Social Engineering; HTTrack, Harvester, Searching for Email Addresses, DNS Reconnaissance: whois, Nslookup, Dig, Host; Zone Transfers Google directives: site, intitle, inurl, cache, filetype. Port Scanning Types: TCP and UDP scan, OS fingerprinting detection using Nmap.	7
3	Vulnerabilities assessment and Attacks	Nessus: Nessus Policies, Scanning with Nessus, Web Application Scanning, Attacks: Password Attacks, Online Password Attacks, Offline Password Attacks, Password Management, Social Engineering: Spear-Phishing Attack, Mass email attack, Mass Mailer Attack	7
4	Exploitation	Metasploit: Metasploit framework, metasploit-Console, Payloads, Meterpreter, Privilege Escalation, Introduction to armitage.	6
5	Web Application Testing	SQL Injection, XPath Injection, Local File Inclusion, Remote File Inclusion, Command Execution, Cross-Site Scripting, Cross-Site Request Forgery, Web Application Scanning with w3af.	7
6	Wireless Attacks	Wireless Security: SSID, WEP, MAC filtering, IPsec, Wardriving. Software Tools: Cracking wireless networks, Detecting wireless attack.	7

4. Suggested Experiments:

1. Setup Kali Linux in a Virtual machine and setup with DNS info and collection of local network.
2. Scan the network for target OS machines in the local network and virtual network.
3. Experiments to identify the open ports and firewall rules setup.
4. Use password guessing tools to guess a password. Use password strengthening tools to strengthen the password. Try guessing the password and tabulate the enhanced difficulty due to length of password and addition of special characters
5. Extract password hashes from operating systems. Use a password extraction tool, using word list, single crack or external mode to recover the password. Increase the complexity of the password and determine the point at which the cracking tool fails
6. Experiments on SQL injections.
7. Analysis of WEP flaws.
8. Experiments on Wireless DoS Attacks.
9. Buffer Overflow Prevention and prevention against Cross Site Scripting Attacks.

10. Experiments on Metasploit Framework.
11. Cross Site Scripting and Cross Site Request Forgery.
12. File upload vulnerability on Social engineering.

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 404	Deep Learning	40	40	40	60	25	--	25	150

1. Course Objectives:

The course is aimed to:

1. To present the mathematical, statistical and computational challenges of building neural networks
2. To apply Deep Learning models to real world problems in an efficient and optimized way.
3. To understand Convolution Neural Networks for solving various computer vision problems.
4. To understand Recurrent Neural Networks basic concepts.
5. To apply RNN for solving various sequence modelling problems.
6. To learn to apply pre-trained models for solving various deep learning problems.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Understand basics of neural networks
2. Improve Neural Network using various hyperparameter tuning.
3. Design Convolutional Neural Network for various applications
4. Apply Recurrent Neural Network to real life problems
5. Understand and use sequence models
6. Understand transfer learning models

3. Detailed Theory Syllabus:

Prerequisite: Machine Learning, Applied Mathematics

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction to Deep Learning and Neural Networks basics	What is a neural network? Supervised Learning with Neural Networks, Binary Classification and Logistic Regression, Gradient Descent, Shallow neural networks, Deep Neural Networks	4
2	Improving Deep Neural Networks: Hyperparameter tuning, Regularization and Optimization	Practical Aspects of Deep Learning- Bias / Variance, Regularization, Normalizing inputs, Weight Initialization for Deep Networks, Optimization algorithms- Mini-batch gradient descent, Gradient descent with momentum, RMSprop, Adam optimization algorithm, Hyperparameter tuning- Using an appropriate scale to pick hyperparameters, Normalizing activations in a network, Fitting Batch Norm into a neural network, SoftMax Regression, Batch Normalization and Programming Frameworks	8
3	Convolutional Neural Networks	Edge Detection, Padding, Strided Convolutions, One Layer of a Convolutional Network, Pooling Layers Deep convolutional models- ResNets, Networks in Networks and 1x1 Convolutions, Inception Network, Object Detection-Object Localization, Landmark Detection, Object Detection, Convolutional Implementation of Sliding Windows, Bounding Box	8

		Predictions, Intersection Over Union, Non-max Suppression, Anchor Boxes	
4	Recurrent Neural Networks	Recurrent Neural Network Model, Backpropagation through time, Different types of RNNs, Language model and sequence, generation, Vanishing gradients with RNNs, Gated Recurrent Unit (GRU), Long Short-Term Memory (LSTM), Bidirectional RNN, Deep RNNs	8
5	Sequence models & Attention mechanism	Basic Models, Picking the most likely sentence, Beam Search, Refinements to Beam Search, Error analysis in beam search, Attention Model, Speech recognition, Trigger Word Detection	5
6	Transfer Learning	What is transfer learning? What is a Pre-trained Model? use of pre-trained models, Customize a pretrained model: Feature Extraction, Fine-Tuning, Transfer Learning Implementation using VGG16 Model/ MobileNetV2/YOLO/GloVe/ ResNet50	4

4. Suggested Experiments:

1. Build deep neural network.
2. Analyze deep neural network by using various optimization algorithms.
3. Face Recognition using CNN.
4. Implement Dinosaur Island - Character-Level Language Modeling using RNN.
5. Machine Translation from one language to another with Attention mechanism.
6. Case study on any transfer learning model.

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 405	User Experience Design	40	40	40	60	25	25	--	150

1. Course Objectives:

The course is aimed to:

1. To study and understand importance of user experience design principles
2. To understand elements of user experience design
3. To encourage students to participate in designing futuristic applications
4. To understand data visualization interaction design.
5. To understand prototype design.
6. To understand usability testing.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Apply principles of user experience
2. Apply emerging and established technologies to enhance User Experience design
3. Create an interface for international standards with ethics.
4. Design prototypes.
5. Apply usability tests.
6. Evaluate user experience.

3. Detailed Theory Syllabus:

Prerequisite: Web Technologies, Software Engineering, Human Computer Interaction

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction	Introduction to interface design, Understanding and conceptualizing Interface, Understanding User's conceptual cognition.	4
2	Elements of UX Design	Core Elements of User Experience, Working of UX elements	4
3	The UX Design Process – Understanding Users	Defining the UX, Design Process and Methodology, Understanding user requirements and goals, Understanding the Business Requirements/Goals, User research, mental models, wireframes, prototyping, usability testing.	8
4	The UX Design Process- The Structure: Information Architecture and Interaction Design	Visual Design Principles, Information Design and Data Visualization Interaction Design, Information Architecture, Wireframing & Storyboarding, UI Elements and Widgets, Screen Design and Layouts	8

5	UX Design Process: Prototype and Test	Testing your Design, Usability Testing, Types of Usability Testing, Usability Testing Process, Preparing and planning for the Usability Tests, Prototype your Design to Test, Introduction of prototyping tools, conducting Usability Test, communicating Usability Test Results	8
6	UX Design Process: Iterate Improve and Deliver	Understanding the Usability Test, findings, Applying the Usability Test, feedback in improving the design. Communication with the implementation team. UX Deliverables to be given to implementation team	4

4. Suggested Experiments:

1. Project Declaration.
2. User Research-Contextual Inquiry and survey.
3. Conveying Research Findings-Personas and Scenarios.
4. Design Sketches and Ideas.
5. Prototypes.
6. Experimental Design and Experience Sampling.
7. Final Report and Presentation.

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

A. Books:

1. Interaction Design, Beyond Human Computer Interaction, Rogers, Sharp, Preece Wiley India Pvt Ltd.
2. The essentials of Interaction Design, Alan Cooper, Robert Reimann, David Cronin.
3. Designing The user Interface by Shneiderman, Plaisant, Cohen, Jacobs Pearson.

B. References:

1. The Elements of User Experience by Jesse James Garrett.
2. Don't make me think, by Steve Krug.
3. Observing the User Experience: A Practitioner's Guide to User Research by Mike Kuniavsky.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 406	Social Media Analytics	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 406	Social Media Analytics	40	40	40	60	25	--	25	150

1. Course Objectives: The course is aimed to:

1. Understand the concept of social media analytics and understand its significance
2. Understand social network analytics essentials and visualization tools for navigating diverse social media network
3. Develop expertise in analyzing social media text, actions, and hyperlinks
4. Recognize the significance of social media location and search engine analytics
5. Understand advanced strategies for social media engagement, brand reputation management, and risk mitigation
6. Examine social media campaigns through analytics while navigating privacy, ethics, and legal consideration

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Demonstrate an understanding of the concept of social media analytics and recognize its significance in contemporary digital environments.
2. Acquire proficiency in essential social network analytics principles and visualization tools to effectively navigate diverse social media networks.
3. Develop expertise in analyzing social media text, actions, and hyperlinks to extract valuable insights.
4. Recognize the importance of social media location and search engine analytics and apply them to optimize digital strategies.
5. Apply advanced strategies to enhance social media engagement, manage brand reputation effectively, and mitigate risks.
6. Apply analytics techniques to evaluate and optimize social media campaigns, while adhering to privacy, ethics, and legal considerations

3. Detailed Theory Syllabus:

Prerequisite: Graph Theory, Data Mining, Python/R programming

Module No	Module	Detailed Contents of Module	Hrs.
1	Social Media Analytics: An Overview	Core Characteristics of Social Media, Types of Social Media, Social media landscape, Need for Social Media Analytics (SMA), SMA in organizations. Purpose of Social Media Analytics, Social Media vs. Traditional Business Analytics, Seven Layers of Social Media Analytics, Types of Social Media Analytics, Social Media Analytics Cycle, Challenges to Social Media Analytics, The Limitations of Social Media Analytics, Social Media Analytics Tools	6
2	Social Network Structure, Measures & Visualization	Basics of Social Network Structure - Nodes, Edges & Tie, Describing the Networks Measures - Degree Distribution, Density, Connectivity, Centralization, Tie Strength & Trust,	8

		Network Visualization - Graph Layout, Visualizing Network features, Scale Issues. Social Media Network Analytics - Common Network Terms, Common Social Media Network Types, Types of Networks, Common Network Terminologies, Network Analytics Tools	
3	Social Media Text, Action & Hyperlink Analytics	Social Media Text Analytics - Types of Social Media Text, Purpose of Text Analytics, Steps in Text Analytics, Social Media Text Analysis Tools Social Media Action Analytics - What Is Actions Analytics? Common Social Media Actions, Actions Analytics Tools Social Media Hyperlink Analytics - Types of Hyperlinks, Types of Hyperlink Analytics, Hyperlink Analytics Tools	6
4	Social Media Location & Search Engine Analytics	Location Analytics - Sources of Location Data, Categories of Location Analytics, Location Analytics and Privacy Concerns, Location Analytics Tools Search Engine Analytics - Types of Search Engines, Search Engine Analytics, Search Engine Analytics Tools	6
5	Social Information Filtering & Social Media Brand Reputation Management	Social Information Filtering - Social Sharing and filtering , Automated Recommendation systems, Traditional Vs social Recommendation Systems Understanding Social Media and Business Alignment, Social Media KPI, Formulating a Social Media Strategy, Managing Social Media Risks Brand Reputation Management - Strategies for monitoring and managing online brand reputation, crisis management, and responding to customer feedback.	6
6	Social Media Campaign Analytics & Privacy, Ethical and Legal Considerations	Social Media Campaign Analytics - Evaluating the effectiveness of social media marketing campaigns, tracking conversions, and optimizing campaign performance. Addressing privacy concerns, data protection, ethical implications in social media analytics and legal considerations	6

4. Suggested Experiments:

- Study various -
 - Social Media platforms (Facebook, twitter, YouTube etc)
 - Social Media analytics tools (Facebook insights, google analytics, Netlytic)
 - Social Media Analytics techniques and engagement metrics (page level, post level, member level)
 - Applications of Social media analytics for business
- Select the social media platforms of your choice (Twitter, Facebook, LinkedIn, YouTube, Web blogs etc) and collect social media data for business.
- Perform data cleaning (preprocess, filter) and store the social media data for business in database
- Perform exploratory data analysis and visualization of social media data for business.
- Perform social network data analytics to identify social media influencers for business
- Perform content based analysis (topic , issue , trend, sentiment/opinion analysis) of social media data for business.
- Develop a dashboard and reporting tool based on real time and historical social media data for business.
- Design the creative content for promotion of your business on social media platform
- Analyze competitor activities using social media data related to your business
- Develop social media analytics models of your business

5. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and a half hours.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

- A. Term Work:** Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.
- B. Term Work Marks:** 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

A. Books:

- a. Seven Layers of Social Media Analytics_ Mining Business Insights from Social Media Text, Actions, Networks, Hyperlinks, Apps, Search Engine, and Location Data, Gohar F. Khan,(ISBN-10: 1507823207).
- b. Analyzing the Social Web 1st Edition by Jennifer Golbeck
- c. Mining the Social Web_ Analyzing Data from Facebook, Twitter, LinkedIn, and Other Social Media Sites, Matthew A Russell, O'Reilly
- d. Charu Aggarwal (ed.), Social Network Data Analytics, Springer, 2011

B. References:

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 407	Digital Forensics	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 407	Digital Forensics	40	40	40	60	25	--	25	150

- Prerequisite:** Computer Network, Cryptography and Security
- Course Objectives:** The course / instructor aims to
 - To discuss the need and process of digital forensics and Incident Response Methodology.
 - To explore the procedures for identification, preservation, and acquisition of digital evidence.
 - To explore techniques and tools used for analyzing Hard Disk ., RAM Forensics and Malware Analysis
 - To explore techniques and tools used in digital forensics for Operating systems and malware investigation
 - To explore Mobile Forensics, SIM Card Forensics and GPS Forensics.
 - To explore techniques and tools used for Browser browser, email forensics and Generating the Report.
- Course Outcomes:** On successful completion of this course, learner/ student will be able to:
 - Discuss the phases of Digital Forensics and methodology to handle the computer security incident.
 - Describe the process of collection, analysis and recovery of the digital evidence.
 - Explore various tools to analyze malwares and acquired images of RAM/hard drive.
 - Acquire adequate perspectives of digital forensic investigation in mobile devices
 - Analyze the source and content authentication of emails and browsers.
 - Produce unambiguous investigation reports which offer valid conclusions.

4. Detailed Theory Syllabus

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction to Digital Forensics	1.1 Digital Forensics: Definition, Digital Forensics Goals, Digital Forensics Categories - Computer Forensics, Mobile Forensics, Network Forensics, Database Forensics 1.2 Introduction to Incident - Computer Security Incident, Goals of Incident Response, CSIRT, Incident Response Methodology, Phase after detection of an incident	6
2	Digital Evidence, Forensics Duplication and Acquisition	2.1 Digital evidence: Types of Digital Evidence, Challenges in acquiring Digital evidence, Admissibility of evidence, Challenges in evidence handling, Chain of Custody 2.2 Digital Forensics Examination Process - Seizure, Acquisition, Analysis, Reporting. Necessity of forensic duplication, Forensic image formats, Forensic duplication techniques,. 2.3 Acquiring Digital Evidence - Forensic Image File Format, Acquiring Volatile Memory (Live Acquisition), Acquiring Nonvolatile Memory (Static Acquisition), Hard Drive Imaging Risks and Challenges, Network Acquisition	9

3	Data Forensics	3.1 Data Forensics: Analyzing Hard Drive Forensic Images, Analyzing RAM Forensic Image, Investigating Routers 3.2 Data Recovery Techniques- Deleted files, Formatted Drives and Corrupted data.	4
4	Forensics Investigation of Windows OS	4.1 Investigating Windows Systems - File Recovery, Windows Recycle Bin Forensics, Event log analysis (.evtx), Data Carving, Windows Registry Analysis, USB Device Forensics, File Format Identification, Windows Features Forensics Analysis, Windows 10 Forensics, Cortana Forensics.	6
5	Mobile Forensics	5.1 Mobile Forensics: Android Forensics, Mobile Device Forensic Investigation - Storage location, Acquisition methods, Data Analysis 5.2 GPS forensics - GPS Evidentiary data, GPS Exchange Format (GPX), GPX Files, Extraction of Waypoints and TrackPoints, Display the Tracks on a Map. 5.3 SIM Cards Forensics - The Subscriber Identification Module (SIM), SIM Architecture, Security, Evidence Extraction.	8
6	Browser, Email Forensic & Forensic Investigation Reporting	6.1 Web Browser Forensics, Google chrome, Other web browser 6.2 Email forensics - Techniques in Email Forensics-Header Analysis, Server Investigation, Tracing IP Addresses: find the origin of the email using IP lookup. Phishing and Spoof Detection- Analyze for fake email domains, lookalike addresses, and deceptive links. 6.3 Investigative Report Template, Layout of an Investigative Report, Guidelines for Writing a Report, 63B certificate as per evidence act	6

1. DETAILED PRACTICAL SYLLABUS:

Suggested List of Experiments:

1. Analysis of forensic images using open source tools: FTK Imager, Autopsy.
2. Explore forensics tools in kali linux for acquiring, analyzing and duplicating data.
3. Performing penetration testing using Metasploit - kali Linux.
4. Performing RAM Forensic to analyze memory images to find traces of an attack: (i) Capturing RAM Using the DumpIt Tool; (ii) Volatility tool.
5. Network forensics using Network Miner.
6. Windows Recycle Bin Forensics.
7. Data Carving using open source tools: Foremost, Scalpel, Jpegcarver
8. USB Device Forensics using USBDeview, USB Detective.
9. Web Browser Forensics using DB Browser for SQLite
10. Generate a Timeline Report Using Autopsy
11. Email Analysis
12. Case Study

2. Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.
2. End Sem Theory Examination:
 - Question paper will consist of 5 questions, each carrying 20 marks.
 - Total 3 questions need to be solved.
 - Q.1 will be compulsory, based on the entire syllabus.
 - Remaining questions will be randomly selected from all the modules.
 - Weightage of marks should be proportional to the number of hours assigned to each module.

3. Practical Assessments:

1. **Termwork Assessment:** Term Work shall consist of at least 10 to 12 practical's based on the above list. Also Term work Journal must include at least 2 assignments. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance).
2. **Oral/Viva Assessment:** An oral exam will be held based on the above syllabus.

4. Text Books:

1. Kevin Mandia, Chris Proise, —Incident Response and computer forensicsl, Tata McGrawHill, 2006.
2. Digital Forensics Basics - A Practical Guide Using Windows OS — Nihad A. Hassan, APress, 2019.
3. Xiaodong Lin, —Introductory Computer Forensics: A Hands-on Practical Approachl, Springer 2018.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 408	Computer Vision	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 408	Computer Vision	40	40	40	60	25	-	25	100

1. Course Objectives:

The course is aimed to:

1. Recognize and describe both the theoretical and practical aspects of computing with images.
2. Describe the foundation of image formation and image analysis.
3. Understand the basics of 2D and 3D Computer Vision.
4. Describe various methods used for registration, alignment, and matching in images.
5. Understand Object, Face and Instance Recognition.
6. Implement computer vision applications.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Implement fundamental image processing techniques required for computer vision.
2. Understand the Image formation process.
3. Extract features from Images and do analysis of Images.
4. Generate 3D models from images.
5. Understand video processing, motion computation and 3D vision and geometry, Camera Calibration.
6. Develop applications using computer vision techniques

3. Detailed Theory Syllabus:

Module No	Module	Detailed Contents of Module	Hrs.
1	Introduction to computer vision	What is computer vision? , A brief history of computer vision, Applications of Computer Vision	5
2	Image Formation	Geometric primitives and transformations, Photometric image formation, The digital camera	6
3	Image Preprocessing	Image preprocessing, Image representations (continuous and discrete), Frequency domain filtering	7
4	Feature Detection and Matching	Points and Patches, Edges , Lines, 2D and 3D feature-based alignment , Geometric Intrinsic calibration	7
5	Multiple Views and Motions	Stereo introduction, Camera Calibration, Epipolar Geometry, and Structure from Motion, Dense Stereo Correspondence, Optical Flow	8
6	Recognition	Object Recognition, Face Recognition, Instance Recognition	6

4. Suggested Experiments:

1. Study of computer vision applications.
2. Implement camera calibration methods.
3. i) Implement image preprocessing and Edge detection.
ii) Implement image filtering using frequency domain filtering techniques.

4. i) Construct a 3D model from Stereo pair.
ii) Construct a 3D model from defocus image.
5. i) Construct a 3D model from Stereo pair.
ii) Implement optical flow method.
6. Implement Face detection and Recognition.

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

B. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

7. Books and References:

A. Books:

1. Richard Szeliski, Computer Vision: Algorithms and Applications (CVAA). Springer, 2010.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 409	High Performance Computing	Contact Hours	3	2	-	5
		Credits	3	1	-	4

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 409	High Performance Computing	40	40	40	60	25	--	25	150

1. Course Objectives:

The course is aimed to:

1. To learn fundamental concepts of parallel processing.
2. To learn utilization of high performance computing resources using programming frameworks.
3. To learn usage of modern processor technology as a high performance computing platform.
4. To learn and appreciate core design issues in parallel computing.
5. To study application of high performance computing to practical problems.
6. To understand factors limiting performance of high performance computing systems.

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. Memorize and Understand classes of parallel computer architectures.
2. Understand standardized, multi-platform communication methods for parallel programming.
3. Understand usage of graphical processing unit hardware as high performance computing unit.
4. Analyze fundamental issues in parallel computing.
5. Understand parallel computing implementation for a computationally intensive problem.
6. Understand practical limitations of technology for high performance computing.

3. Detailed Theory Syllabus:

Module No	Module	Detailed Contents of Module	Hrs.
1	Parallel Processing Concepts	Levels of parallelism (instruction, transaction, task, thread, memory, function), Models (SIMD, MIMD, SIMT, SPMD, Dataflow Models, Demand-driven Computation etc), Architectures: N-wide superscalar architectures, multi-core, multi-threaded	6
2	Parallel Programming with MPI, OpenMP	Processor Architecture, Interconnect, Communication, Memory Organization, and Programming, building blocks of MPI, Overlapping communication and computation, collective communication operations, OpenMP Threading Building blocks; An Overview of Memory Allocators, Parallel programming model, combining MPI and OpenMP, Shared memory programming	12
3	Parallel Programming using GPU	Models in high performance computing architectures: (Examples: Nvidia Tesla GPU), Memory hierarchy and transaction specific memory design, Thread Organization, An Overview of CUDA, Programming with CUDA	8
4	Fundamental Design Issues	Synchronization, Scheduling, Job Allocation, Job Partitioning, Dependency Analysis, Mapping Parallel Algorithms to Parallel Architectures, Performance Analysis of Parallel Algorithms	8

	in Parallel Computing		
5	Fundamental Limitations Facing Parallel Computing	Bandwidth Limitations, Latency Limitations, Latency Hiding/Tolerating Techniques and their limitations	3
6	Application of HPC	CASE study in HPC	2

4. Suggested Experiments:

1. Study and Write case study on your College network.
2. Write program for matrix multiplication using MPI.
3. Write program for matrix addition using OpenMP.
4. Write program for matrix addition using CUDA.
5. Write program for parallel quicksort algorithm.
6. Write a program to Send message to parallel computers connected through network and find latency.
7. Write a case study on application of HPC.

5. Theory Assessment:

A. Internal Assessment (IA): Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one and half hour.

A. End Semester Theory Examination: In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.

1. Question paper will consist of 3 questions, each carrying 20 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
4. Total three questions need to be solved.

6. Practical Assessment: An Practical / Oral exam will be held based on the above syllabus. The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

A. Term Work: Term Work shall consist of practicals based on the above list. Also Term work Journal must include at least 2 assignments based on the topics mentioned in the syllabus.

B. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance)

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 470	Digital Business Management and Digital Marketing	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 470	Digital Business Management and Digital Marketing	40	40	40	60	-	-	--	100

Course Objectives:

1. To familiarize with digital business concepts.
2. To acquaint oneself with E-commerce.
3. To give insights into E-business and its strategies.
4. To understand digital marketing plans.

Course Outcomes: After completion of this course, learner will be able to

1. Identify drivers of digital business.
2. Illustrate various approaches and techniques for E-business and management.
3. Prepare an E-business plan.
4. Develop a digital marketing plan.

Module	Detail Content	Hrs.
1	Introduction to E-Business, Making Functional Areas E-Business Enabled : Value chain and supply chain, inter and intra organizational business processes, ERP	6
2	Making Functional Areas E-Business Enabled : E-marketing, E-Selling, E-Supply Chain Management, E-Procurement.	6
3	Technologies for E-Business: Internet and Web based system, Security and payment systems, Supply chain integration technologies: EDI, RFID, Sensors, IoT, GPS, GIS; Supply chain integration technologies: Web services and cloud.	8
4	Marketing concept, Coordinated marketing, Meta marketing, Holistic marketing dimensions, : Case Analysis, Case Discussion; Marketing Environment.	6
5	Marketing decisions, Customer delivered value, Buyer Behaviour, Input - output map, Case Discussion, Marketing Planning, Price, Distribution, Advertising and Promotion, Case Discussion.	8
6	Marketing mix, Product policy, New products, PLC, Marketing organization, Product Management.	5

Assessment:**Internal Assessment: 40 marks**

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 471	Business Analytics	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 471	Business Analytics	40	40	40	60	-	-	--	100

Course Objectives: The course is aimed to:

1. To understand the importance of business analytics .
2. To learn how to explore and summarize the data with statistical methods.
3. To study how to represent and process the data.
4. To provide hands-on experience with data visualization techniques and hypothesis testing.
5. Discuss the ethical implications of data privacy and security in business analytics.
6. Encourage critical thinking and problem-solving skills through practical applications.

Course Outcomes: On successful completion of course learner/student will be able to:

1. Understand the fundamentals of business analytics.
2. Students will be able to evaluate the quality of data and its impact on analytical outcomes.
3. Apply statistical techniques to analyze data
4. Creation of informative data visualizations and draw meaningful conclusions from testing.
5. Demonstrate ethical decision-making skills when faced with ethical dilemmas in business analytics.
6. Apply analytical techniques learned throughout the course to solve real-world business problems.

Module	Detail Content	Hrs.
1	Introduction to Business Analytics : Definition, scope and importance of business analytics, introduction to business planning, types of plans, levels of planning, overview of analytical tools and techniques.	3
2	Exploring Data: Introduction to different types of data (structured, semi-structured, and unstructured data). Extract, transform and load (ETL) data - ETL fundamentals, data extraction, data transformation, data mapping and Conversion. descriptive statistics measure of central tendency (mean, median, mode) and dispersion (variance, standard deviation), probability theory, conditional probability and bayes' theorem, random variables and probability distributions: discrete (binomial, poisson) and continuous (normal, exponential) distributions.	7
3	Statistical Analysis: Business analytics with excel: importance of excel functionalities, analysis with pivot tables, dashboard creation. Statistical analysis with Python, correlation and regression analysis, time series analysis.	6

4	Data visualization and Hypothesis testing: Principles of effective data visualization, tableau for business Intelligence- tableau workspace and types of charts, data preparation and chart creation, filters and analytics in Tableau, tableau dashboards. Understanding UML diagrams, UMLtools for Business process analysis BPMN (Business Process Model and Notation) in business process Analysis, BPMN diagrams. Null and alternative hypotheses: Formulating hypotheses for testing (anova, chi-square tests, t-tests).	10
5	Ethical considerations in Business Analytics: Privacy, security and confidentiality of data, bias and fairness of data, Types of biases (sampling bias, selection bias, algorithmic bias) and their impact on analytics, strategies for detecting and mitigating biases in data, transparency and Accountability of data.	5
6	Application and case studies: Real-world case studies in various industries (e.g., Customer segmentation and targeting, Market forecasting, Social media analytics, Fraud detection, Demand forecasting, Customer churn analysis etc.) Application of analytics techniques to solve business problems	8

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 472	IPR and Patenting	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 472	IPR and Patenting	40	40	40	60	-	-	--	100

Course Objectives:

1. To introduce fundamental aspects of Intellectual property Rights to learner who are going to play a major role in development and management of innovative projects in industries.
2. To get acquaintance with Patent search, patent filing and copyright filing procedure and applications, and can make career as a patent or copyright attorney.
3. To make aware about current trends in IPR and Govt. steps in fostering IPR,

Course Outcomes: Learner will be able to...

1. Understand the importance of IPR, types of Patent type and its importance in industries.
2. Able to search, draft and file the patent and copyright application to patent office.
3. Learn the recent trends of IPR and can open the way for the students to catch up Intellectual Property (IP) as a career option:
 - a) R&D IP Counsel in research organization
 - b) Government Jobs – Patent Examiner
 - c) Private Jobs
 - d) Patent agent and Trademark agent.

Module	Detail Content	Hrs.
1	Overview of Intellectual Property: Introduction and the need for intellectual property right (IPR) - Kinds of Intellectual Property Rights: Patent, Copyright, Trade Mark, Design, Geographical Indication, Plant Varieties and Layout Design – Genetic Resources and Traditional Knowledge – Trade Secret - IPR in India : Genesis and development – IPR in abroad - Major International Instruments concerning Intellectual Property Rights: Paris Convention, 1883, the Berne Convention, 1886, the Universal Copyright Convention, 1952, the WIPO Convention, 1967, the Patent Cooperation Treaty, 1970, the TRIPS Agreement, 1994	9
2	Patents: Patents - Elements of Patentability: Novelty, Non-Obviousness (Inventive Steps), Industrial Application - Non - Patentable Subject Matter - Registration Procedure, Rights and Duties of Patentee, Assignment and license, Restoration of lapsed Patents, Surrender and Revocation of Patents, Infringement, Remedies & Penalties - Patent office and Appellate Board	7
3	Copyright: Nature of Copyright - Subject matter of copyright: original literary, dramatic, musical, artistic works; cinematograph films and sound recordings - Registration Procedure, Term of protection, Ownership of copyright, Assignment and license of copyright - Infringement, Remedies & Penalties – Related Rights - Distinction between related rights and copyrights	6

4	Trademark: Concept of Trademarks - Different kinds of marks (brand names, logos, signatures, symbols, well known marks, certification marks and service marks) - Non-Registrable Trademarks - Registration of Trademarks - Rights of holder and assignment and licensing of marks - Infringement, Remedies & Penalties - Trademark's registry and appellate board.	6
5	Patent Acts: Section 21 of the Indian Patent Act, 1970 (and corresponding Rules and Forms) with specific focus on Definitions, Criteria of Patentability, Non-Patentable Subject Matters, Types of Applications, and Powers of Controllers. Section 25 - Section 66 of the Indian Patent Act, 1970 with specific focus on the Oppositions, Anticipation, Provisions of Secrecy, Revocations, Patent of Addition, and Restoration of Patents. Section 67 - Section 115 of the Indian Patent Act, 1970 with specific focus on Patent Assignments, Compulsory Licensing, Power of Central Government, and Infringement Proceedings. Section 116 - Section 162 of the Indian Patent Act, 1970 with specific focus on Convention/PCT Applications, Functions of Appellate Board and other Provisions. Amendment Rules 2016 with emphasis on important revisions to examination and Hearing procedures; provisions for start-ups and fees.	9
6	Indian IP Policy: India's New National IP Policy, 2016 – Govt. of India step towards promoting IPR – Govt. Schemes in IPR – Career Opportunities in IP – IPR.	3

Assessment:

Internal Assessment: 40 marks

3. Consisting of One Compulsory Class Tests of 40 Marks
4. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 473	Medical Image Processing	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 473	Medical Image Processing	40	40	40	60	-	-	--	100

Course Objectives:

1. To introduce the learners to the basic theory of digital image processing.
2. To expose learners to various available techniques and possibilities of this field.
3. To prepare learners to formulate solutions to general image processing problems.

Course Outcomes: Learner will be able to

1. Record, extract and analyse key information about teeth, muscles, bones etc
2. Acquire the fundamental concepts of a digital image processing
3. Analyze images in the spatial and frequency domain.

Module	Detail Content	Hrs.
1	Medical Imaging Systems: Properties, advantages and disadvantages of X-rays based imaging systems, Magnetic Resonance Imaging (MRI) imaging, Gamma-rays based imaging systems, Positron emission tomography (PET), Single-photon emission computerized tomography (SPECT) scan, Computed Tomography (CT) scan, Ultrasound (sonography), Endoscopy, and Thermography based imaging systems. Difference between different medical imaging systems. Nature of Biomedical images, Objectives of biomedical image analysis, Difficulties in biomedical image acquisition and analysis.	7
2	Medical Imaging Toolkits: ImageJ (and/or FIJI), ITK-Snap, SimpleITK, MITK, FreeSurfer, SLICER, OsiriX. Image Formats: dicom (.dcm), Nifti (.nii), Minc (.mnc), Analyze (img/hdr), Raw (.raw), MHD (.mhd) and MHA (.mha)	5
3	Medical Image Detection and Recognition: Medical image parsing, Deep Learning for Medical Image Recognition, Automatic Interpretation of Carotid Intima-Media Using Convolutional Neural Networks, Deep Cascaded Networks for Sparsely Distributed Object Detection, Deep Voting and Structured Regression for Microscopy Image Analysis.	6
4	Medical Image Registration: Intensity-based methods, Cost functions - correlation, least squares, mutual information, robust estimators. Optimization techniques - fixed-point iteration, gradient descent, Nelder-Mead simplex method. MRI motion compensation, Convolutional Neural Network for Robust and Real-Time 2-D Registration.	6
5	Medical Image Segmentation Networks: Comparative study and analysis of U-Net family of segmentation: U-Net, V-Net, 3D U-Net, H-DenseUNet, GP-Unet, UNet++, MDU-Net, DUNet,	9

	RA-UNet, nnU-Net, SUNet, IVD-Net, LADDERNET, Attention U-Net, R2U-Net, MultiResUNet, U-NetPlus, CE-Net, CIA-Net, U2-Net, ScleraSegNet, AHCNet, MFP-Unet, ResUNet-a, RAUNet, 3D U2-Net, SegNAS3D, U^2-Net, UNET 3+.	
6	Deep Learning for Healthcare: Deep learning for different healthcare applications: Diabetic Retinopathy, Knee Osteoarthritis, Histological and Microscopic Elements Detection, Gastrointestinal Diseases Detection, Cardiac Imaging. Lesion detection: Brain tumor detection, prostate lesion detection, Lung nodule detection.	6

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 474	Bio Mechanics	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 474	Bio Mechanics	40	40	40	60	-	-	--	100

Course Objectives:

1. Introduce basic biomechanical terminologies and principles relevant to the human body.
2. Analyze the kinematics and forces acting on muscles and joints using free-body diagrams.
3. Perform biomechanical assessments of the upper and lower limb joints to understand movement mechanics.
4. Examine the mechanical properties of hard and soft tissues and their implications for human movement.

Course Outcome: Students will be able to

1. Accurately define key biomechanical terms.
2. Effectively create and interpret free-body diagrams for joint analysis.
3. Analyze joint mechanics in the upper limb and lower limb, identifying critical forces.
4. Apply gait analysis principles to differentiate between healthy and pathological movement patterns.
5. Explain the mechanical properties of hard tissues and their relevance to biomechanics.
6. Examine biofluid mechanics and blood flow dynamics in the cardiovascular system.

Module	Detail Content	Hrs.
1	Introduction: Introductory Mechanics – Statics and Dynamics – Basic Principles. The human body as a biomechanical system – basic terminologies	6
2	Joint Mechanics: Kinematics of muscles and joints - free-body diagrams and equilibrium, forces and stresses in joints Biomechanical analysis of joints of upper limb - Shoulder, Elbow, wrist, hand and fingers	7
3	Analysis of Joints: Upper limb as a mechanical system – analysis of reaching as movement of a multi-link serial chain – forward kinematics, analysis of fingertip forces as a parallel manipulator Biomechanical analysis of joints – Spine, Hip, Knee, Ankle.	7
4	Gait Analysis: Introduction to Postural stability and Gait analysis. Gait analysis in health and disease - basics.	6
5	Tissue Mechanics:	7

	Mechanics of Hard Tissues - Definition of Stress and Strain, Deformation Mechanics, structure and mechanical properties of bone - cortical and cancellous bones, Wolff's law of bone remodeling; Soft Tissues - Structure, functions, material properties – tendon function, elasticity in a tendon, models of non-linear elasticity in a tendon – physiological and non-physiological regimes, Davis' law of soft tissue remodeling.	
6	Biofluid mechanics: Visco-elastic properties of soft tissues, Models of visco-elasticity: Maxwell & Voight models. Basic Biofluid mechanics - Flow properties of blood in the intact human cardiovascular system.	6

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 475	Product Design	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 475	Product Design	40	40	40	60	-	-	--	100

Course Objectives:

1. To familiarize with fundamental product design concepts
2. To acquaint with product design methodologies
3. To understand product design needs and issues in industry

Course Outcomes: Learner will be able to

1. Demonstrate product design and development process.
2. Analyze a product in perspective of aesthetic and ergonomic considerations.
3. Illustrate considerations of Design for Manufacturing and Assembly in product development.
4. Apply appropriate tools and techniques in the design of solutions that are usable and functional for various applications.
5. Design the products as per the customer/industry requirements
6. Apply principles of economy and demonstrate legal and social issues pertaining to product development.

Module	Detail Content	Hrs.
1	Product definition, specification, Phases of product development: conceptual, embodiment and detailed design, product and technology development cycle, Concept generation and evaluation methods, product architecture, Product life cycle Management with case studies, Product analysis. Creativity and Idea generation technique, importance of Quality Dimensions: Performance, Features, aesthetics, Ergonomics, Reliability, Sustainability, Serviceability, Brand value, Value Vs cost, Importance of shape, color, feature & Resemblance.	6
2	Design Factors: Ergonomics, Aesthetics, Anthropometry, Comforts, Economic factors Axiomatic design principles and case studies. Design Thinking, Design by Innovation and collaboration Material and Process selection Methods, Expert systems. Computer Database Approach, performance indices decision matrix, AHP and fuzzy approach, Introduction to material and process selection software.	6
3	Design for Manufacturing (DFM) and Design for Assembly (DFA) Designs for Maintainability and Reliability and some methods for reliability assessment, Designs for Environment, Design for Robustness: Taguchi Designs & Design of Experiments (DOE).	8

4	Product Design Tools and Techniques: Value Engineering / Value Analysis: definition, methodology- FAST, Benchmarking, Supplier involvement robust design, QFD, Design & process FMEA. Reverse Engineering, Concurrent engineering & Sequential engineering, Case studies.	8
5	Product Development Cycle and Importance of Prototyping. Types of prototypes. Principal and advantages & Different Type of Generative Manufacturing process, Viz. Stereo lithography. FDM, SLS etc. Factors Concerning to RP: Consideration for Adoptions, Advantages, Accuracy and Economic Consideration. Introduction to Assembly Modeling, Top-Down and Bottom-Up Approaches of AM, Mating Conditions, representation Schemes. Generation of Assembly Sequences. Case studies	6
6	Economics of Product Development: Product costing, Principals of Economy, Engineering Economy and Design Process, Economic Analysis, Inflation, Time Value of Money, Numerical on Internal Rate of Return and Net Present Value (NPV) method. Legal and social issues, Patents and IP acts.	6

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Reference Books:

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 476	Technologies for Rural Development	40	40	40	60	-	-	--	100

Course Objectives:

1. To understand the concept of rural technology
2. To understand the characteristics of rural resources and its importance in Rural Development.
3. To understand various technologies required for Rural Development
4. Rural planning and implementation of rural development projects
5. To generate awareness regarding government policies (monitoring and documentation).

Course Outcomes: Learner will be able to

1. Understand various natural resources and their importance in rural development.
2. Get exposure to various challenges and problems with regard to availability and use of natural resources.
3. Develop and implement various technologies for rural development
4. Explore various schemes for rural development

Module	Detail Content	Hrs.
1	Rural Resources- Understanding the Characteristics and nature of Rural Recourses Importance of different resources in Rural Development. Natural resource management(NRM)	3
2	Concept of Information and Communication Technologies (ICT's) in Rural Development- Evolution of ICT's, Communication Functions of ICT's, Nature and Scope of ICT's, Information Haves and Information Have Nots in the Rural Areas, Strengths and Weaknesses of ICT's in Rural India, Application of ICT's for Rural Development in India, Satellite Communication support for Rural Development, Telecommunication support for Rural Development, Computer Communication support for Rural Development	6
3	Management Information System for Rural Development in India Basic concepts Role of MIS in the management of agricultural extension programmes Design of a MIS in an agricultural extension organization Need for automation ,Organization of a database Networking and	8

	interactive processing , End-user computing Illustrative computer-based MIS , Rural Energy system	
4	The Role of Rural Technology – Global approach in Innovative Rural technology Innovative technologies in Production and Postharvest management, Innovation in productivity and Sustainable management(Bio fertilizer) Innovation Commercial Production Technologies Technology for Rural Women, difficulties in adoption of rural technology.	6
5	Globalisation of Rural Economy- Globalisation and aims and objectives; Impact of Globalisation on rural economy, Design and Innovation in Integrated Rural Health Management, SEZ's and Agriculture. Agricultural value chain	4
6	Government Schemes and initiatives- Various government schemes, participation of various Stake holders for development and Protection of Rural resources	3

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 477	Economics	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 477	Economics	40	40	40	60	-	-	--	100

Course Objectives:

1. Provide a good grounding in the basic concepts of Micro and Macroeconomics.
2. Familiarize learners with concept of demand, supply, price, income and equilibrium.
3. Teach students to represent Indifference curve in regular as well as in exceptional cases with respect to consumer behaviour, consumer preferences and Risk Aversion.
4. To inculcate the skills required to understand the concept of Production function with single and two variable inputs.
5. To create an awareness of the different market structures and its impact on the price and output of a product.
6. To prepare the learners in understanding the Keynesian System of Money, Interest and Income and its impact in society with respect to Inflation.

Course Outcomes: Learner will be able to

1. Acquire conceptual and theoretical knowledge of Micro and Macroeconomics and learn to think critically about issues and topics of the subject.
2. Demonstrate the understanding of the concepts of demand, supply, price, income and equilibrium and relate it to the existing scenario in the society.
3. Perform successfully in representing the Indifference curve in relation to the prevalent consumer behaviour and consumer preferences.
4. Illustrate the skills required for maximising output and minimising cost for effective production.
5. Determine the importance of the existence of different market structures and its impact in society.
6. Develop an understanding of the Keynesian System of Money, Interest and Income and formulate anti- inflationary policies.

Module	Detail Content	Hrs.
1	Introduction to Micro and Macro Economics	5
2	Demand & Supply: Concept of demand & supply functions, Price, Income & Cross elasticities of demand, Elasticity of Supply, Market demand functions, Concept of equilibrium, Impact of changes in demand & supply on equilibrium	7
3	Theory of Consumer Behaviour: Concept of cardinal and ordinal utility, consumer's equilibrium, Consumer's preferences, Risk Aversion and Indifference Curve Analysis, & its properties, Shapes of Indifference Curves in exceptional cases	7
4	The Theory of Production: Concept of Production function, Production with a single variable input, Production with two variable inputs, Optimal	6

	input combination, Constrained output maximization, Cost minimization, Elasticity of substitution	
5	Theory of Cost: Different concept of cost, Short-run and Long- run cost analysis, modern concept. Market Structures a. Perfect Competition Short-run and long-run equilibrium of the firm and Industry, Stability of equilibrium, Concept of imperfect competition; short run and long run price and output decisions of a monopoly firm; concept of a supply curve under monopoly; comparison of perfect competition and monopoly,	4
6	The Keynesian System: Money, Interest and Income Money in the Keynesian theory, Interest Rate Determination (Liquidity Preference Theory), Money Market, Bond market and Commodity Market, Monetary policies and fiscal policies, Inflation and Unemployment Inflation, Role and Effects of inflation, Anti- inflationary policies	7

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Reference Books:

1. Dr. Samwel Nyagucha Ores. (2019). Micro and Macro Economics: Understanding the Basics of Economics. New Generation Publishing.

IL 478	Journalism, Media and Communication studies	40	40	40	60	-	-	--	100

Course Objectives:

1. Provide a good grounding in the basic concepts of Journalism, Mass communication and Media.
2. Familiarize learners with reporting and editing practices.
3. Teach students to write editorials, feature articles, interviews, reviews, criticism etc.
4. To inculcate the skills required for writing in online newspapers, blogs, email and cell phone.
5. To prepare the learners for understanding the importance of Press laws and Ethics.
6. To train learners in advertising techniques and Public Relation Communication

Course Outcomes: Learner will be able to

1. Acquire conceptual and theoretical knowledge of Journalism, Mass Communication and Media Studies and learn to think critically about issues and topics of the subject.
2. Demonstrate the understanding of reporting and editing from Newspaper and the Organization.
3. Perform successfully in writing effective editorials, featured articles reviews etc.
4. Illustrate the skills required for writing in online newspapers, blogs, emails etc.
5. Determine the importance of Press Laws and Ethics.
6. Develop an understanding of the techniques required for advertising and Public Relation Communication.

Module	Detail Content	Hrs.
1	Introduction to Journalism, Communication, Media and Cultural Studies- Basics of Mass communication, Pioneers of Indian Journalism, Introduction to newspapers, magazines and other publications. Introduction to broadcast journalism with special reference to television	5
2	Reporting and Editing Practices-Reporting different news, stories from Newspaper, and Organization. Principles of editing, rewriting, and translation	7
3	Writing for Print- Newspaper Content Writing Opinion pieces, editorials, feature articles, interviews, profiles, reviews, criticism etc.	7
4	Writing for Media- Introduction to New Media Writing for Online newspapers Blogs Cell phone Communication E-mail	6
5	Press Laws and Ethics- Origin and definition of Law, Law and Morality, Types of Law – Civil and Criminal, Press Legislations, Freedom of the Press Defamation Contempt of Court	4
6	Public Relations and Advertising- Introduction to Public Relations Stages of PR Communication with Public Need and Meaning of Advertising, Advertising strategies and Sales Promotion	7

Assessment:**Internal Assessment: 40 marks**

		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 479	Operation Research for Management	40	40	40	60	-	-	--	100

Course Objectives: The course is aimed

1. To acquaint the students with basics of Operation Research.
2. To learn the different Linear Programming methods.
3. To make the students aware of the topic “sensitivity Analysis”
4. To learn the different methods of solving Transportation & Assignment Problems.
5. To Understand sequencing Models & Related Problems.
6. To explore the different methods used in Game Theory.

Course Outcomes: On successful completion of course learner/student will be able to apply:

1. The basic concepts of Operation Research to solve optimization problems..
2. The different Linear Programming methods to solve Problems.
3. The understanding of Linear Programming to sensitivity analysis.
4. The different methods to solve Transportation & assignment Problems.
5. The concept of sequencing models to related problems.
6. The understanding of Game Theory and solving related Problems.

Detailed Theory Syllabus:

Module	Detailed Contents	Hrs.
1	Introduction to Operation Research: Canonical & standard form of a Linear Programming Problem, Simplex method, multiple solutions of L.P.P, Infeasible solution & unbounded solution	6
2	Linear Programming Model: Artificial variables, Big M-penalty method, Duality in Linear Programming, dual simplex method, revised simplex method.	8
3	Sensitivity Analysis: Changes in the right handside of the constraint equations ‘ b_i ’ changes in the cost coefficients ‘ c_j ’ changes in the coefficients of the constraints ‘ a_{ij} ’.	6
4	Transportation & Assignment Problems: NorthWest Corner method, Vogel’s approximation method, Hungarian method, maximization problem, unbalanced transportation problem	8

5	Sequencing models & related Problems: Processing n-jobs on two machines , processing n-jobs on m-machines	6
6	Game Theory : Two – person zero sum game with & without saddle points, solution of mixed strategy games , Matrix reduction by dominance.	5

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

4. Operation Research : R. Paneerselvan, PHI Learning Private Ltd.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 480	Weather and Climate Informatics	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 480	Weather and Climate Informatics	40	40	40	60	-	-	--	100

Course Objectives:

1. To promote the safety, health, and welfare of people and the environment through engineering professionals.
2. To encourage students to be productive and contributing members of the environmental profession as practitioners, entrepreneurs, researchers, or teachers.
3. To develop environmental awareness among students that meet specified engineering needs with consideration of public health, safety, and welfare, as well as global, environmental, and legal factors.

Course Outcomes: On successful completion of the course learner/student will be able to:

1. Present the international climate change legal and policy framework and explain key issues under negotiation.
2. Describe the expected consequences of climate change and the role of adaptation.
3. Provide a rationale for climate change mitigation and propose actions in key sectors.
4. Identify main streams of climate change finance.
5. Outline basic elements of planning processes to deliver climate change action.
6. Analyse principal challenges and opportunities for climate change action.

Module	Detailed Contents	Hrs
1	Introduction to Climate Change Science: An overview of key concepts such as climate, weather and the greenhouse gas effect. Human contribution to climate change and provides an overview of important greenhouse gases and their main sources. The main observed changes in the climate since the industrial revolution. Future trends and impacts of climate change on surface temperature, ocean pH, and sea-level.	5
2	Introduction to the International Legal and Policy Framework to address Climate Change: An overview of the international legal and policy framework to address climate change.	6

	Brief history of international climate change negotiations and introduces the United Nations Framework Convention on Climate Change (UNFCCC). Key provisions of the UNFCCC, its organisational structure, and different Party groups under the Convention. The Kyoto Protocol and its associated bodies.	
3	ICT Trends and their Implications for Tackling Climate Change: Information Needs in Adaptation and Mitigation, Communication on Climate Change, Scope and Definition of ICTs, ICT Trends and their Implications for Tackling Climate Change, e-Waste and Recycling ,Green Computing	6
4	Weather and Climate Informatics: Climate Change and Climate Modelling: Global environmental issues in climate change due to human activities or natural climate variations. Understanding and Using Climate Data, The Climate data analysis, Seasonal Climate Forecasting, Climate Extremes, Uncertainty, and Impacts	5
5	Data Challenges and Opportunities in Climate Informatics: Issues with Cross-Class Comparisons, Climate System Complexity. Challenge: Cloud-Computing-Based Reproducible Climate Data Analysis	4
6	LAB WORK or Case Study Software Lab: Introduction to basic data analysis tools. Survey of numerical methods employed in atmospheric and related sciences: theory, application, and programming. OR Report on a Case study	4

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Books/References:

1. Environmental Management: Principles and Practice, C J Barrow, Routledge Publishers London, 1999
2. A Handbook of Environmental Management Edited by Jon C. Lovett and David G.Oakwell, Edward Elgar Publishing

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 481	Maintenance of Mechanical Equipment	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 481	Maintenance of Mechanical Equipment	40	40	40	60	-	-	--	100

Lab Objectives:

1. To understand the use of different types of hand tools, the importance of the right tool for the right job.
2. To understand .importance of preventive and breakdown maintenance, industrial safety
3. Understand assembly of lathe cross slide, spindle.
4. Understand Plumbing tools and pipe fitting minor domestic jobs.
5. To make aware about Importance of work skill in maintenance, also about related electrical, chemical activities
6. Encourage & create start up in maintenance and reconditioning field

Outcomes: Learner will be able to...

1. Know the use of various tools and equipment used in maintenance
2. Know, how to apply particular strategy, scheduling, planning of maintenance
3. Develop students for a start-up activity.

Module	Detailed Contents	Hrs
1	Need and role of maintenance in industry. Preventive and breakdown/shut down maintenance. Planning maintenance schedule, records, Spare parts, procuring & inventory control. In house spares making. (indigenous and import substitutes) Need of plant & process knowledge	4
2	Tools and equipment used in mechanical maintenance, (Torque wrench, Jacks and pullers spanners.... etc) their classification. Importance Selection of the right tool for the right job. Types of fits. Ball Bearings' classification Study of Related electrical equipments, starter switch,, motor, contractors ...etc	6
3	Lathe machine functioning demonstration with, making a simple job.	8
4	Dismantling and assembly of cross slide, tool post. Lathe spindle study	12
5	Domestic plumbing and other Various domestic, "Do it yourself type jobs.	6

	Eg. : Window and split air conditioner periodic cleaning, ceiling fan fitting, mixer repairing, curtain rod fitting on wall..etc.	
6	Industrial safety. Rules and instructions for mechanical safety in industry and safety precautions related to domestic equipment. Risk assessment.	4

Assessment:

Internal Assessment: 40 marks

End Semester Examination: 60 marks

Books/References:

1. Maintenance Engineering – 1 December 2010 , Sushil Kumar Srivastava
2. Handbook for Mechanical Maintenance Engineers – 30 May 2020 , Gyani Mahato
3. Maintenance Engineering Dr. G.K. Vijayaraghavan, Dr. L. Govindarajan

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 482	Physical Education	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 482	Physical Education	40	40	40	60	-	-	--	100

Course Objectives:

1. To understand the components of Physical Fitness.
2. To understand the modern development and social aspects of physical education
3. To understand general troop games, recreational games and the importance of playing to achieve health & wellness.
4. To acquaint students with principles of nutrition and the application of human energy.
5. To understand the role of food in physical performance.
6. To understand the need for wellness & weight management.
7. To understand common sports injuries, first aid & their treatment.
8. To understand the application of Yoga in physical education & sports.
9. To enable the student to understand the basic structure & function of the human body and the effect of exercise on the body as a whole.

Course Outcomes: Learner will be able to

1. Maintain a health-enhancing level of fitness throughout the program as well as be able to collect and analyse personal fitness data.
2. Gain knowledge regarding the application of yoga to Physical Education and Sports
3. Understand the anatomy and Physiology of Asanas and Pranayamas.
4. Acquire the knowledge regarding the effect of exercise on the body as a whole
5. Develop an understanding of the concept of personality, factors affecting personality development
6. To understand proportional body weights and their management
7. To understand nutrition and balance diet

Module	Detail Content	Hrs.
1	Physical Fitness 1.1 Concept, definition and meaning of Physical fitness, activity and exercise 1.2 Components of Physical fitness, Benefits of Physical fitness & exercise. 1.3 Principles of physical fitness 1.4 Definition and concept of wellness and factors affecting Physical fitness & wellness 1.5 Concept and importance of physical conditioning, warming up and cooling down of all age groups	8

2	Nutrition and Dietary Requirement 2.1 Nutrition components and balanced diet 2.2 Meaning and definition of doping and ergogenic aids 2.3 Prevention and first-aid of common injuries during Physical training 2.4 Need of Energy, Carbohydrate and Protein 2.5 Concept training nutrition and competition nutrition	6
3	Wellness, Weight management and Holistic health 3.1 Meaning, concept and components of Wellness 3.2 Manipulation of energy balance to induce weight loss and weight gain 3.3 Methods of weight management 3.4 Concept, types and cause of obesity and its management. 3.5 Waist hip ratio, larger heart, BMI, calculation of Training Heart Rate	6
4	Human body system, function and effect of exercise 4.1 Meaning and Importance of the study of Human anatomy in physical education & sports 4.2 Classification and functions of bones and joints 4.3 Movements of various joints 4.4 Structural classification of muscle, types of muscle and effect of exercise on the musculoskeletal system. 4.5 Structure and Effect of exercise on the cardiorespiratory system 4.6 Digestion and effect of exercise on the digestive system 4.7 Nervous system and effect of exercise on the nervous system.	6
5	Yoga and meditation 5.1 Concept of Yoga and misconception about Yoga 5.2 Comparison of Physical Education exercise and Yogic exercise. 5.3 Meaning, Types and principles of Meditation 5.4 Principles governing various exercises in Yoga(Asana, Pranayam, Bandha, Mudra, Kriya) 5.5 Yoga for stress management and emotional stability 5.6 Application of Yoga in sports & physical education and effect of Yogic exercise on different systems of the human body.	8
6	General & recreational troop games and its method of skill training 6.1 The game soccer and its rules and regulation 6.2 The game Volleyball, Basketball and its rules and regulations 6.3 The Indoor games and their rules and regulations 6.4 Method of sports skill developing training 6.5 Recreational games and their importance in day to day life	6

Assessment:

1. Term Papers (40 Marks):

Two theory papers will be conducted for 40 marks each with average marks of both papers as the final score. One hour theory paper as per the pattern of the semester-end examination will be conducted.

2. Projects/Assignments(30 Marks):

Project on Nutrition (10 Marks): The learner will be given one project on the calculation of Basel metabolic rate. He /she will submit the report of the same in a prescribed format based on which the learner will be evaluated for 10 marks by the concerned teacher/s

Projects/Assignment on Yoga education (10 Marks): The learner will be given an assignment on yoga education such as gathering/compiling the information about the various aspects of asanas and asking to prepare and submit the report of the same based on which the concerned subject teacher will give marks out of 10.

Assignments on Sports Injuries (10 Marks): The learner will be given two assignments on the specific sports injuries and their remedial aspects based on the report submitted in the prescribed format by him/her as well as observations, the concerned teacher/s will give marks out of 10.

3. Physical Activities(25 Marks):

- a. To perform 8 Asanas in a group (10)
- b. To perform one Pranayama and one Kriyas(5)
- c. To perform any five exercises of Motor Fitness. (5)
- d. To perform any five exercises of HRPF(5)

4. Trekking/ Hiking (05 Marks)- The learner should be provided experience of participating in the organization and the actual conduct of the co-curricular activities viz. Hiking/Trekking and the assessment of 05 marks should be done based on learners actual participation and involvement in the same.

		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 483	Vehicle Safety	40	40	40	60	-	-	--	100

Course Objectives:

1. To familiarize basic concepts of vehicle safety.
2. To familiarize accident reconstruction analysis methods
3. To acquaint with different issues related to vehicle safety in India

Course Outcomes: Learner will be able to

1. Comprehend Vehicle design from safety point of view.
2. Apply concepts of accident reconstruction analysis in real world.
3. Enumerate interrelationship among occupant, restraint systems and vehicles in accidents.
4. Illustrate role and significance of seat in Rear crash safety
5. Demonstrate different active and passive safety systems available in vehicles
6. Contribute to the society by being proactive to the cause of safety on roads and in vehicles

Module	Detailed Contents	Hrs.
1	Introduction to vehicle safety-the integrated approach and its classification SAVE LIVES- by WHO Importance of Risk evaluation and communication, Concepts of Universal design, India's BNVSAP and its outcomes	6
2	Crash and distracted driver, Human error control Crash Testing, Use of Dummies, evolution and built of dummies. Relevance of Star ratings, NCAPs around the world- Accident Data, Biomechanics and Occupant Simulation Vehicle Body Testing, Dynamic Vehicle Simulation Tests Occupant Protection, Compatibility, Interrelationship Among Occupants, Restraint Systems and Vehicle in Accidents	8
3	Significance of Rear Crash Safety Role of seat in Rear crash safety Self aligning head restraints Pedestrian Protection testing and systems Under run Protection Devices	6

4	Introduction to Accident Analysis Reconstruction methods Skid distances and Critical speed from Tire Yaw marks Reconstruction of Vehicular Rollover Accidents Analysis of Collisions Reconstruction Applications Impulse Momentum Theory Crush Energy Photogrammetry for accident constructions	8
5	Antilock braking system Electronic Stability Program Low tire pressure warning system Collision avoidance systems	5
6	Basic Vehicle Operations and Road/Helmet Safety Activity	6

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 491	Project B	-	-	-	-	50	25	25	100

1. Course Objectives:

The course is aimed to:

1. To offer students a glimpse into real world problems and challenges that need IT based solutions
2. To enable students to create very precise specifications of the IT solution to be designed.
1. To introduce students to the vast array of literature available of the various research challenges in the field of IT
2. To create awareness among the students of the characteristics of several domain areas where IT can be effectively used.
3. To enable students to use all concepts of IT in creating a solution for a problem
4. To improve the team building, communication and management skills of the students..

2. Course Outcomes:

On successful completion of course learner:

1. Discover potential research areas in the field of IT
2. Conduct a survey of several available literature in the preferred field of study
3. Compare and contrast the several existing solutions for research challenge
4. Demonstrate an ability to work in teams and manage the conduct of the research study.
5. Formulate and propose a plan for creating a solution for the research plan identified
6. To report and present the findings of the study conducted in the preferred domain

3. Detailed Theory Syllabus:

Guidelines

1. The project work is to be conducted by a group of three students
2. Each group will be associated with a project mentor/guide. The group should meet with the project mentor/guide periodically and record of the meetings and work discussed must be documented.
3. Department has to allocate 1 day in VII semester and 2 day in VIII semester every week.
4. Students will do literature survey in Sem VI or Sem VII.
5. Students will do design, implementation and coding in Sem VII.
7. Each group along with its guide/mentor shall identify a potential research area/problem domain, on which the study is to be conducted.
8. Each team will do a rigorous literature survey of the problem domain by reading and understanding at least 3-5 research papers from current good quality national/international journals/conferences. (Papers selected must be indexed by Scopus/IEEE/Springer/ACM etc.). The list of papers surveyed must be clearly documented.
9. The project assessment for term work will be done at least two times at department level by giving presentation to panel members which consist of at least three (3) members as Internal

examiners (including the project guide/mentor) appointed by the Head of the department of respective Programme.

10. A report is to be prepared summarizing the findings of the literature survey. A comparative evaluation of the different techniques surveyed is also to be done.
11. Students will do testing and analyse in Sem VIII
12. Teams must analyse all the results obtained by comparing with other standard techniques.
13. Every team must publish their work in national / international conference/journals (if possible publish in Scopus indexed journals).

Evaluation

1. Each team has to give a presentation/demo to the Internal Panel and External examiner.
2. Each team will prepare a report that will summarize the results of the literature survey and implementation and coding as project proposal in SEM VII. The list of papers surveyed must be clearly documented.
3. Each group will be jointly evaluated by a team of Internal and External Examiners approved by the University of Mumbai.
4. Oral exams will be conducted on the project done by the students.

Term Work:

Term Work shall consist of full Project-I on above guidelines/syllabus.

Term Work Marks: 50 Marks (Total marks) = 45 Marks (Project-I) + 5 Marks (Attendance)

Oral Exam: An Oral exam will be held based on the Project-I and Presentation.

**BACHELOR OF TECHNOLOGY

4. Term Work:

Term Work shall consist of full Project-C on above guidelines/syllabus.

Term Work Marks: 100 Marks (Total marks) = 95 Marks (Project-II) + 5 Marks (Attendance)

Oral Exam: An Oral exam will be held based on the Project-C and Presentation.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
CE 496	Industry Internship	Contact Hours	-	24	-	24
		Credits	-	8	-	8

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
CE 496	Industry Internship	-	-	-	-	100	100	-	200

Course Description:

Provides the student with an opportunity to gain knowledge and skills from a planned work experience in the student's chosen career field. Internship or placements are directly related to the student's program of study and provide learning experiences not available in the classroom setting. Internships provide entry-level, career-related experience, and workplace competencies that employers value when hiring new employees. Internships may also be used as an opportunity to explore career fields.

1. Course Objectives: The course is aimed to:

1. To identify relevant industries to solve societal/environmental problems.
2. To familiarize the process of solving the problem in a corporate environment.
3. To provide an opportunity to apply theoretical knowledge and skills into practice.
4. To develop networking with professionals while learning new skills.
5. To get an exposure or real time experience on live industry projects.
6. To understand the code of conduct and professional ethics and handle the work environments.

2. Course Outcomes: On successful completion of course learner/student will be able to:

1. Attain an exposure to real life organizational situations and achieve hands on experience in an organization
2. Build proficiency in a range of business or industry skills appropriate to the field of the internship/placement.
3. Develop professional and intercultural communication through written, verbal, and non-verbal means.
4. Articulate software development lifecycle (SDLC) phases in developing software projects and in writing the project document.
5. Refine and clarify professional and career goals through critical analysis of the internship experience or research project.
6. Inculcate the self-learning to know the job opportunities, higher studies and build a professional network.

3. Guidelines regarding Internship:

1. To get hands-on experience of the real world, every candidate is required to undertake an individual internship in an organization of repute. The duration of Internship will be a minimum of 14 weeks to a maximum of 20 weeks.
2. The internship duration /slot will start immediately after completion of semester VII examinations and it will end on the last instructional date of the semester VIII (as per the academic calendar).
3. All students enrolled in semester VII have to submit the Application Form in the prescribed format to the Internship Cell/ Internship Coordinator at least a month prior to the last instructional day of semester VII
4. Students shall submit an implementation plan in the form of Gantt/PERT/CPM chart, which will cover weekly activity of the internship.
5. In case of an internship offered through the college selection process, the student is eligible for only one offer and cannot appear for further process once selected.
6. The applications will be scrutinized by the internship approval committee at college /department level for its merit. The decision of the committee will be final and further grievances will not be entertained.
 1. The college will assign a mentor for each student who will monitor the student's progress throughout the duration of the internship. The students are expected to be in contact with the mentor on a regular basis.
 2. Students can join an internship only after getting an approval from the internship-committee.
 3. In case any student attempts to join an internship bypassing college procedure, it will not be considered for credit completion of semester VIII and hence for award of the B.Tech degree.
7. Faculty Internship Advisor or Internship Education Program Advisor may give input to students during internship, however, focus shall be on self-learning by the student.
8. A log book to be prepared by each student, wherein students can record weekly work progress, faculty Internship Advisor can verify and record notes/comments.
9. Students should make an Internship report as per the format provided.

4. Suggested Internships Categories: Following are the suggested categories of a valid Internships:

1. Industrial Internship- Private, Public, LLP or Start-up company
2. Incubation center - Under start-up or pre-incubation registered with Incubation center, Innovation / Entrepreneurship related activities.
3. Government Sector - BSNL, BEL, BHEL, ONGC, GMRT, Railways etc..
4. Government Research organization - IIT's, NIT's, IITM, IISR, DIAT, ISRO, TIFR etc..
5. Research lab - NCL, CSIR, CME, CPR, HEMRL, DRDO, Police Research Centre etc..
6. Institutional Internship through UGROP.
7. Internships other than UG project work offered by PI/CoPI of any Research project, live Industry projects, different technical activity clubs, learning at departmental Lab/ Tinkering Lab/ Institutional workshop etc..

5. Internship Attendance Guidelines:

1. Students are required to report to work on time and according to the requirements of the student's individualized work schedule.

2. Students are expected to conform to all attendance policies established by the employer and must notify the Faculty Internship Advisor in the event of absence from work.
3. When the employer is open for business on college holidays, the student is expected to report to work as scheduled.
4. Individual work schedules are established by agreement of the student, employer, and Faculty Internship Advisor.

5. Internship Report Format:

At the end of semester a project report should preferably contain at least following details:

1. Introduction

- 1.1 About the Organization
- 1.2 About the Internship
- 1.3 Purpose of Internship
- 1.4 Scope and Objectives of Internship
- 1.5 Roles and Responsibility
- 1.6 Organization of the Internship Report

2. Internship Activities

- 2.1 Responsibilities and Tasks Assigned
- 2.2 Weekly Overview of Internship Activities

3. Work Accomplishments

- 3.1 Details of Work Carried Out
- 3.2 Challenges Faced
- 3.3 Achievements and Benefits to the Company/Society

4. Learning through Internship

- 4.1 Technology Used
- 4.2 Methodology Adopted
- 4.3 Skills Acquired/Enhanced

5. Conclusion

- 5.1 Summary of Key Points
- 5.2 Overall Internship Experience

Bibliography

6. Internship Evaluation Guidelines:

The institute shall ask the Internship offering Organization to allocate a mentor to the students to monitor and update the progress of the student and undertake a ground work to make internship more effective. The institute (concerned department) will allocate an internal faculty mentor to the students. The faculty mentor will undertake continuous evaluation of the students and will be responsible for submission of his/her grades. The interactions may be through Email/Skype/ Video Conferencing. etc. or a personal visit by faculty mentor to the internship site, as the need be or the policy of the institute. The student needs to submit the internship joining report duly signed by the mentor from the organization and the mentor from the institute to the department within two weeks from the commencement of the internship.

A. Suggested distribution of Term Work of 100 marks for internship shall be awarded based on:

- Selection of relevant industry and weekly progress report/ log book: **20 marks**
- Internal mock assessment as per defined rubrics/parameters: **20 marks**
- Evaluation/Feedback by industry/employer: **20 marks**

- Quality of work carried out during Internship and presentation: **20 marks**
- Quality of internship report and presentation: **20 marks**

B. Suggested distribution of Oral/Practical of 100 marks for internship shall be awarded based on:

- Selection of relevant industry and its requirements & scope: **20 marks**
- Quality of work carried out during Internship and presentation: **20 marks**
- Depth of knowledge, technology used and skills acquired during Internship: **20 marks**
- Work carried out, achievements and benefits to the company/society: **20 marks**
- Effectiveness of presentation and response to question(s): **20 marks**
